Series created by Iginio Straffi www.winxclub.com

Hi guys!

After a long vacation, it's finally back to school again! It's gonna be so exciting to take on new classes, meet new people and of course, learn so many new things! There will be so many exciting experiences that will come your way throughout the school year. One thing you must never forget though is to take a chance. Don't ever be scared to take every opportunity that comes your way because you will never know what it's like until you take it. Life is short and it's important to live it to the fullest—or else you'll find yourself wallowing in regret.

Grab every opportunity that comes your way—let's start this school year with a bang!

Love,

Cheryl

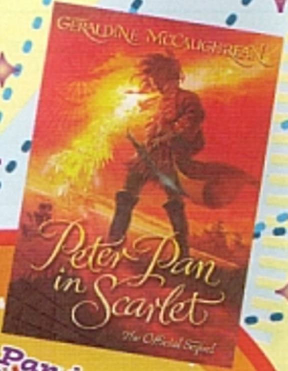
In the Mood for School

Hope those brain cells didn't go slow during the hot and lazy days of summer. Power them up with these fascinating books to get you back into school mode!



Peter Pan in Scarlet
By Geraldine McCaughrean

Pack your bags and journey into Neverland with Peter Pan in this much-awaited sequel to the classic tale. *Peter Pan in Scarlet* gives us a chance to discover so much more about Neverland by adding new characters and bringing a more modern perspective on the story as well. If you haven't read *Peter Pan* as a kid, now is the time to discover his magic. For those who've met Peter before, this new book will open your eyes to an entirely new world where dreams are made and wishes come true.

Forever in Blue: The Fourth Summer of the Sisterhood
By Ann Brashares

Teenagers Tibby, Lena, Bridget & Carmen go off on their separate journeys in this fourth installment of the popular series, *The Sisterhood of the Travelling Pants.*. They spend their summer vacation discovering more about themselves and learning how to cope with adolescence. At the end of the fourth summer, the pants bring the girls together one last time. In the end, the girls come to realize that life is changing for each of them, but despite that, their friendship will continue to remain with them.

Forever in Blue
The Fourth Summer of the Sisterhood
Ann Brashares

The Clique
A novel by Lisi Harrison

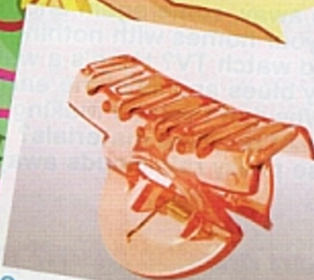
The Clique Series
by Lisi Harrison

Seventh grade A-listera Dylan, Kristen, Alicia and Massie rule their school as The Clique. Rich, gorgeous and spoiled, they are snotty to anyone who tries to bother them. Enter Claire Lyons, a total outsider—and nobody from Florida—living in Massie's guesthouse in her sprawling New York estate. She yearns to be part of the group even though she's neither wealthy nor gorgeous. This exciting series (seven books have been released so far) follows the joys and misfortunes of these girls, showing that the lives of the most popular girls in school are far from perfect—and that underneath the girls' viciousness, lies a celebration of genuine friendship. Begin the series with the first novel, *The Clique*—and you'll surely be unable to contain yourself from the next installments!

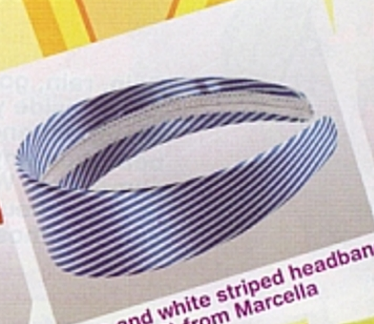
All The Pretty Things

Stella
of WINX CLUB

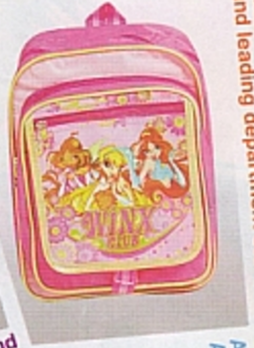
Who says that going back to school is equivalent to being drab and boring? Pack all these cute school-musts into an equally adorable school bag and you're surely destined to have a fab time while learning!



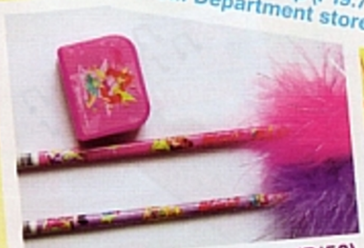
Orange hair clamp (P19.75) available at SM Department store



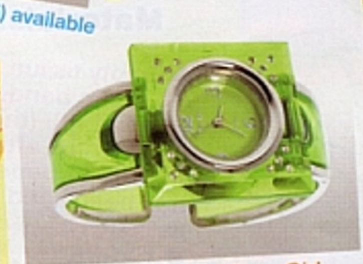
Blue and white striped headband (P40) from Marcella



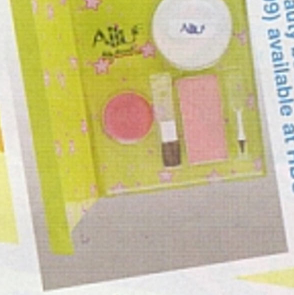
Winx backpack available at Sparkle and leading department stores



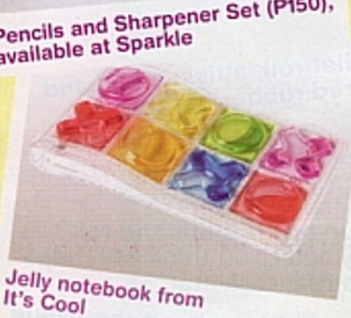
Pencils and Sharpener Set (P150), available at Sparkle



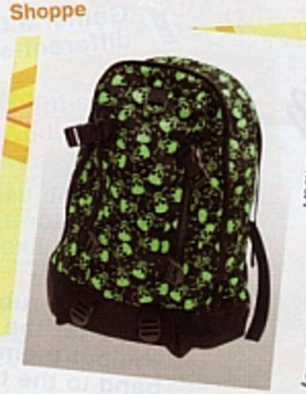
Green watch (P300) from Girl Shoppe



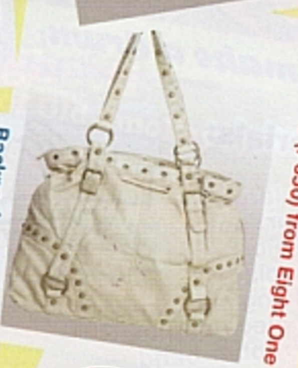
Allure beauty book in Happily Ever After (P99) available at HBC



Jelly notebook from It's Cool



Backpack with skull prints (P595) from Iba' Diba?



White tote (P650) from Eight One

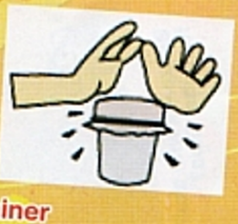
Recycle to Play (Music)

Here's a fun-filled activity where you can save the earth—and make music!

Rain, rain, go away, come again another day! Stuck inside your homes with nothing to do but sleep, eat and watch TV? Here's a way you can beat the rainy blues and save the earth at the same time! Why don't you try making your own rock band out of recycled materials? Then, you can sing those pesky rain clouds away!

To make a drum:



Materials:

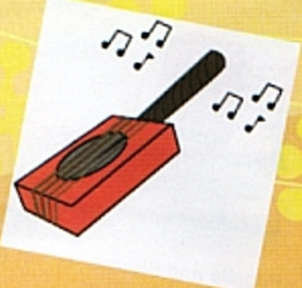
- A large yogurt pot, jell-o or chocolate pudding container
- A piece of paper
- A rubber band

1 Find a large yogurt, jell-o or chocolate pudding container and clean it.

2 Cover the top with a strong piece of paper and wrap a rubber band around it.

3 Now you can groove to the beat!

To make an elastic band guitar:



Materials:

- Empty tissue box
- Elastic bands
- Toilet roll (the carton part after the roll of paper has been used up!)
- Paint
- Glue

1 Gather a toilet roll, a tissue box and different-sized rubber bands.

2 Glue the toilet roll to the top of the tissue box.

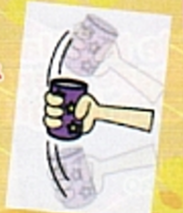
3 Paint the tissue box red and the roll brown—or any color you think will make you look like a real rock star!

4 Place the rubber bands around the tissue box after the paint has dried. Make sure you put them in order, from the thickest band to the thinnest.

5 Now you can start playing!

To make a shaker:

Materials:



- Empty soft drink can
- Uncooked rice
- Paper
- Glue

1. Find a can and clean it. Remove the tab. Fill it with uncooked rice.
2. Seal the can with a piece of paper and some glue.
3. Paint it any way you want!
4. All done! Now you can rock out to these songs!

Musa

If All the Raindrops

If all the raindrops
Were lemon drops and gumdrops
Oh, what a rain that would be!
Standing outside, with my mouth open wide
Ah, ah, ah, ah, ah, ah, ah, ah, ah, ah
If all the raindrops were lemondrops and gumdrops
Oh, what a rain that would be!

On Top of Spaghetti
(Sing to the tune of "On Top of Old Smokey")

On top of spaghetti, all covered with cheese,
I lost my poor meatball when somebody sneezed.

It rolled off the table, and onto the floor,
And then my poor meatball rolled out of the door.

It rolled down the garden, and under a bush,
And then my poor meatball was nothing but mush!

The mush was as tasty, as tasty could be,
And then the next summer it grew into a tree.

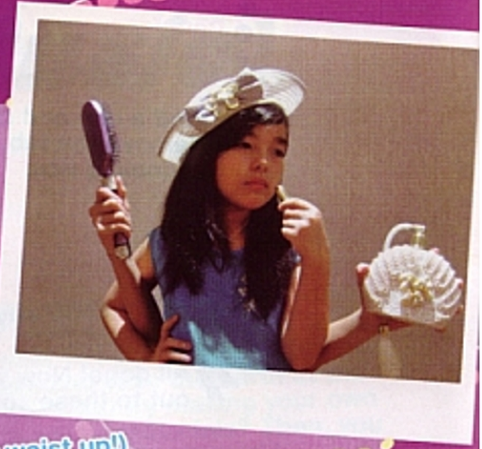
The tree was all covered, all covered with moss,
And on it grew meatballs, all covered with sauce.

So if you have spaghetti, all covered with cheese,
Hold onto your meatball, 'cause someone might sneeze.

D-I-Y Camera Tricks

Who says you can't learn outside the classroom? Take on these fun camera tricks by following these steps—and you can have an awesome weekend filled with laughter with your friends!

Yes, you can actually do some magic! All you need is a camera—and some friends who are looking to have some fun!



Look Ma! Four arms!

Don't you wish you had more arms to do more things? With extra hands, now you can do everything all at the same time!

Step 1: Have your friend stand behind you and let her stick her arms out from under your armpits

Step 2: Get various items you can find in the house for both of you to hold

Step 3: Take the picture! (But only from your waist up!)

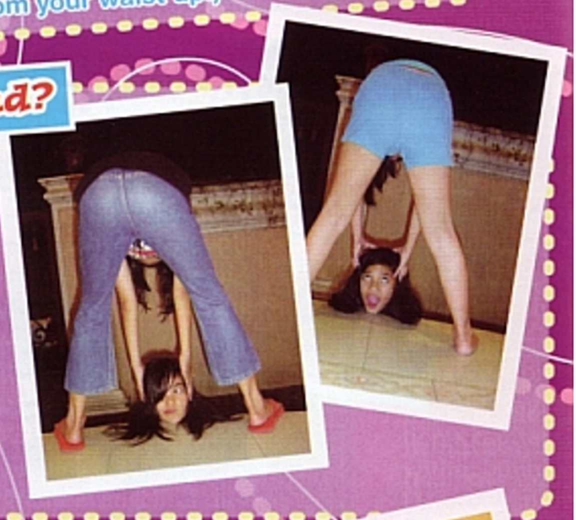
Can I borrow your head?

Scare your friends and pretend one of your friend's head is off!

Step 1: Have your friend hide behind any short wall and let her stick her head out only

Step 2: Open your legs wide and pretend you're about to pick up her head

Step 3: Take the picture!



Tecna
of WINX CLUB

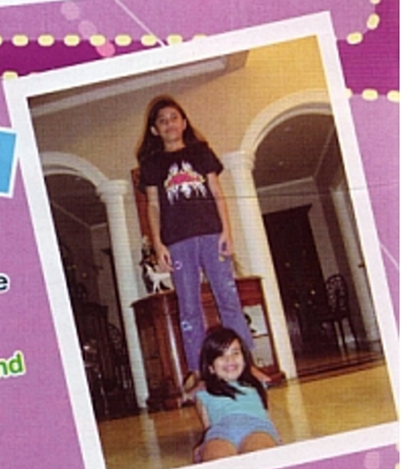
I'm superwoman!

You can surely carry ANYONE on your shoulders with this trick!

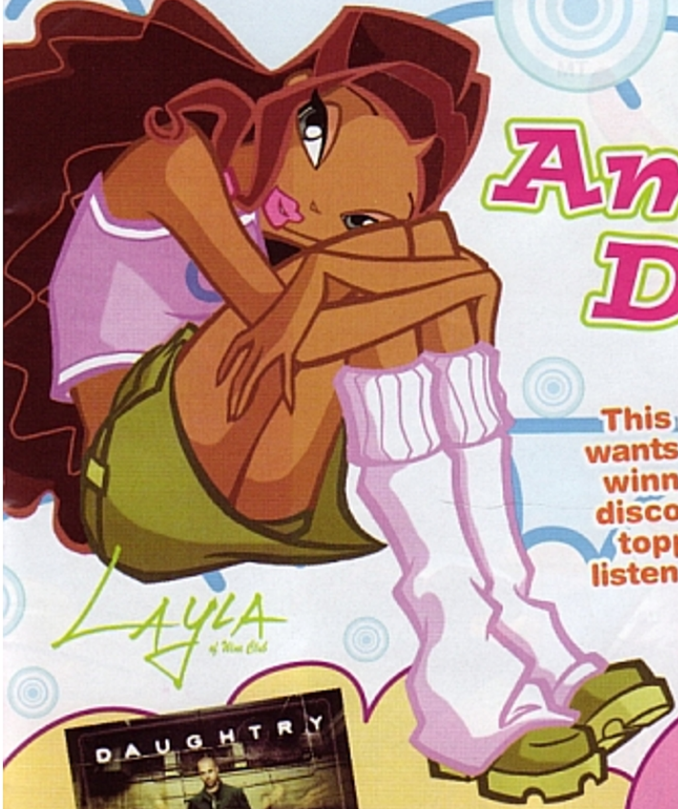
Step 1: Have your friend sit on the floor and stack books up until her shoulders

Step 2: Stand on the books behind her and make sure your feet are touching her shoulders

Step 3: Take the picture!



The American Dream



This is the reason why everyone wants to be the next American Idol—winner or finalist, great talent is discovered and turned into chart-topping records that are fun to listen to anywhere and everywhere!

Chris Daughtry
Daughtry

This American Idol finalist is now an official star. His debut album was able to sell over one million copies in the first five weeks, becoming the fastest selling debut rock album in history! With his singles "It's Not Over" and "Home" (which was played during every send-off in American Idol this year), you will surely find pleasure in listening to this album. Bonus: He's quite good-looking, too!

Katharine McPhee

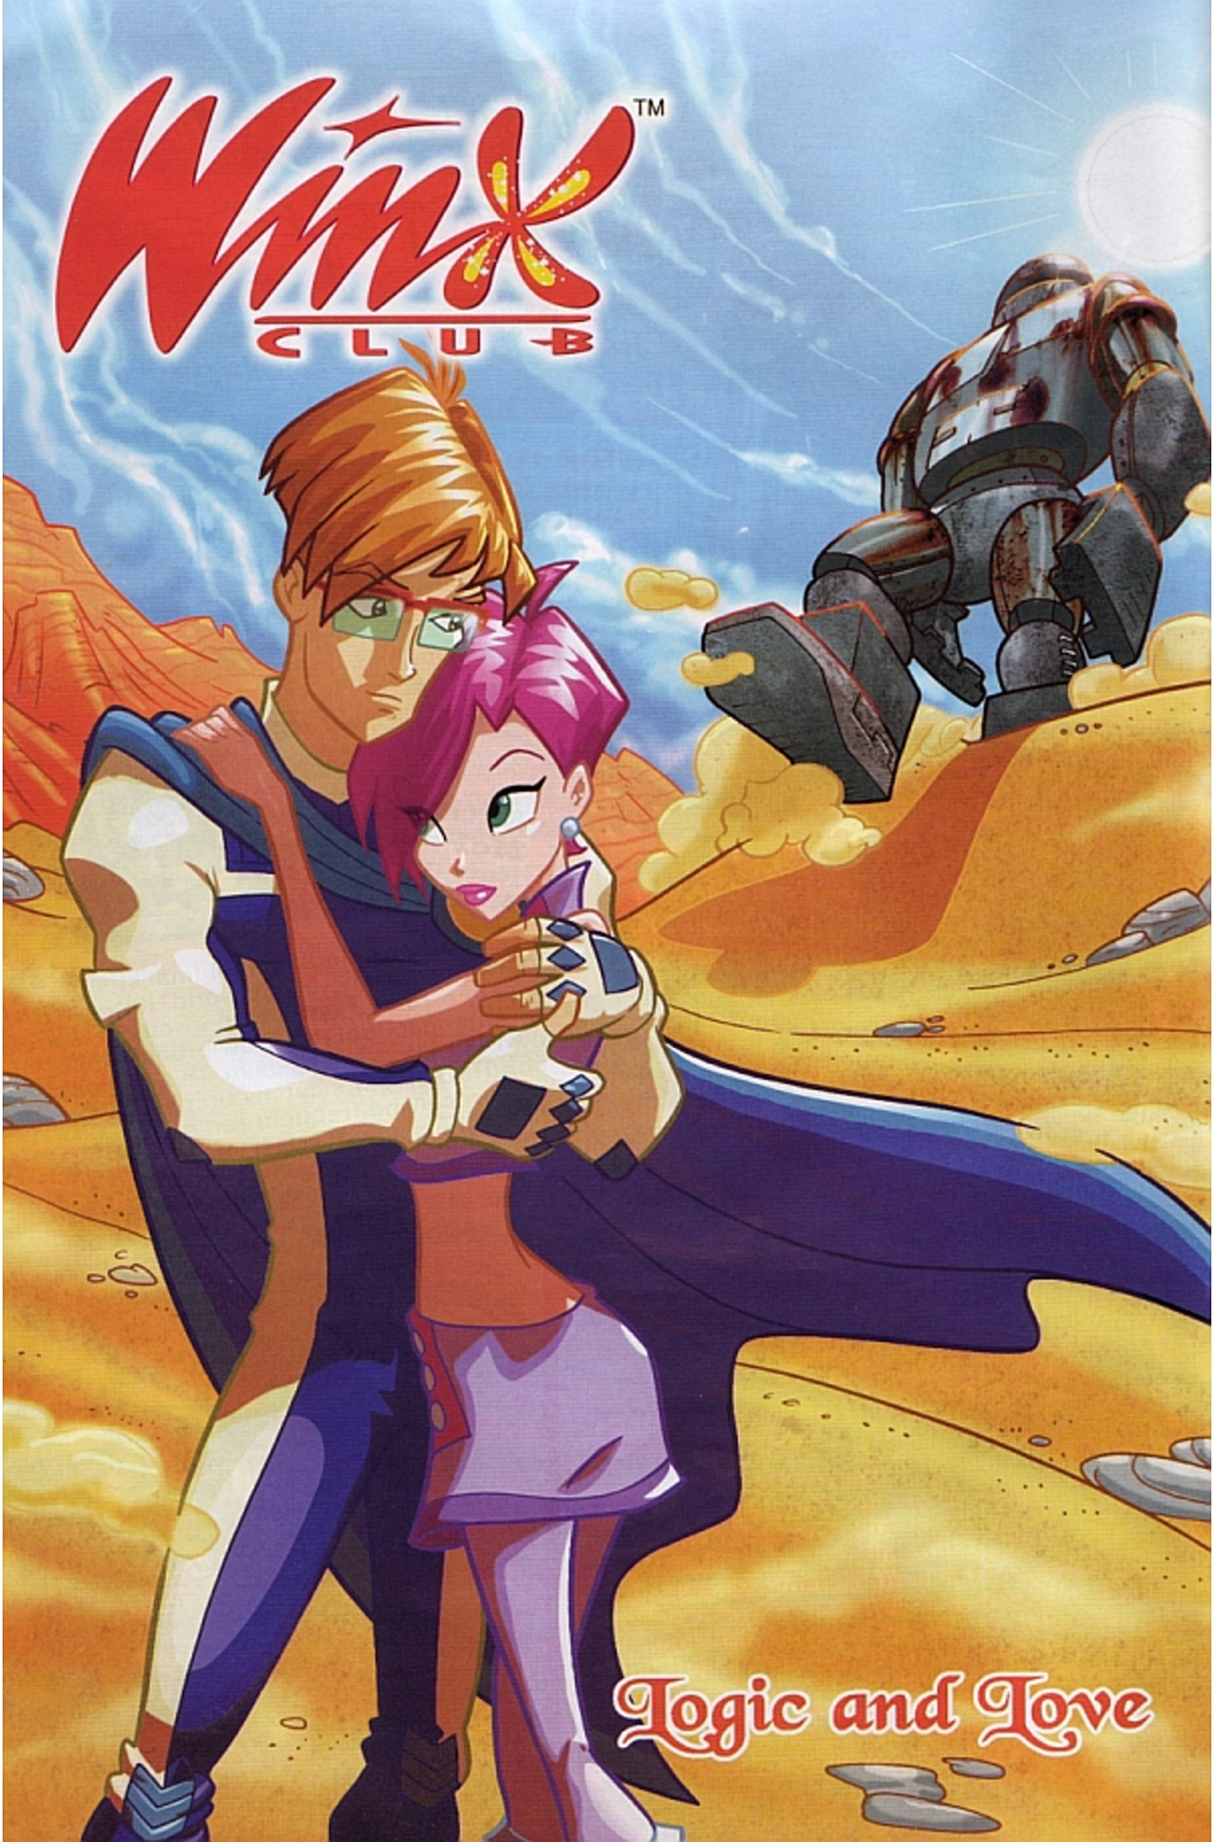
Katharine McPhee
Katharine McPhee

Another American idol finalist is crashing into the music world, Katharine McPhee, runner-up in the previous season of American Idol, has now produced her own self-titled debut album. This gorgeous pop/R&B singer's catchy first single has been receiving frequent radio airplay. Yeah, she's now "Over It" and moving on with her career. The album also features "Open Toes" which will be her second single. The rest of her album boasts of her pleasing voice laced with emotions.

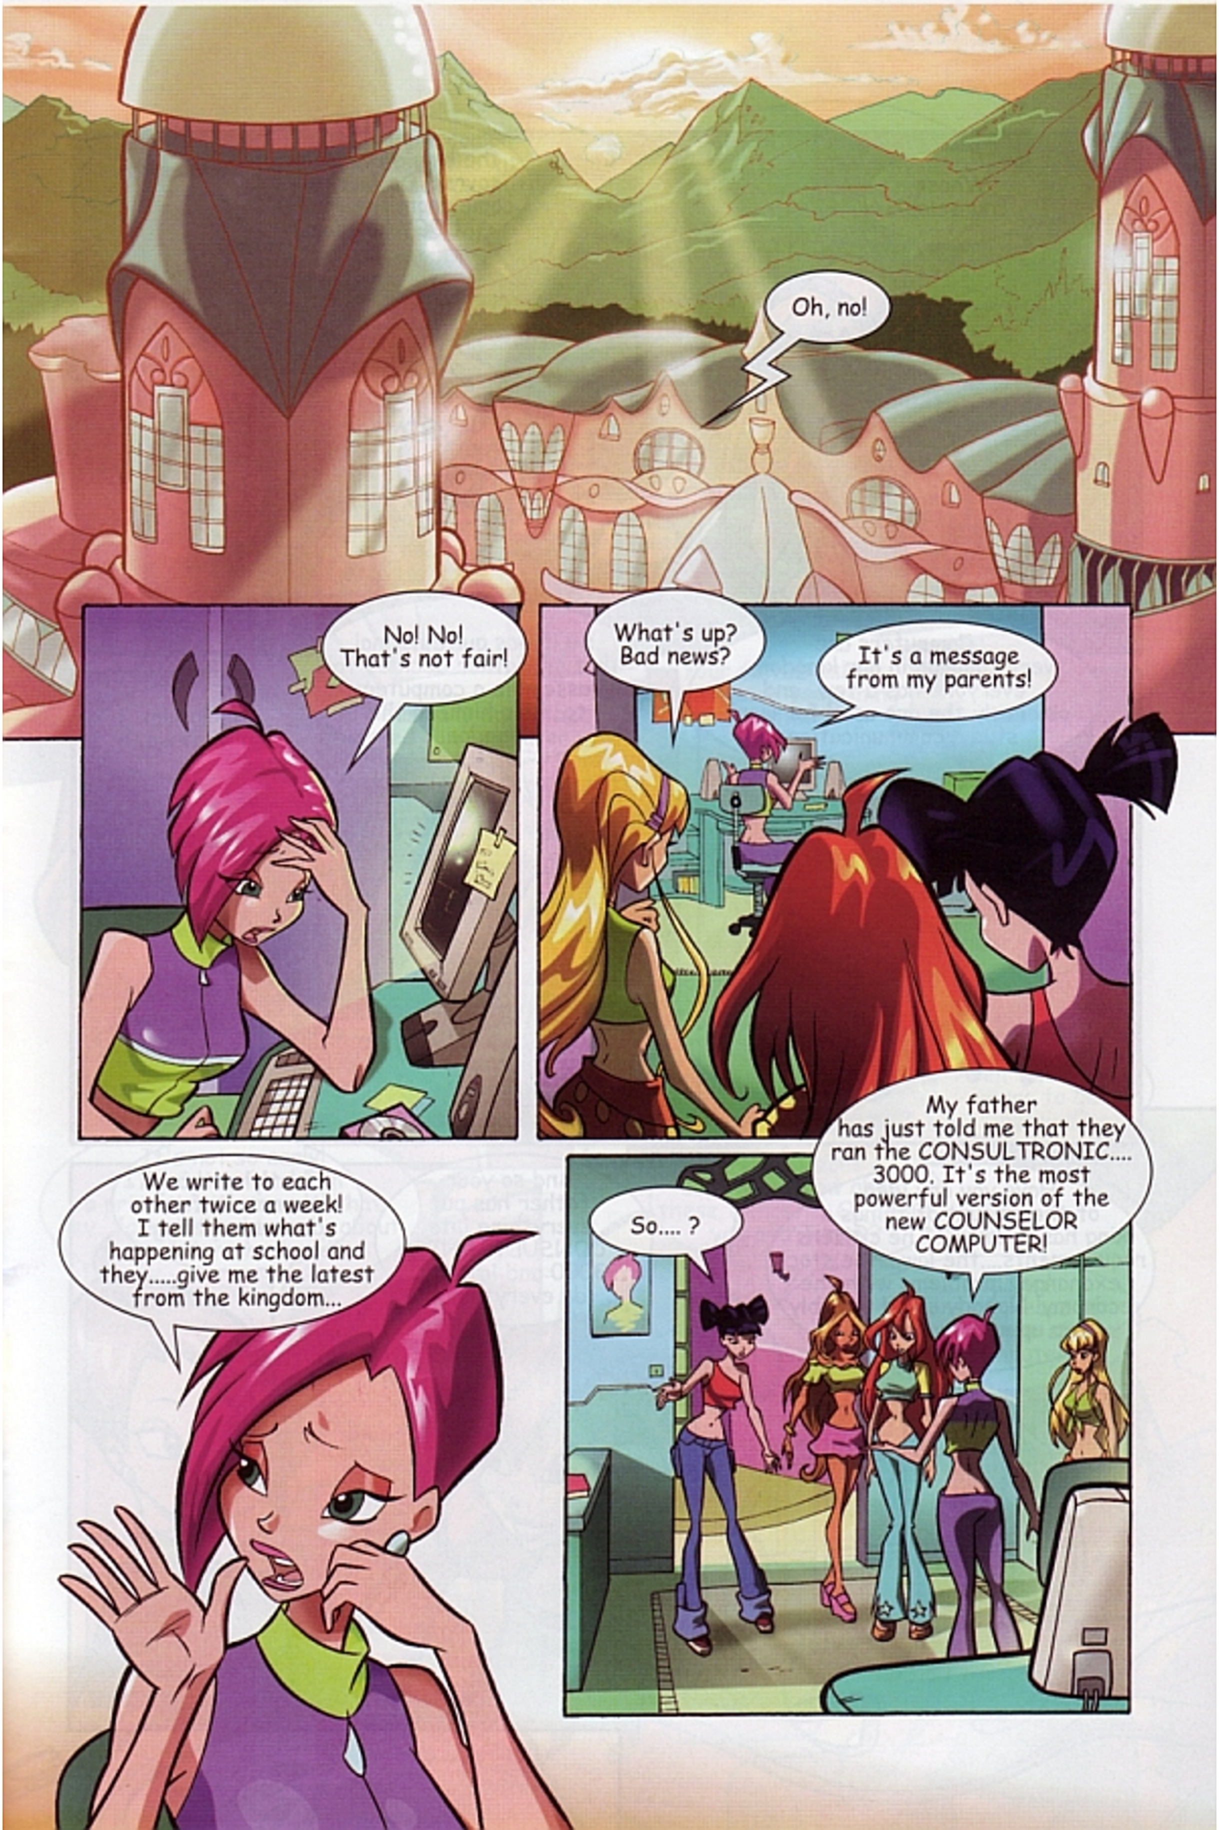
Taylor Hicks
Taylor Hicks

Taylor Hicks

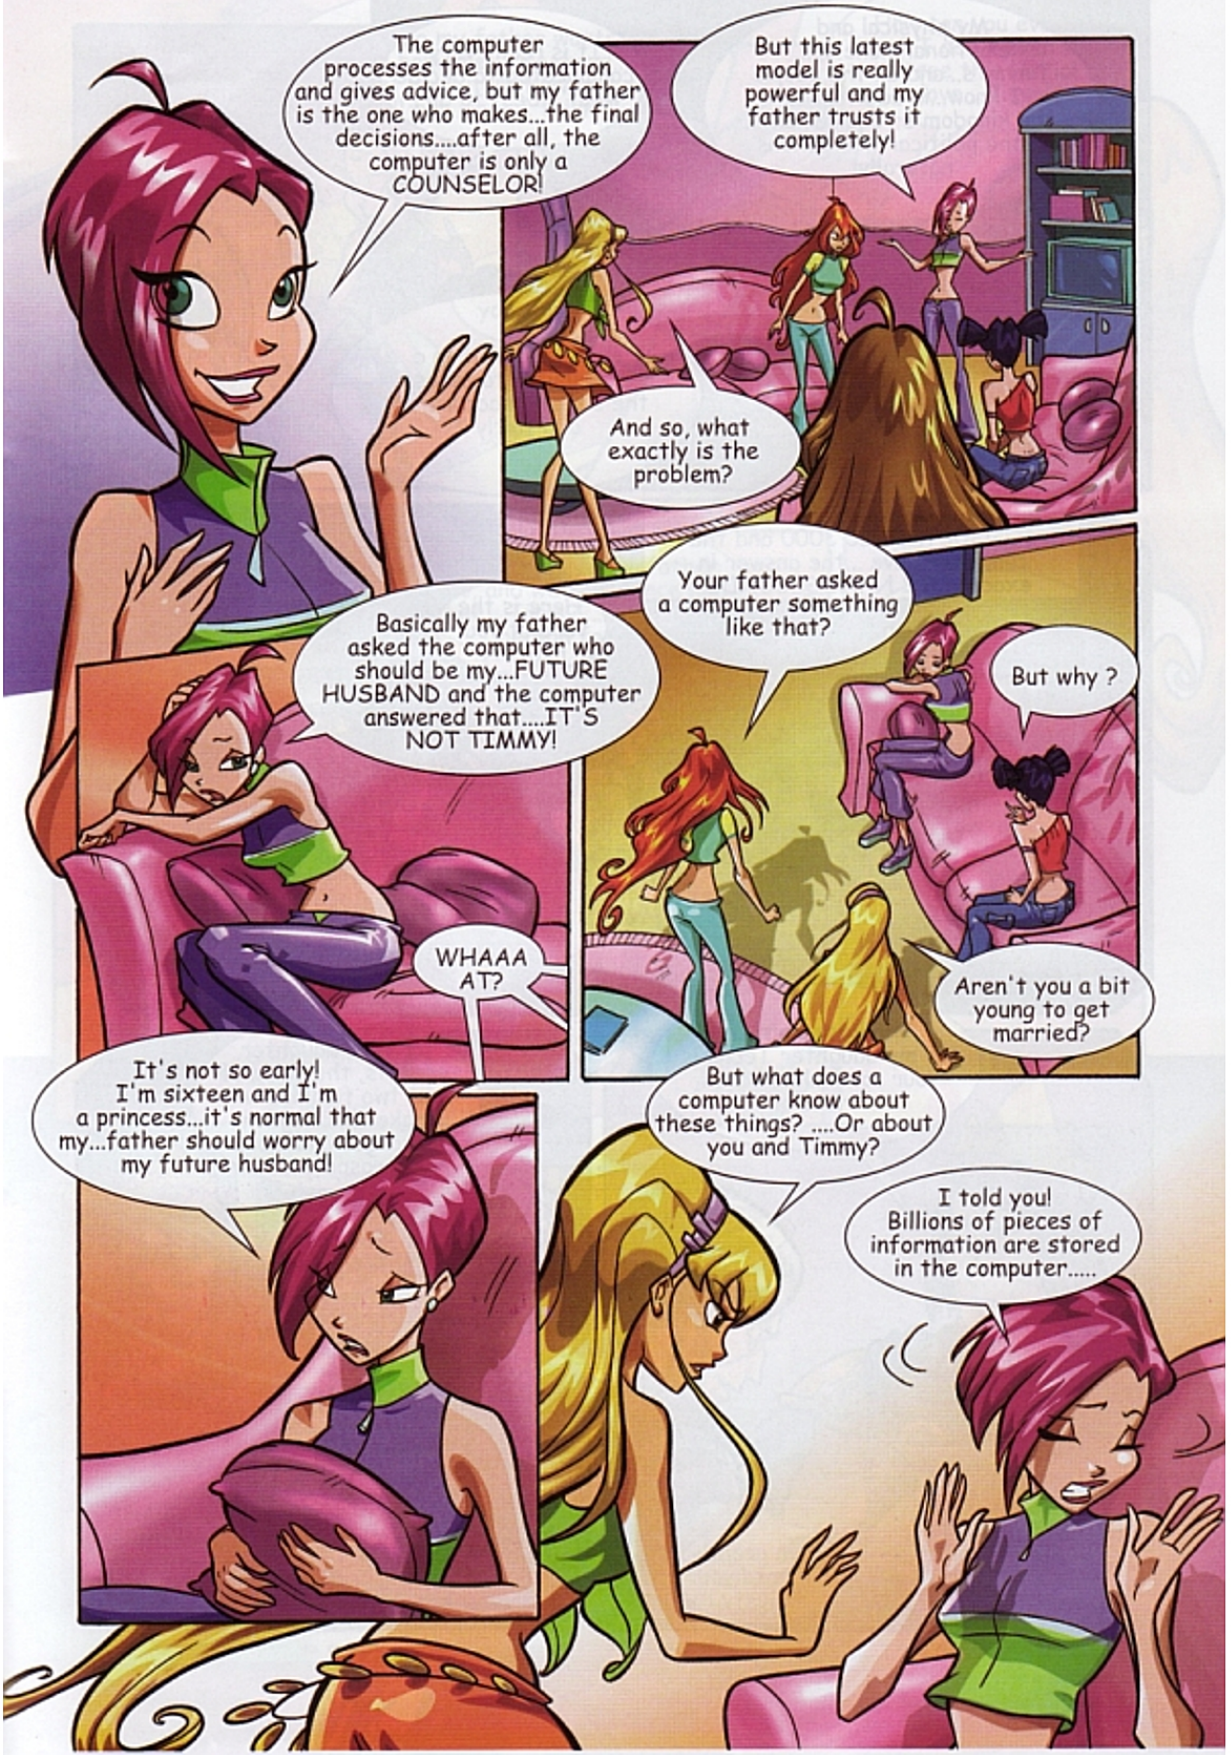
Your American Idol is back without missing a beat! Taylor Hicks' self-titled (and third) album is once again filled with beautiful melodies though a more mature listen compared to his previous albums. This man (who seems way older than he really is—he's only 31 years old!) and whose fans call themselves the "soul patrol", might be able to sway you to join the club after listening to this album which debuted as #2 in the US Billboard 200 Charts. It contains his famous single "Just to Feel that Way" as well as other catchy tracks "The Runaround", "Dream Myself Awake" and many others. It's definitely another successful effort from this funny and charming character!



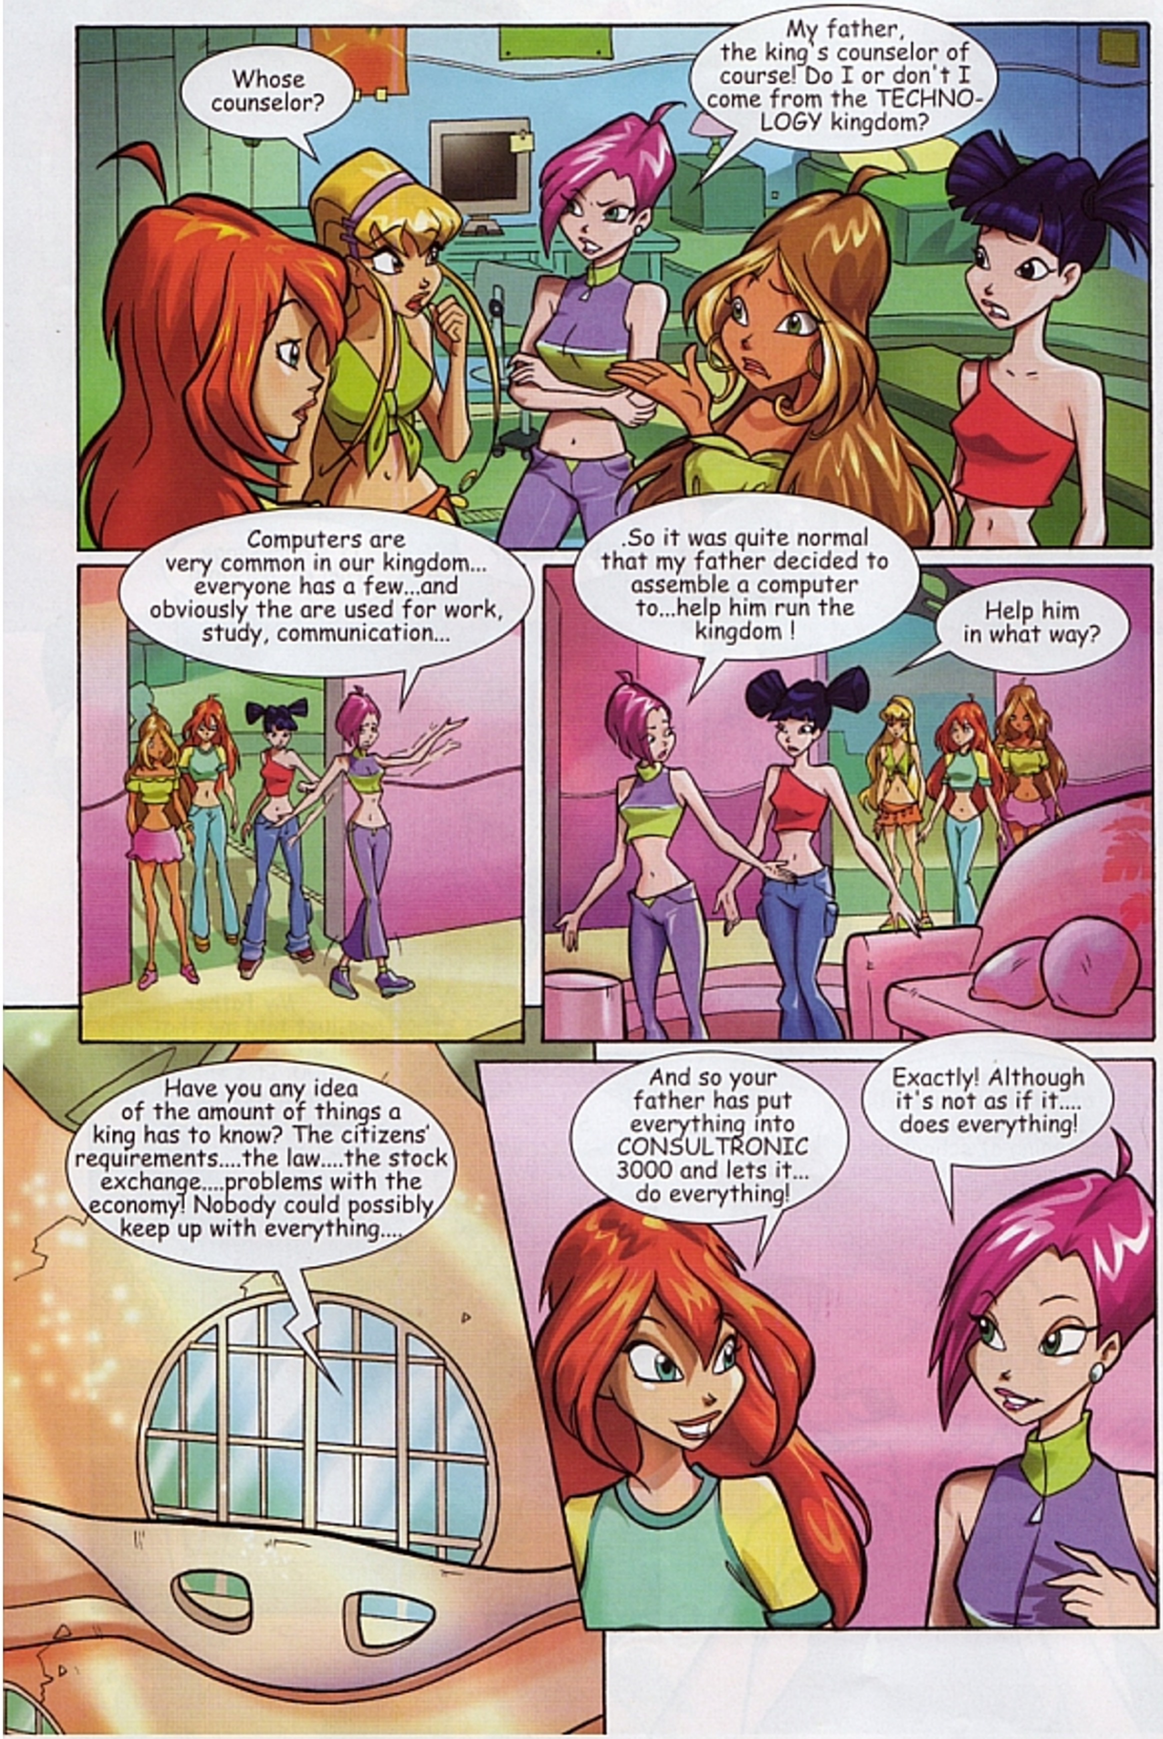
Winx Club™
Logic and Love



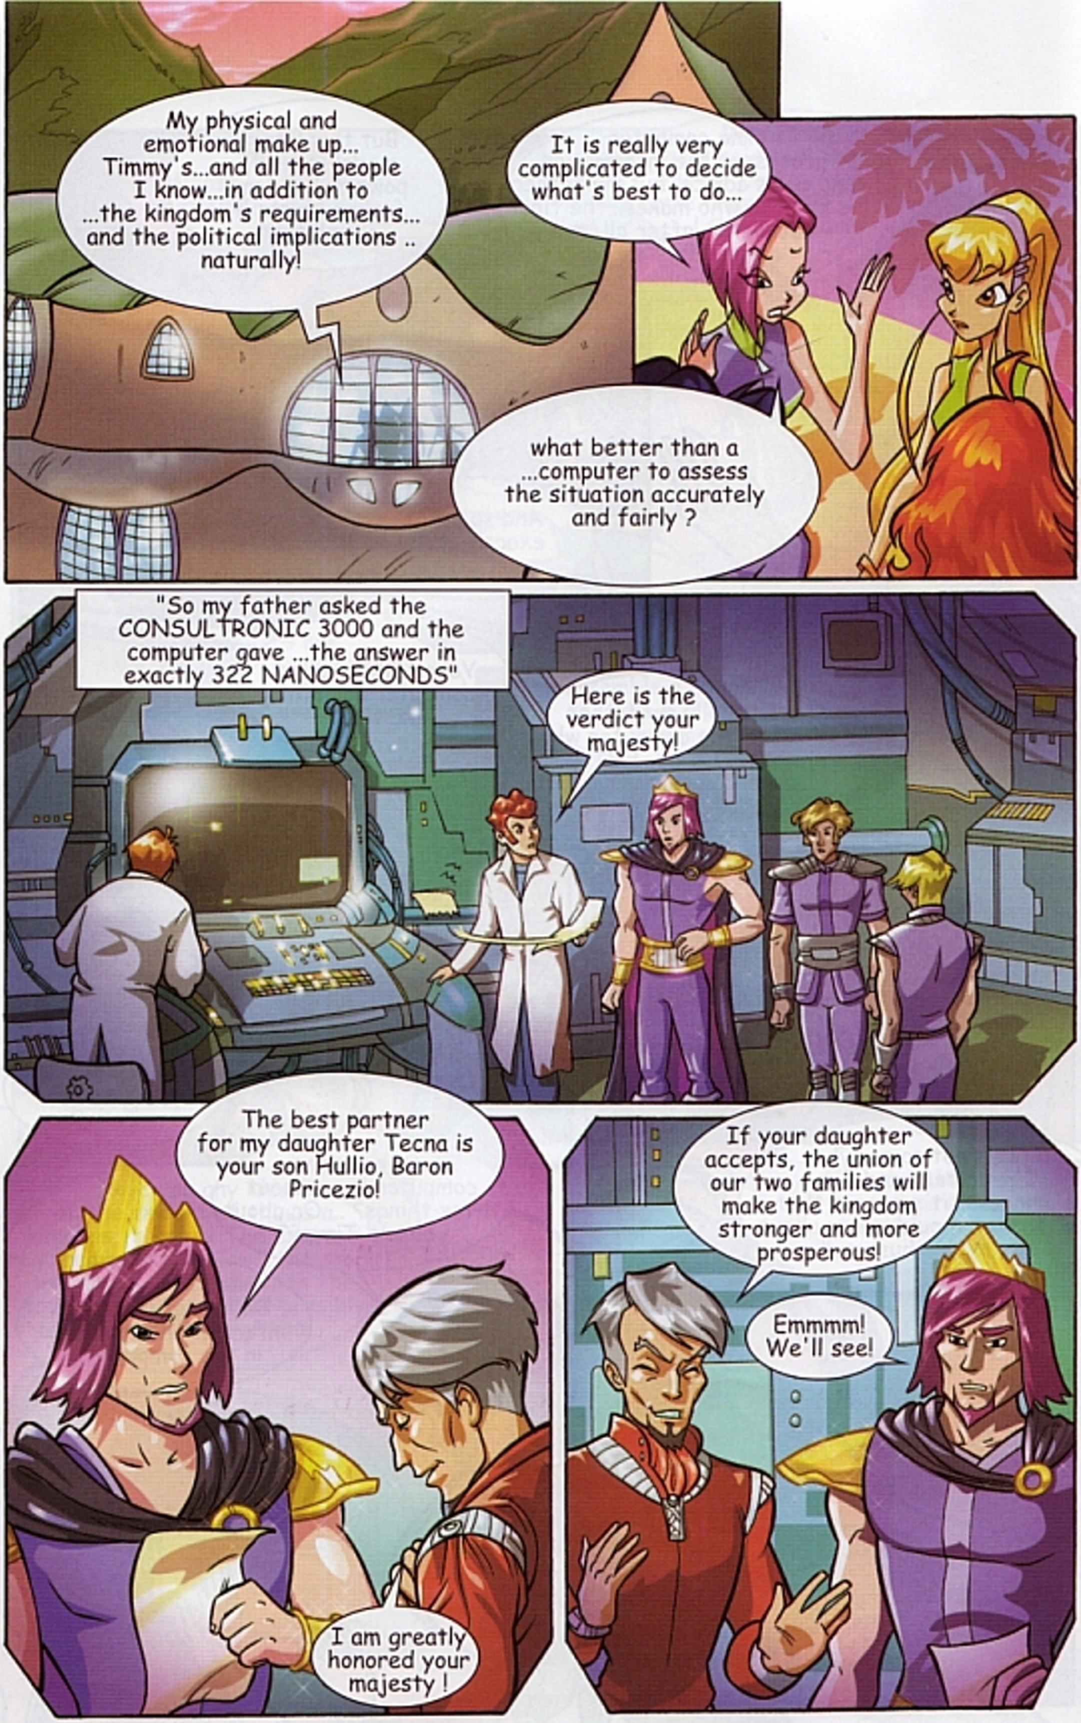
Oh, no!
No! No! That's not fair!
What's up? Bad news?
It's a message from my parents!
We write to each other twice a week! I tell them what's happening at school and they.....give me the latest from the kingdom...
So.... ?
My father has just told me that they ran the CONSULTRONIC.... 3000. It's the most powerful version of the new COUNSELOR COMPUTER!



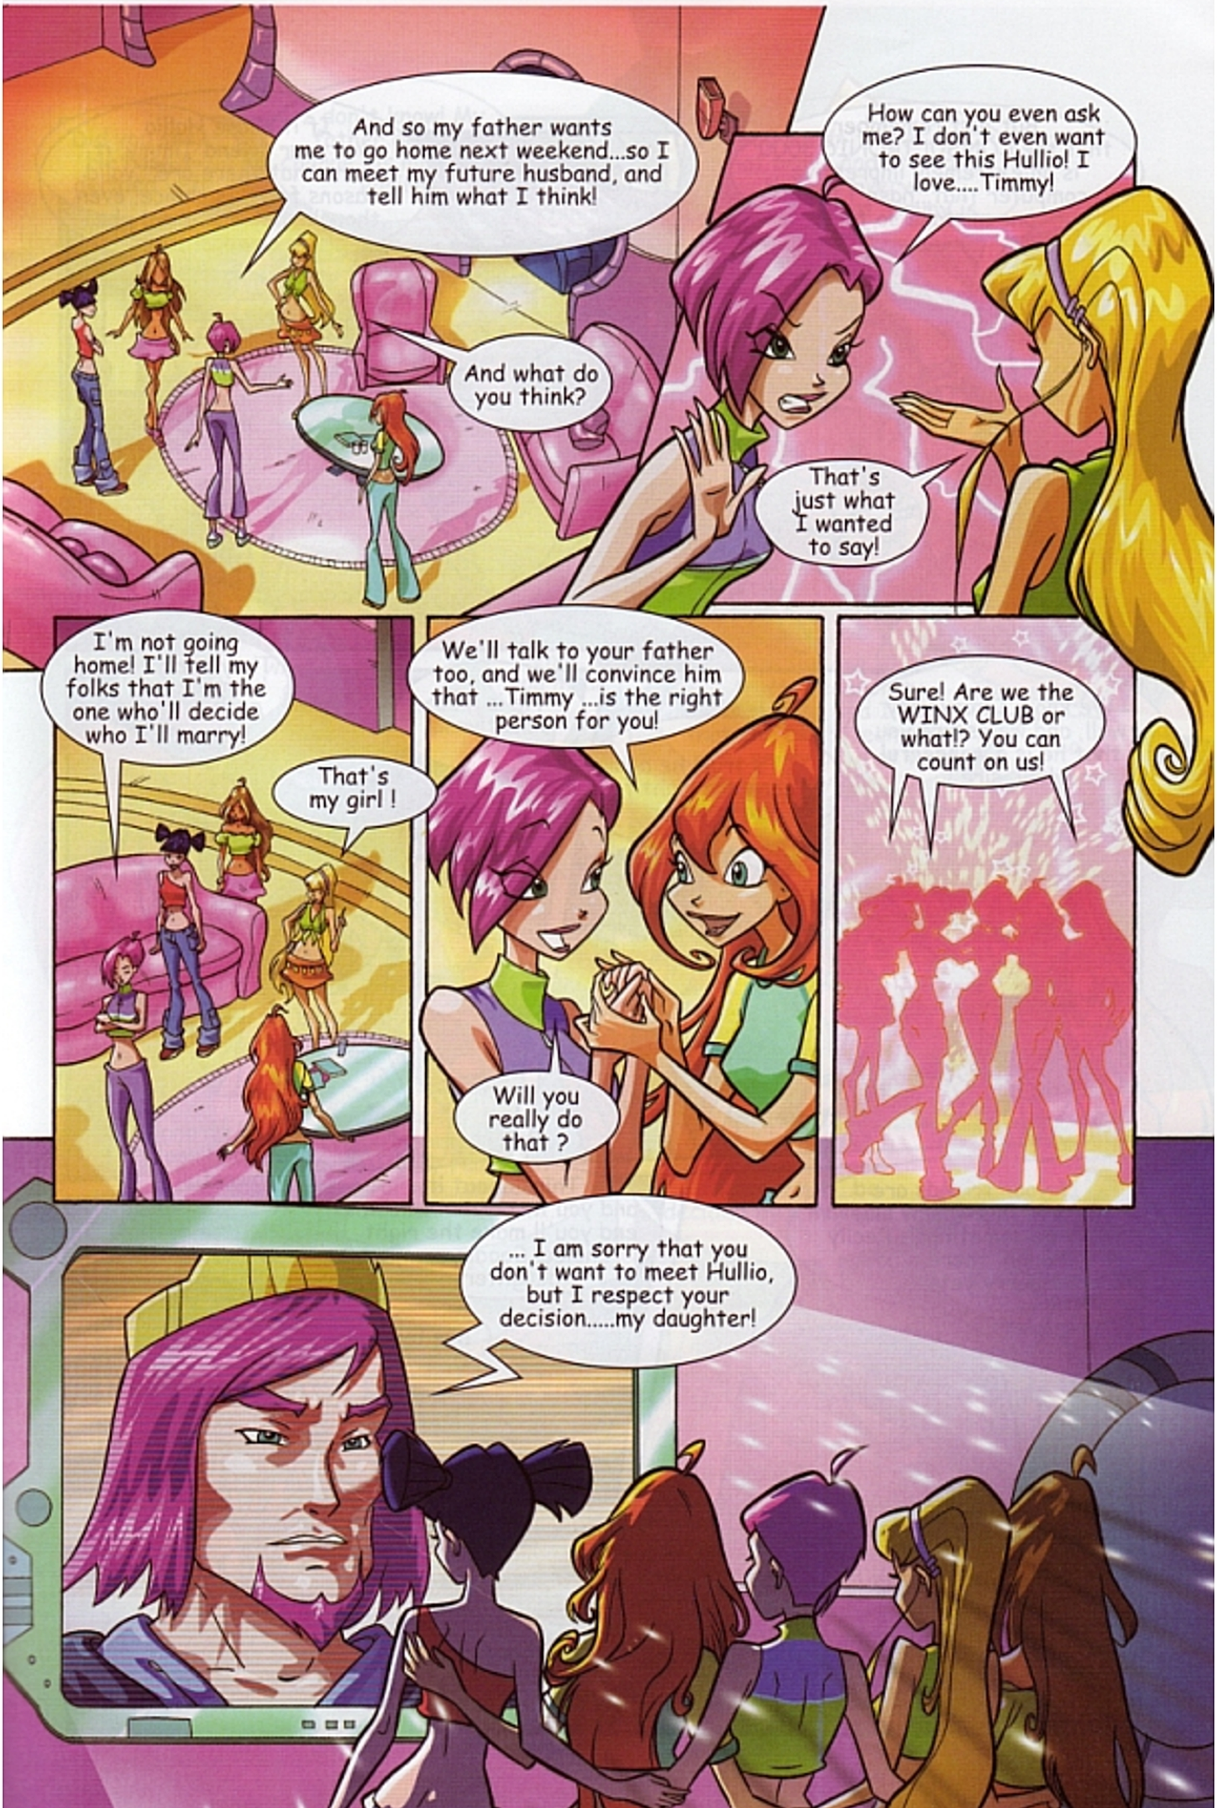
The computer processes the information and gives advice, but my father is the one who makes...the final decisions....after all, the computer is only a COUNSELOR!
But this latest model is really powerful and my father trusts it completely!
And so, what exactly is the problem?
Basically my father asked the computer who should be my...FUTURE HUSBAND and the computer answered that....IT'S NOT TIMMY!
WHAAA AT?
Your father asked a computer something like that?
But why ?
Aren't you a bit young to get married?
It's not so early! I'm sixteen and I'm a princess...it's normal that my...father should worry about my future husband!
But what does a computer know about these things? ....Or about you and Timmy?
I told you! Billions of pieces of information are stored in the computer.....



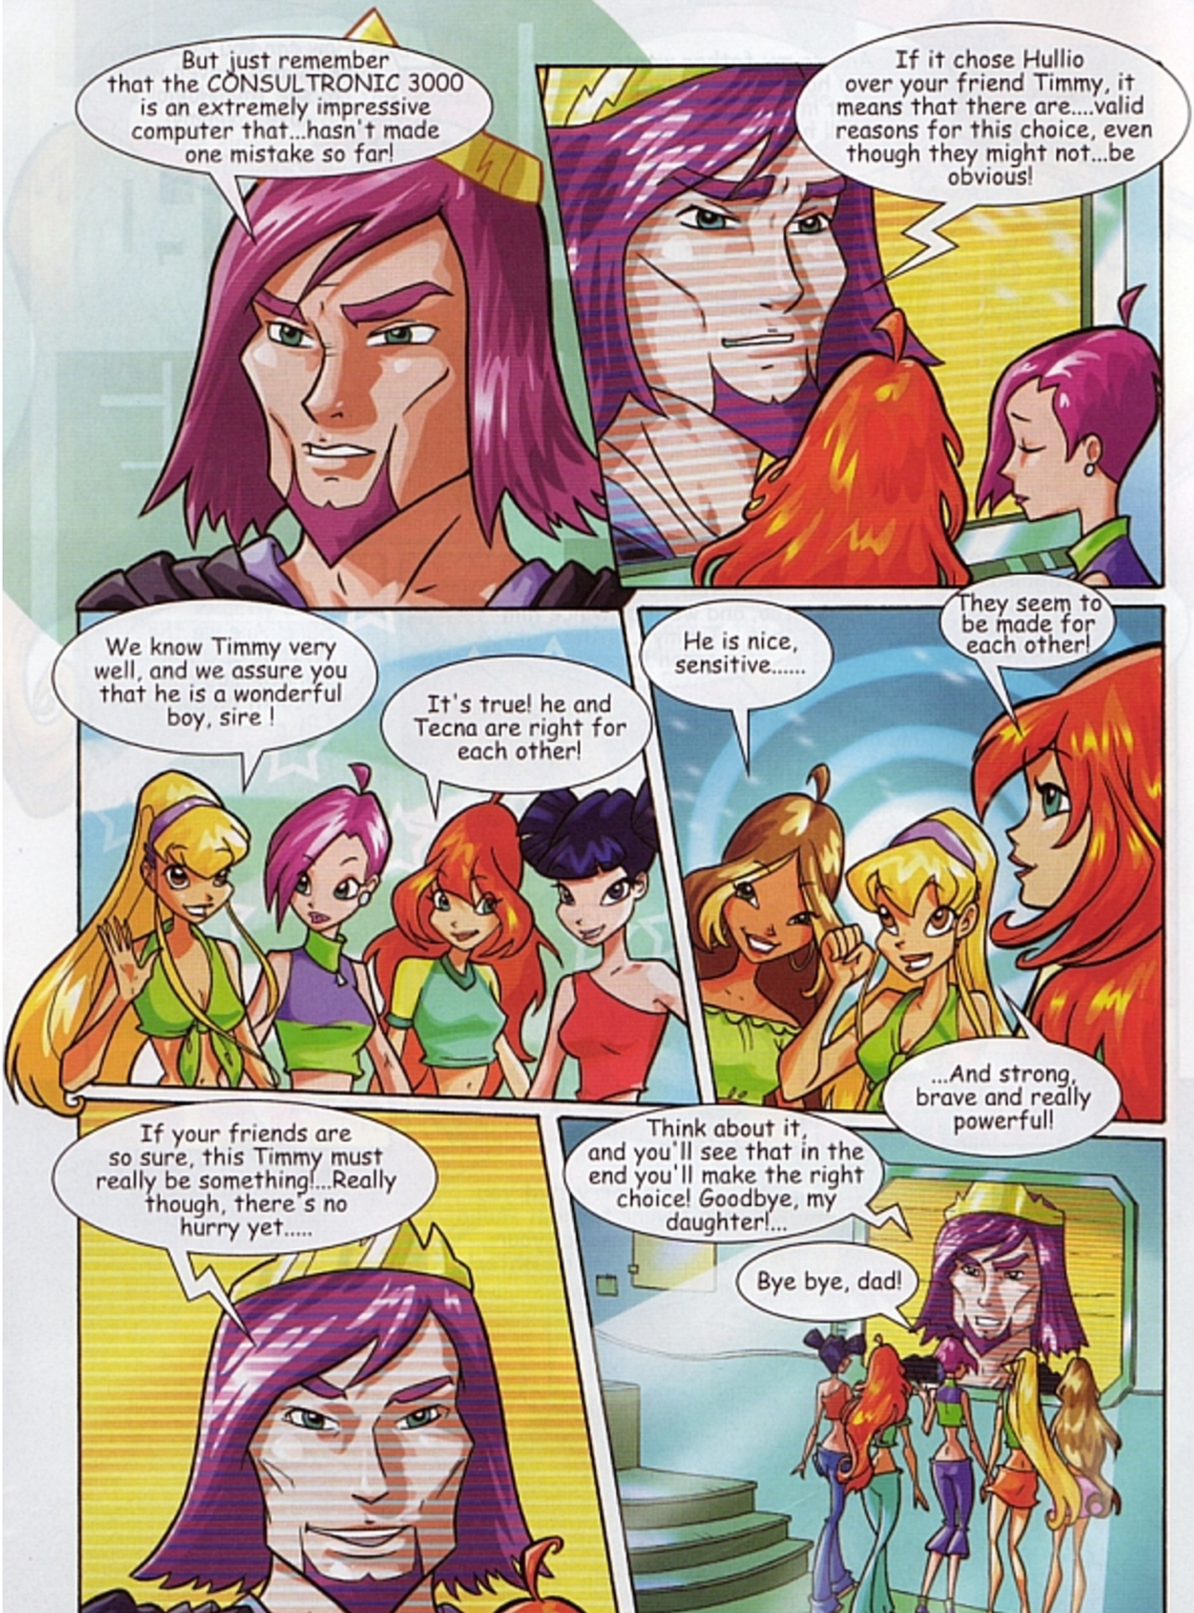
Whose counselor?
My father, the king's counselor of course! Do I or don't I come from the TECHNOLOGY kingdom?
Computers are very common in our kingdom... everyone has a few...and obviously the are used for work, study, communication...
.So it was quite normal that my father decided to assemble a computer to...help him run the kingdom !
Help him in what way?
Have you any idea of the amount of things a king has to know? The citizens' requirements....the law....the stock exchange....problems with the economy! Nobody could possibly keep up with everything....
And so your father has put everything into CONSULTRONIC 3000 and lets it... do everything!
Exactly! Although it's not as if it.... does everything!



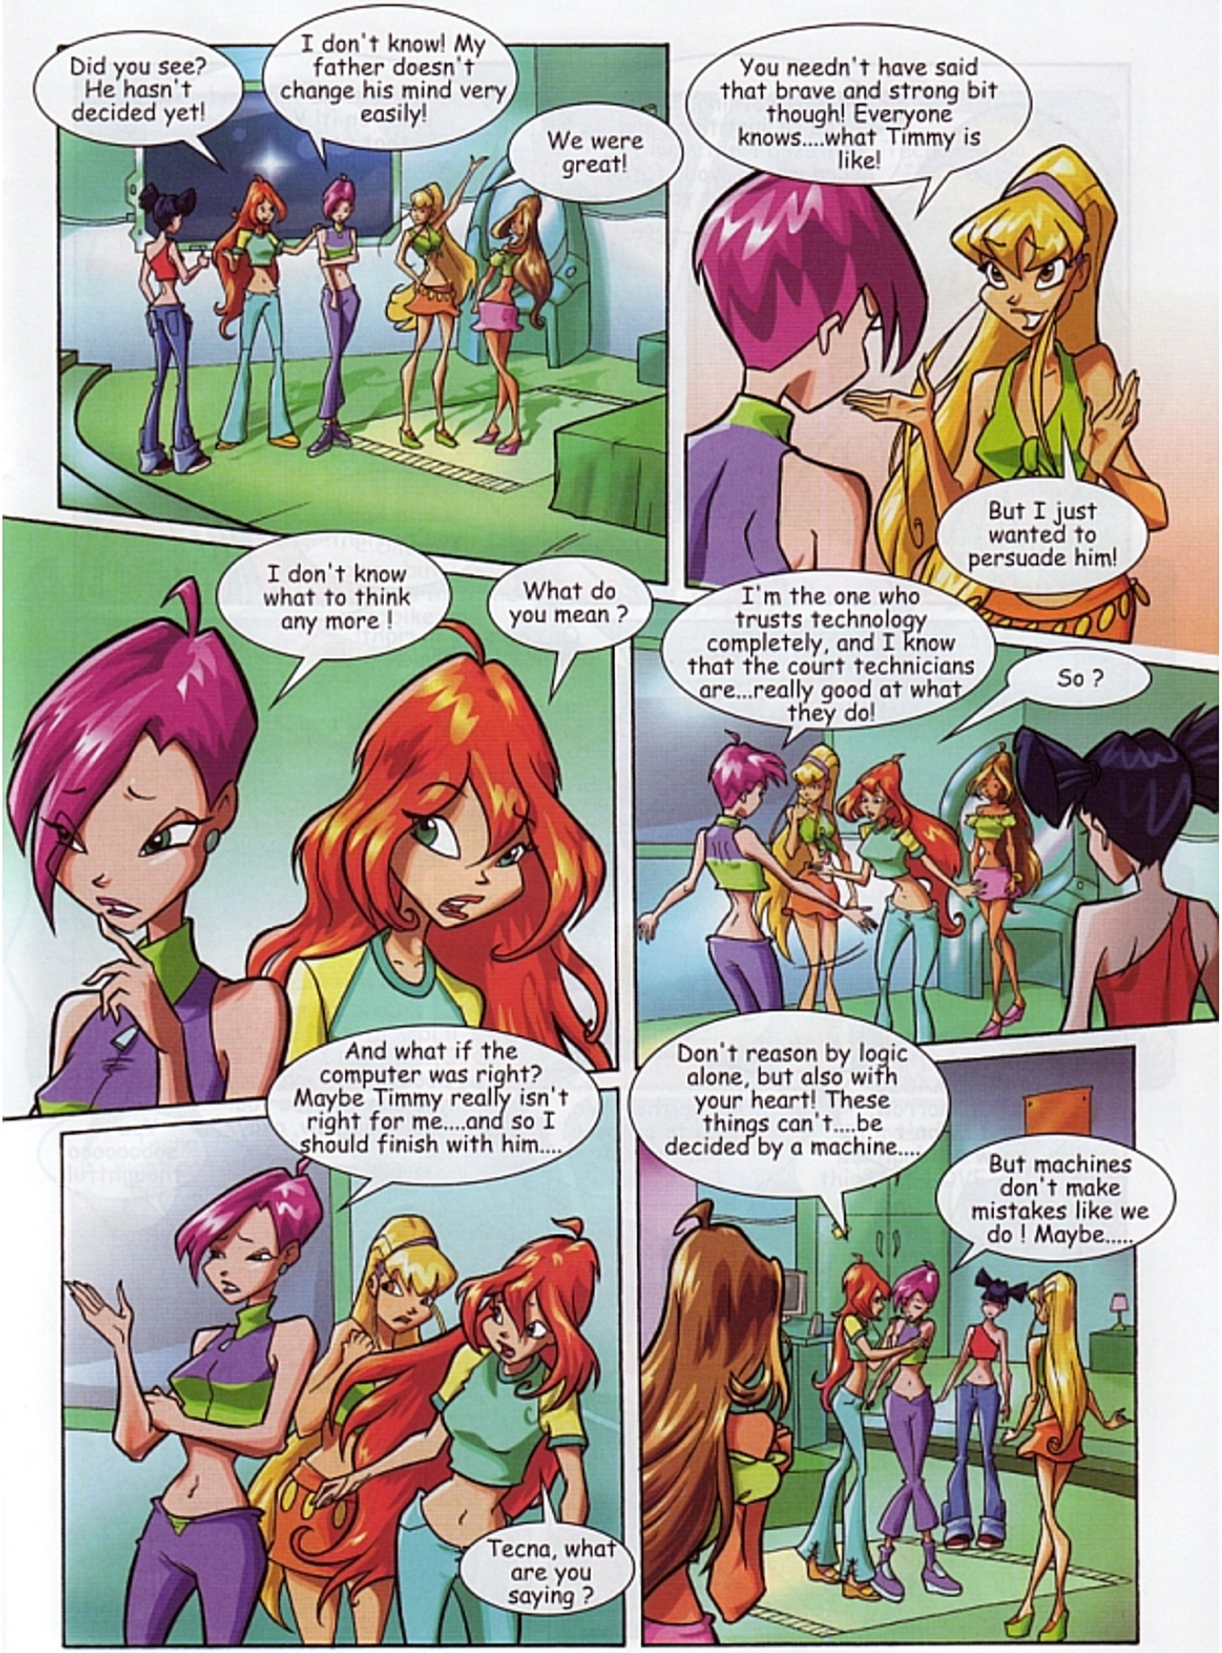
My physical and emotional make up... Timmy's...and all the people I know...in addition to ...the kingdom's requirements... and the political implications .. naturally!
It is really very complicated to decide what's best to do...
what better than a ...computer to assess the situation accurately and fairly ?
"So my father asked the CONSULTRONIC 3000 and the computer gave ...the answer in exactly 322 NANOSECONDS"
Here is the verdict your majesty!
The best partner for my daughter Tecna is your son Hullio, Baron Pricezio!
I am greatly honored your majesty !
If your daughter accepts, the union of our two families will make the kingdom stronger and more prosperous!
Emmmm! We'll see!



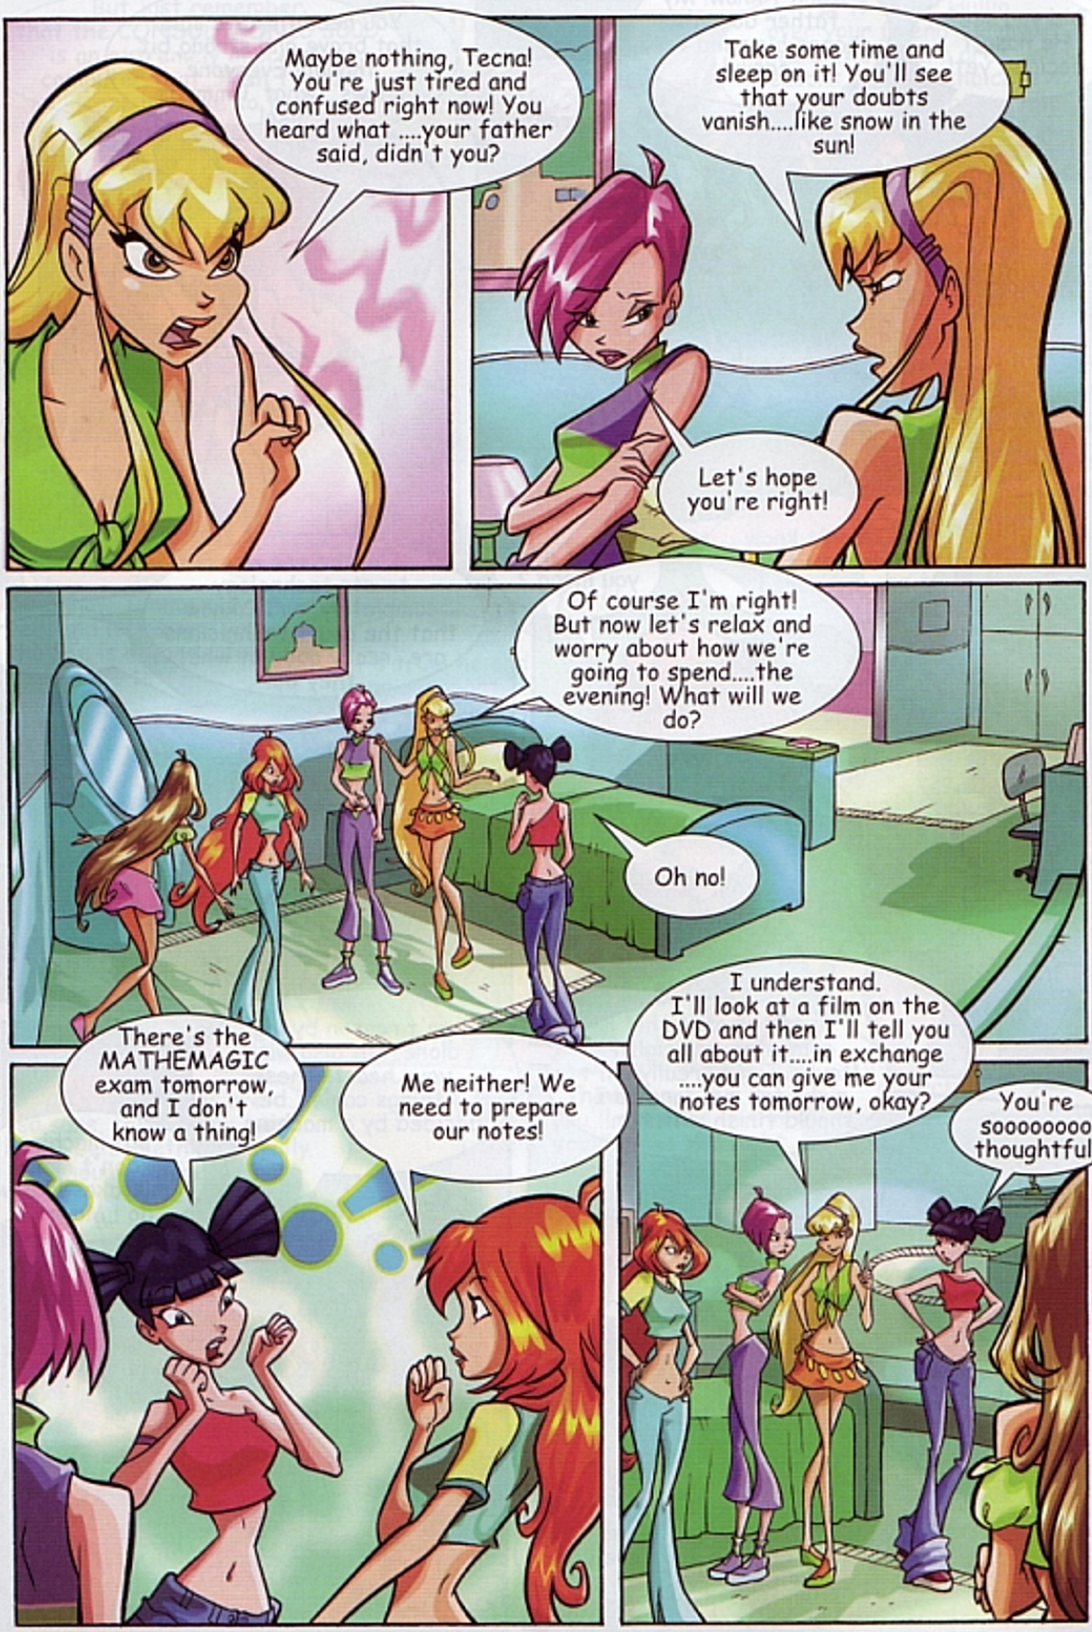
And so my father wants me to go home next weekend...so I can meet my future husband, and tell him what I think!
And what do you think?
How can you even ask me? I don't even want to see this Hullio! I love....Timmy!
That's just what I wanted to say!
I'm not going home! I'll tell my folks that I'm the one who'll decide who I'll marry!
That's my girl !
We'll talk to your father too, and we'll convince him that ...Timmy ...is the right person for you!
Will you really do that ?
Sure! Are we the WINX CLUB or what!? You can count on us!
... I am sorry that you don't want to meet Hullio, but I respect your decision.....my daughter!



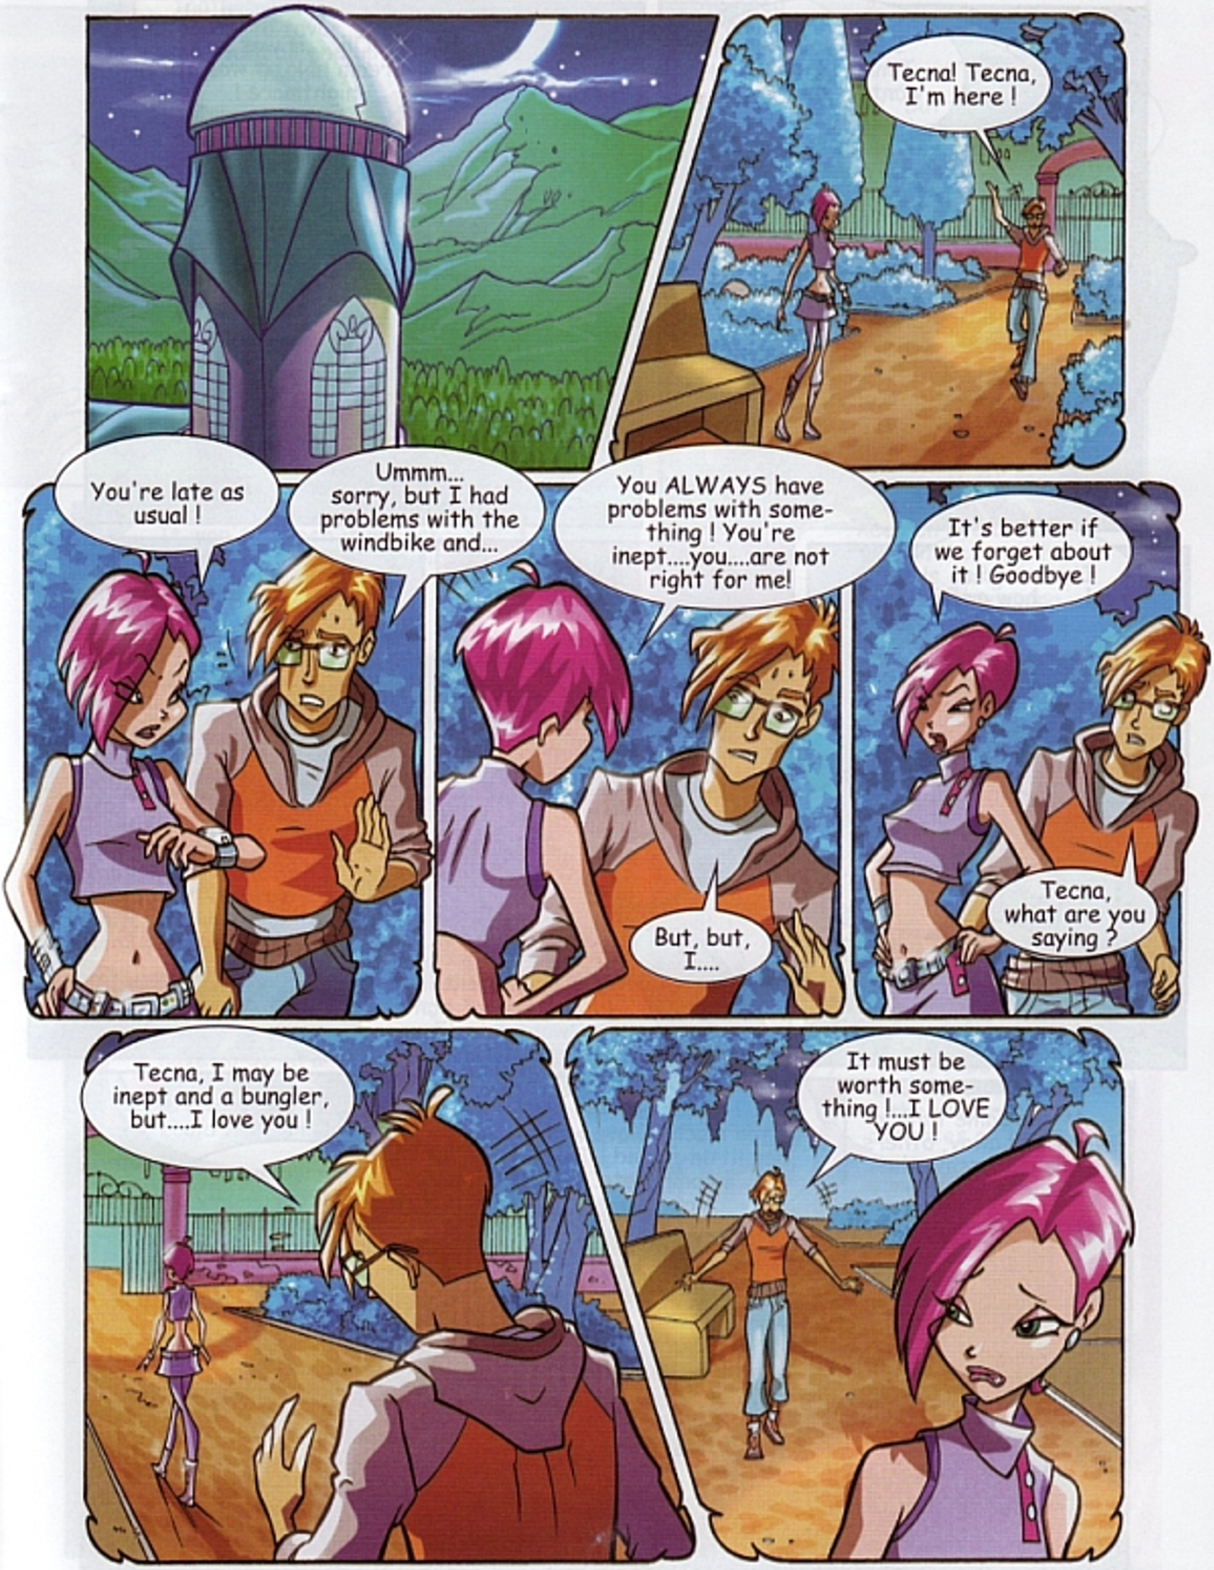
But just remember that the CONSULTRONIC 3000 is an extremely impressive computer that...hasn't made one mistake so far!
If it chose Hullio over your friend Timmy, it means that there are....valid reasons for this choice, even though they might not...be obvious!
We know Timmy very well, and we assure you that he is a wonderful boy, sire !
It's true! he and Tecna are right for each other!
He is nice, sensitive......
They seem to be made for each other!
...And strong, brave and really powerful!
If your friends are so sure, this Timmy must really be something!...Really though, there's no hurry yet.....
Think about it, and you'll see that in the end you'll make the right choice! Goodbye, my daughter!...
Bye bye, dad!



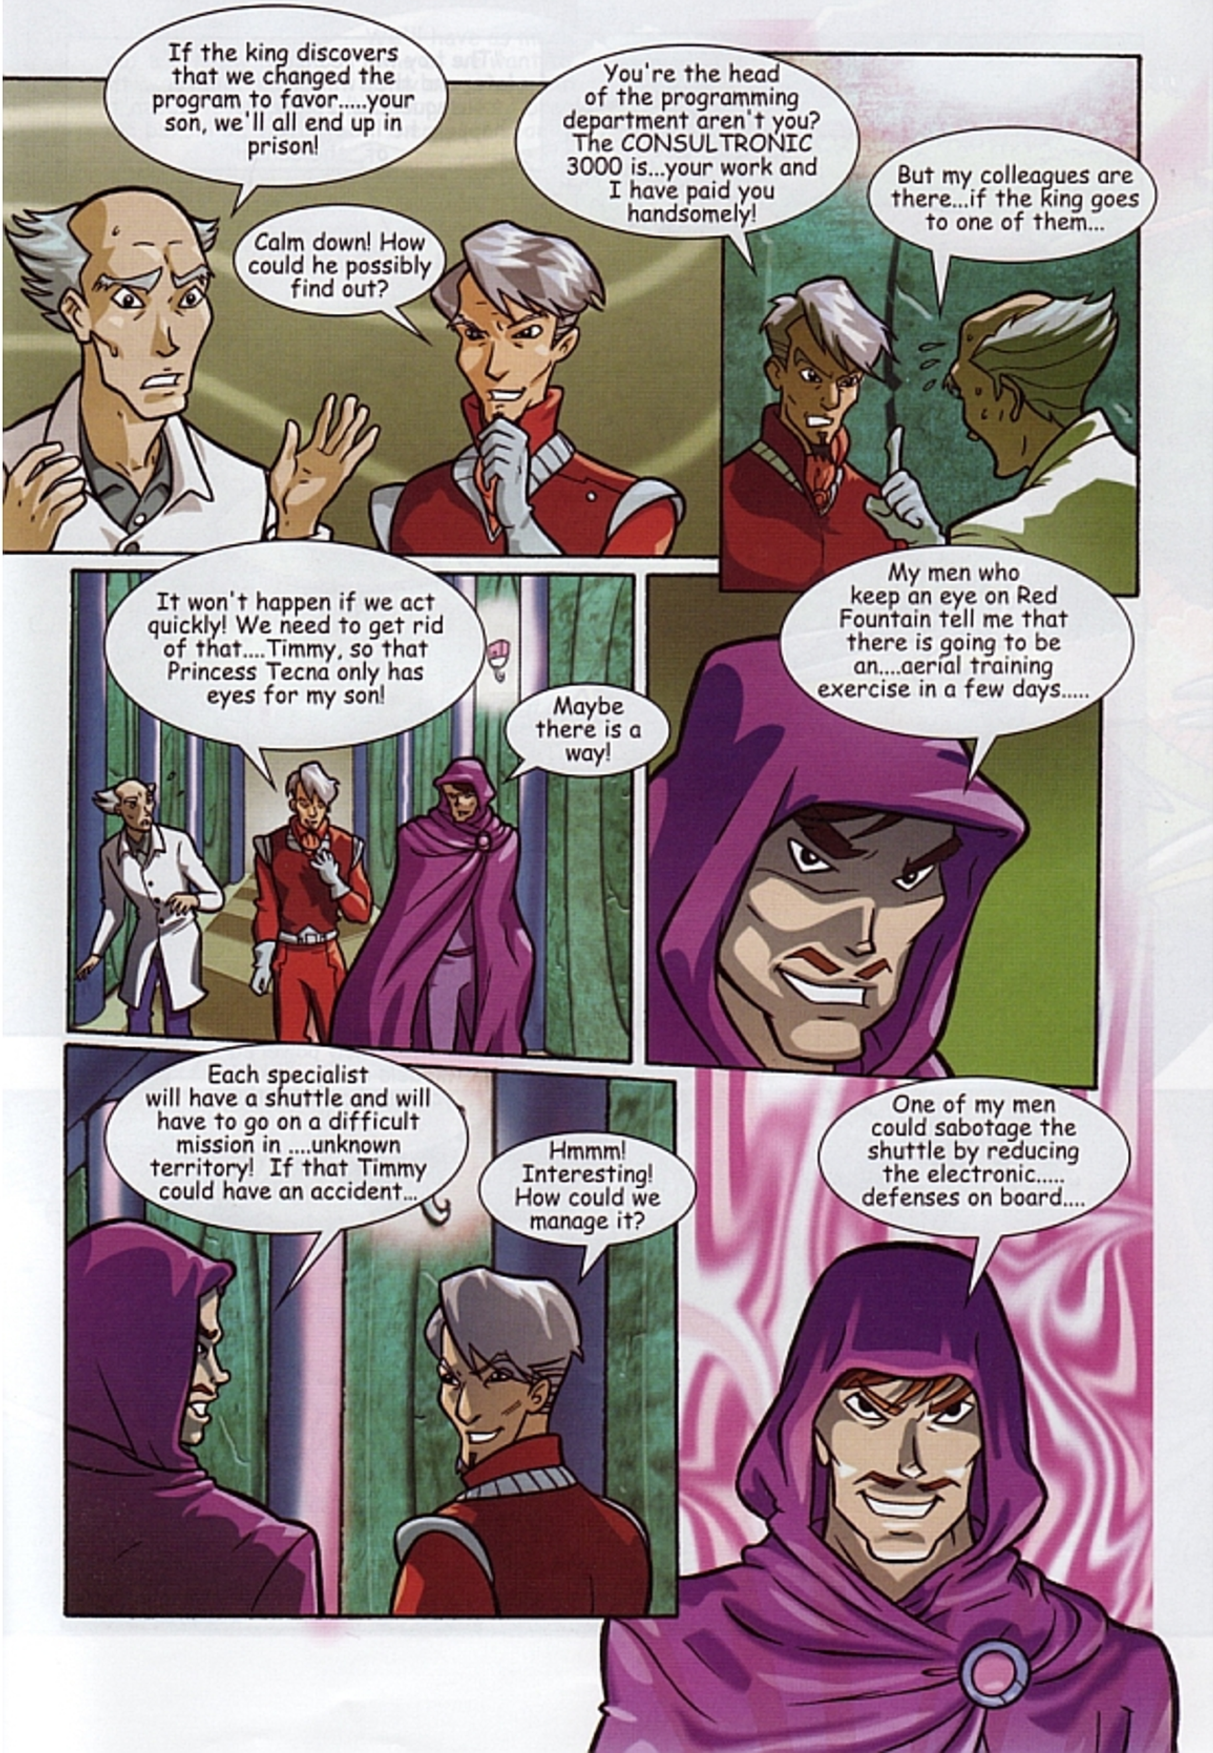
Did you see? He hasn't decided yet!
I don't know! My father doesn't change his mind very easily!
We were great!
You needn't have said that brave and strong bit though! Everyone knows....what Timmy is like!
But I just wanted to persuade him!
I don't know what to think any more !
What do you mean ?
I'm the one who trusts technology completely, and I know that the court technicians are...really good at what they do!
So ?
And what if the computer was right? Maybe Timmy really isn't right for me....and so I should finish with him....
Tecna, what are you saying ?
Don't reason by logic alone, but also with your heart! These things can't....be decided by a machine....
But machines don't make mistakes like we do ! Maybe.....



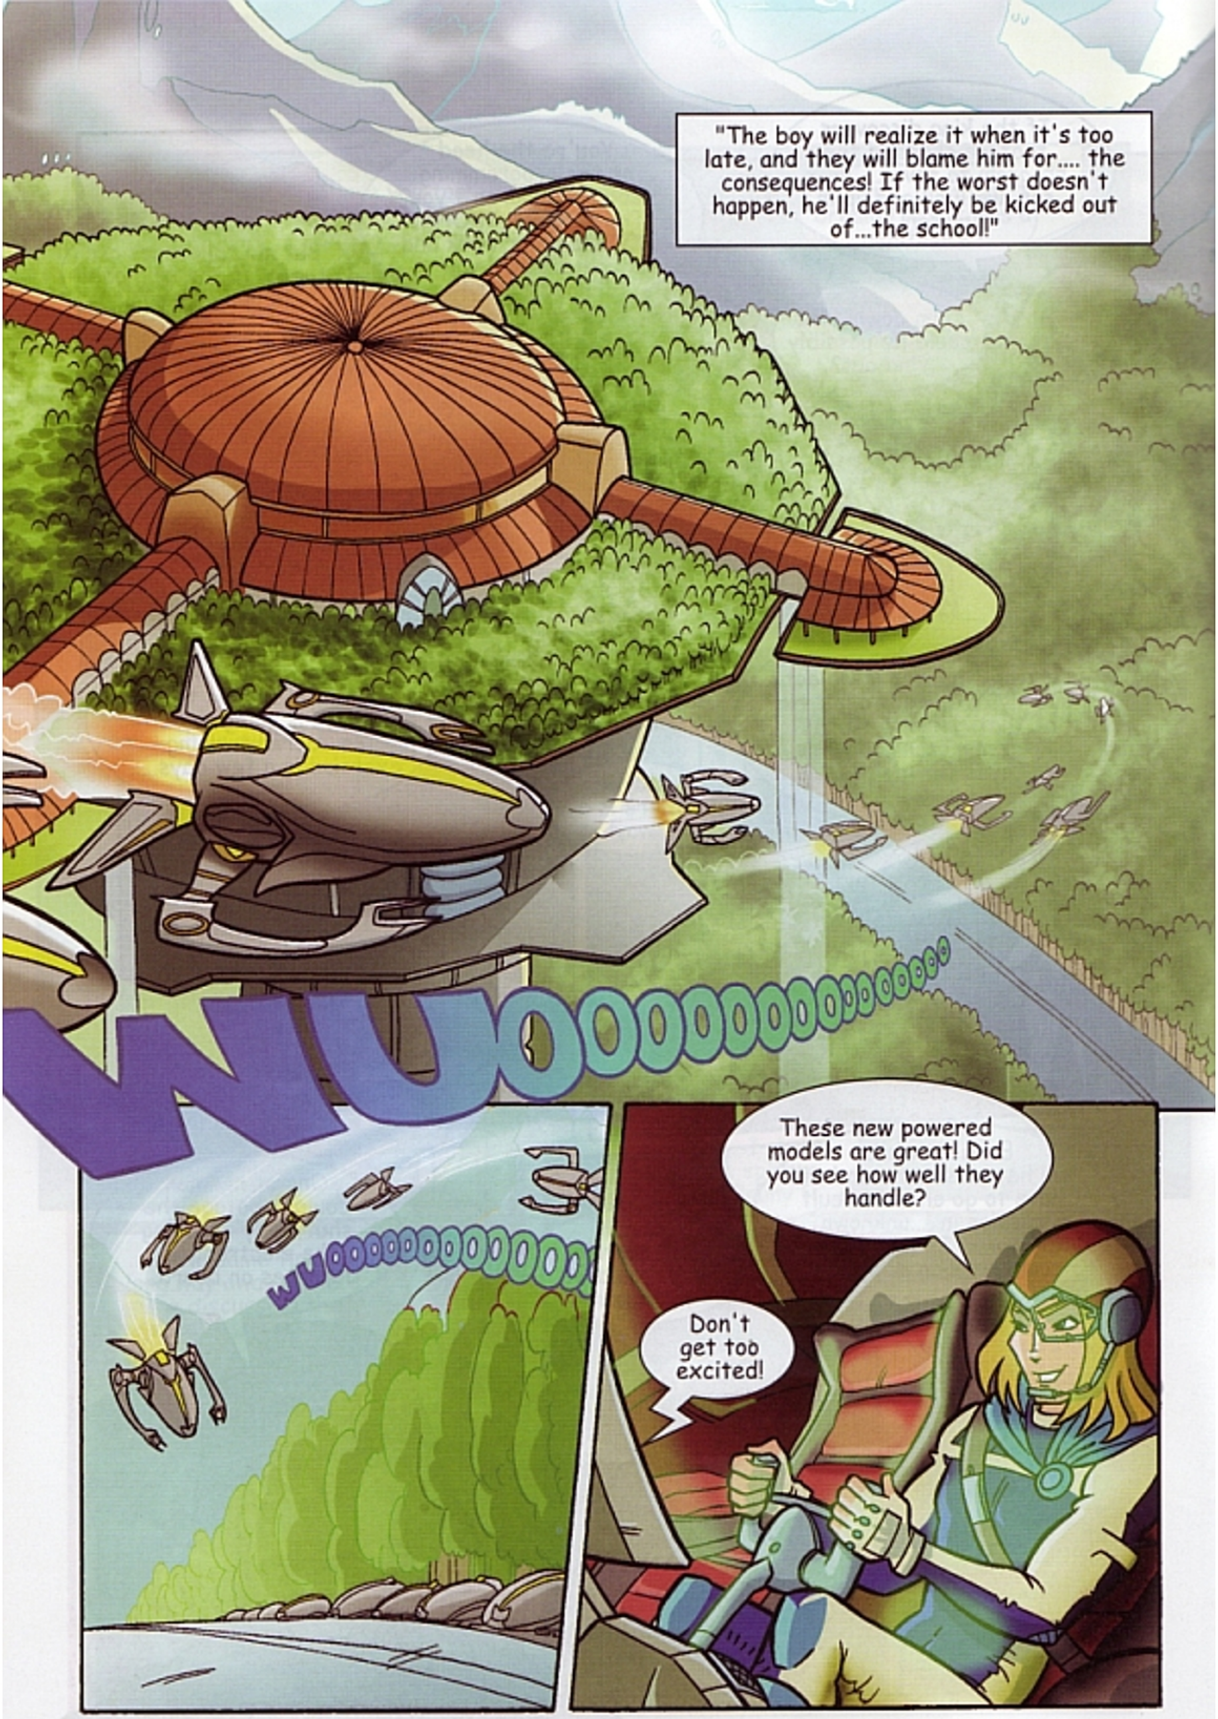
Maybe nothing, Tecna! You're just tired and confused right now! You heard what ....your father said, didn't you?
Take some time and sleep on it! You'll see that your doubts vanish....like snow in the sun!
Let's hope you're right!
Of course I'm right! But now let's relax and worry about how we're going to spend....the evening! What will we do?
Oh no!
There's the MATHEMAGIC exam tomorrow, and I don't know a thing!
Me neither! We need to prepare our notes!
I understand. I'll look at a film on the DVD and then I'll tell you all about it....in exchange ....you can give me your notes tomorrow, okay?
You're sooooooooo thoughtful!



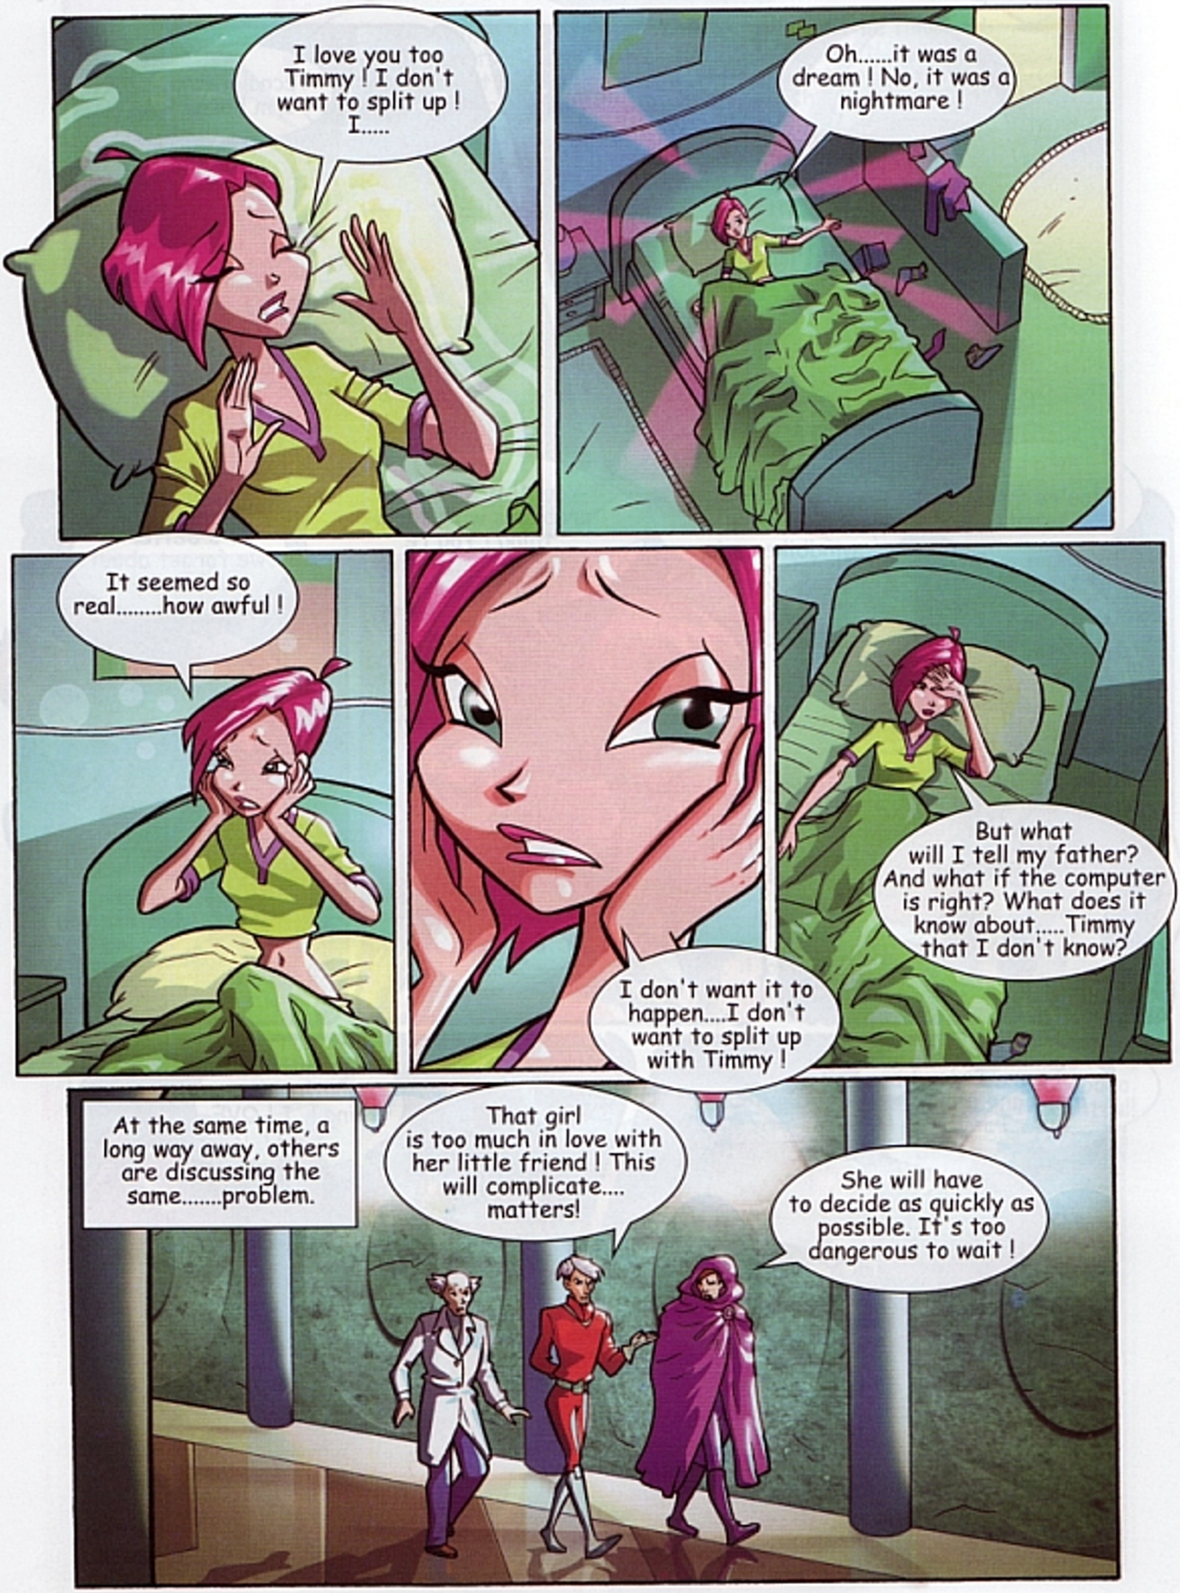
Tecna! Tecna, I'm here !
You're late as usual !
Ummm... sorry, but I had problems with the windbike and...
You ALWAYS have problems with something ! You're inept....you....are not right for me!
But, but, I....
It's better if we forget about it ! Goodbye !
Tecna, what are you saying ?
Tecna, I may be inept and a bungler, but....I love you !
It must be worth something !...I LOVE YOU !



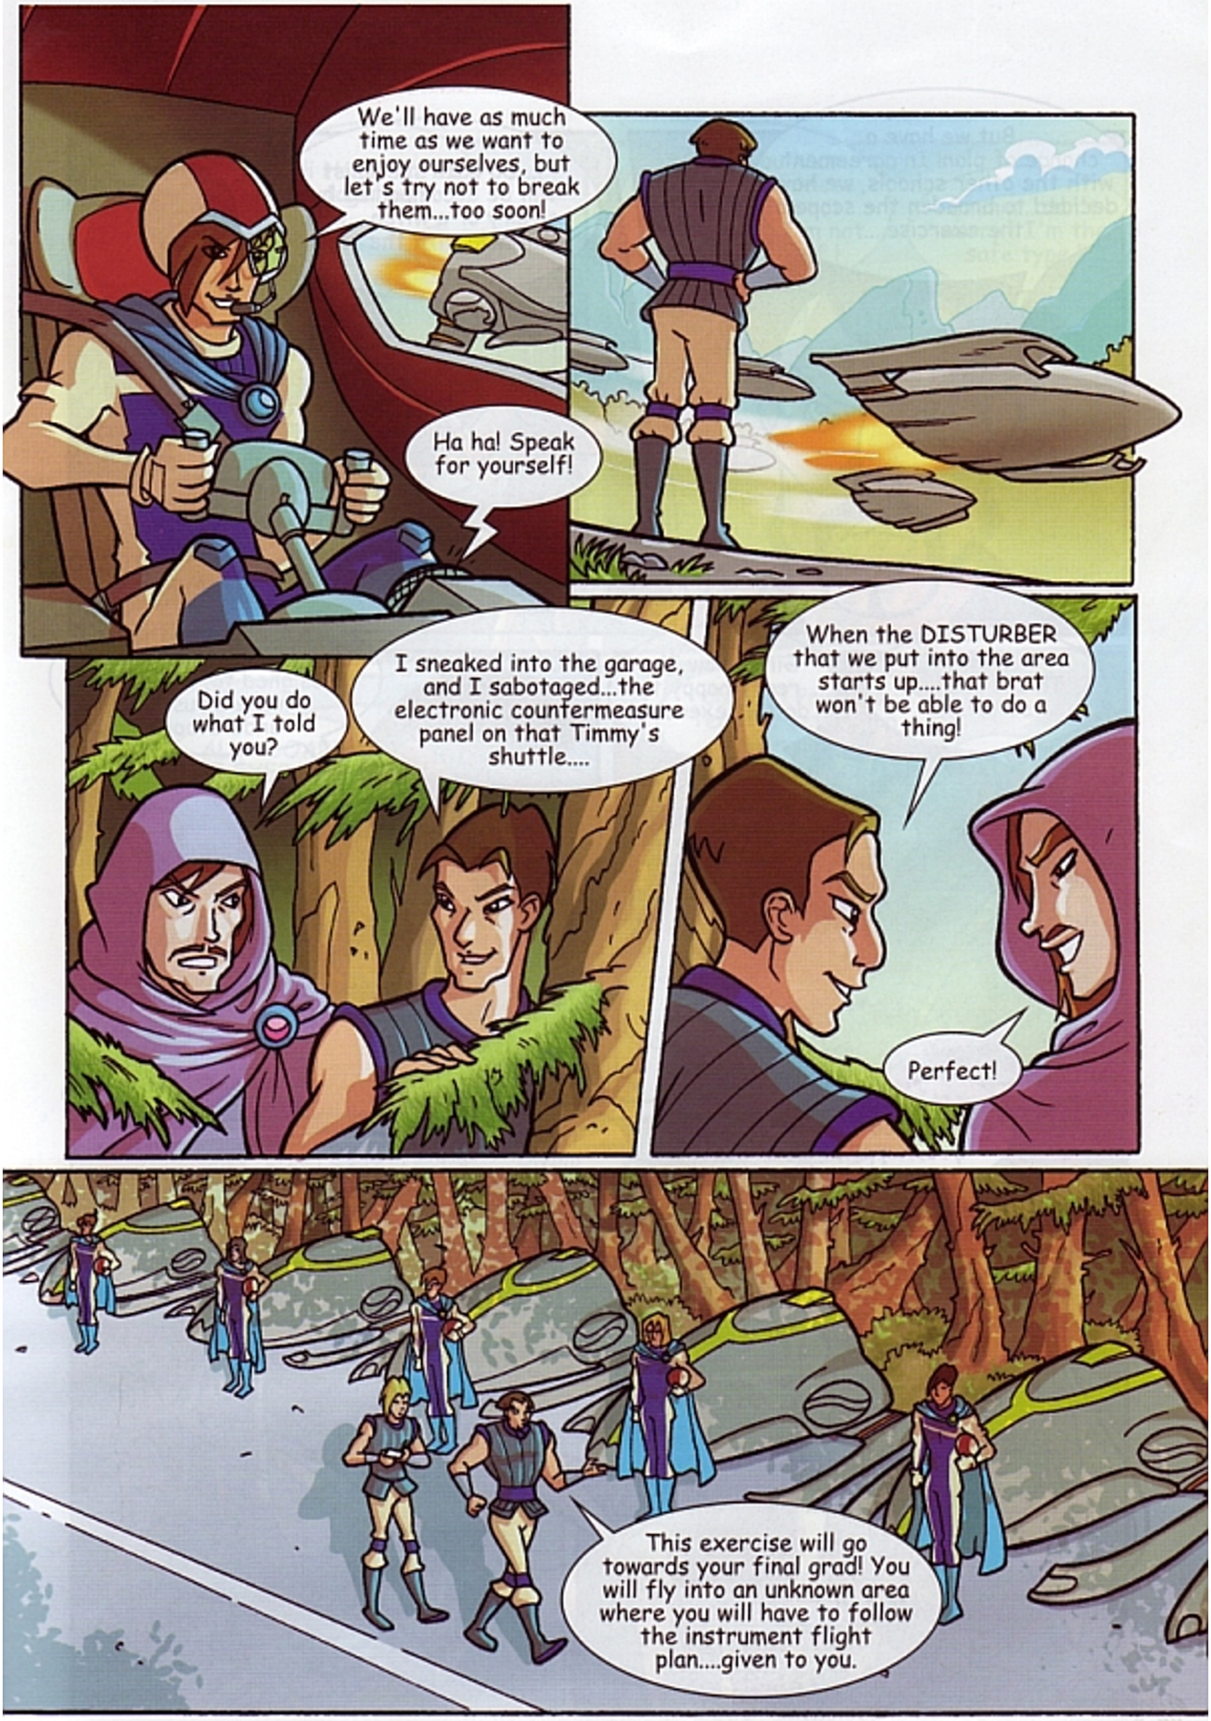
If the king discovers that we changed the program to favor.....your son, we'll all end up in prison!
Calm down! How could he possibly find out?
You're the head of the programming department aren't you? The CONSULTRONIC 3000 is...your work and I have paid you handsomely!
But my colleagues are there...if the king goes to one of them...
It won't happen if we act quickly! We need to get rid of that....Timmy, so that Princess Tecna only has eyes for my son!
Maybe there is a way!
My men who keep an eye on Red Fountain tell me that there is going to be an....aerial training exercise in a few days.....
Each specialist will have a shuttle and will have to go on a difficult mission in ....unknown territory! If that Timmy could have an accident...
Hmmm! Interesting! How could we manage it?
One of my men could sabotage the shuttle by reducing the electronic..... defenses on board....



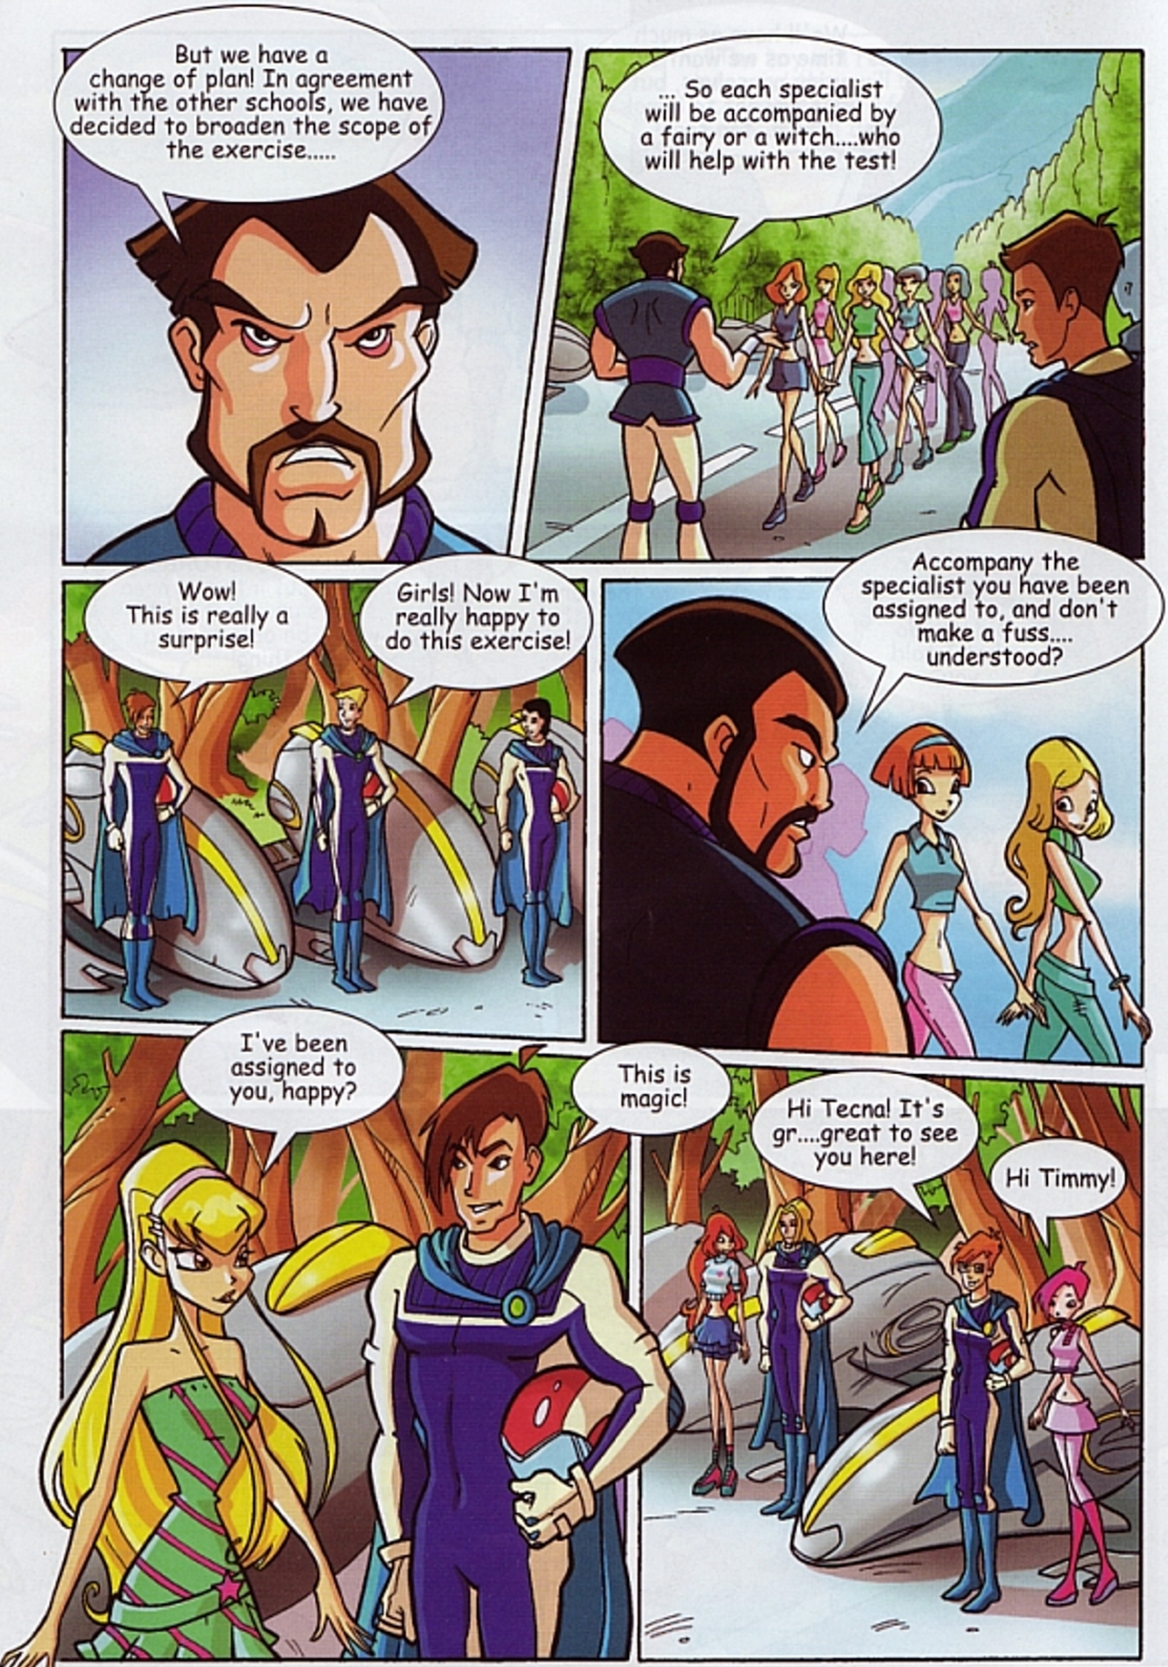
"The boy will realize it when it's too late, and they will blame him for.... the consequences! If the worst doesn't happen, he'll definitely be kicked out of...the school!"
WUOOOOOOOOOOOOOOOOOO
WUOOOOOOOOOOOOOOO
These new powered models are great! Did you see how well they handle?
Don't get too excited!



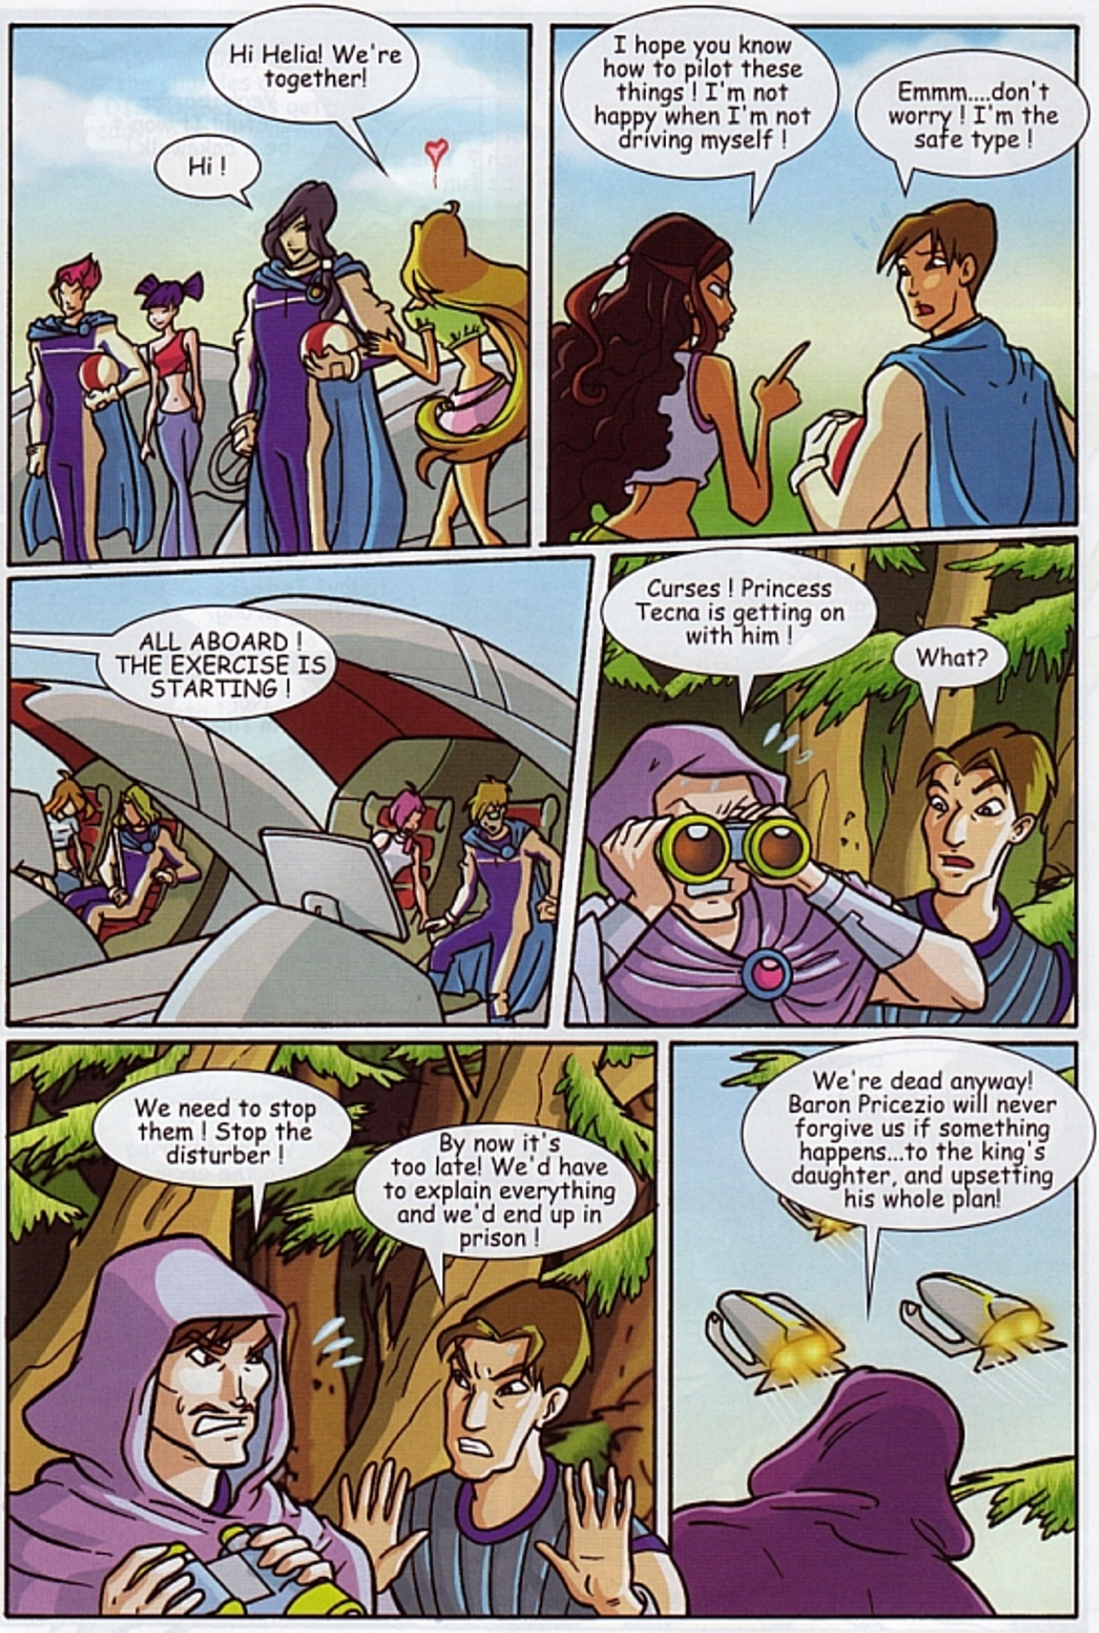
I love you too Timmy ! I don't want to split up ! I.....
Oh......it was a dream ! No, it was a nightmare !
It seemed so real........how awful !
I don't want it to happen....I don't want to split up with Timmy !
But what will I tell my father? And what if the computer is right? What does it know about.....Timmy that I don't know?
At the same time, a long way away, others are discussing the same.......problem.
That girl is too much in love with her little friend ! This will complicate.... matters!
She will have to decide as quickly as possible. It's too dangerous to wait !



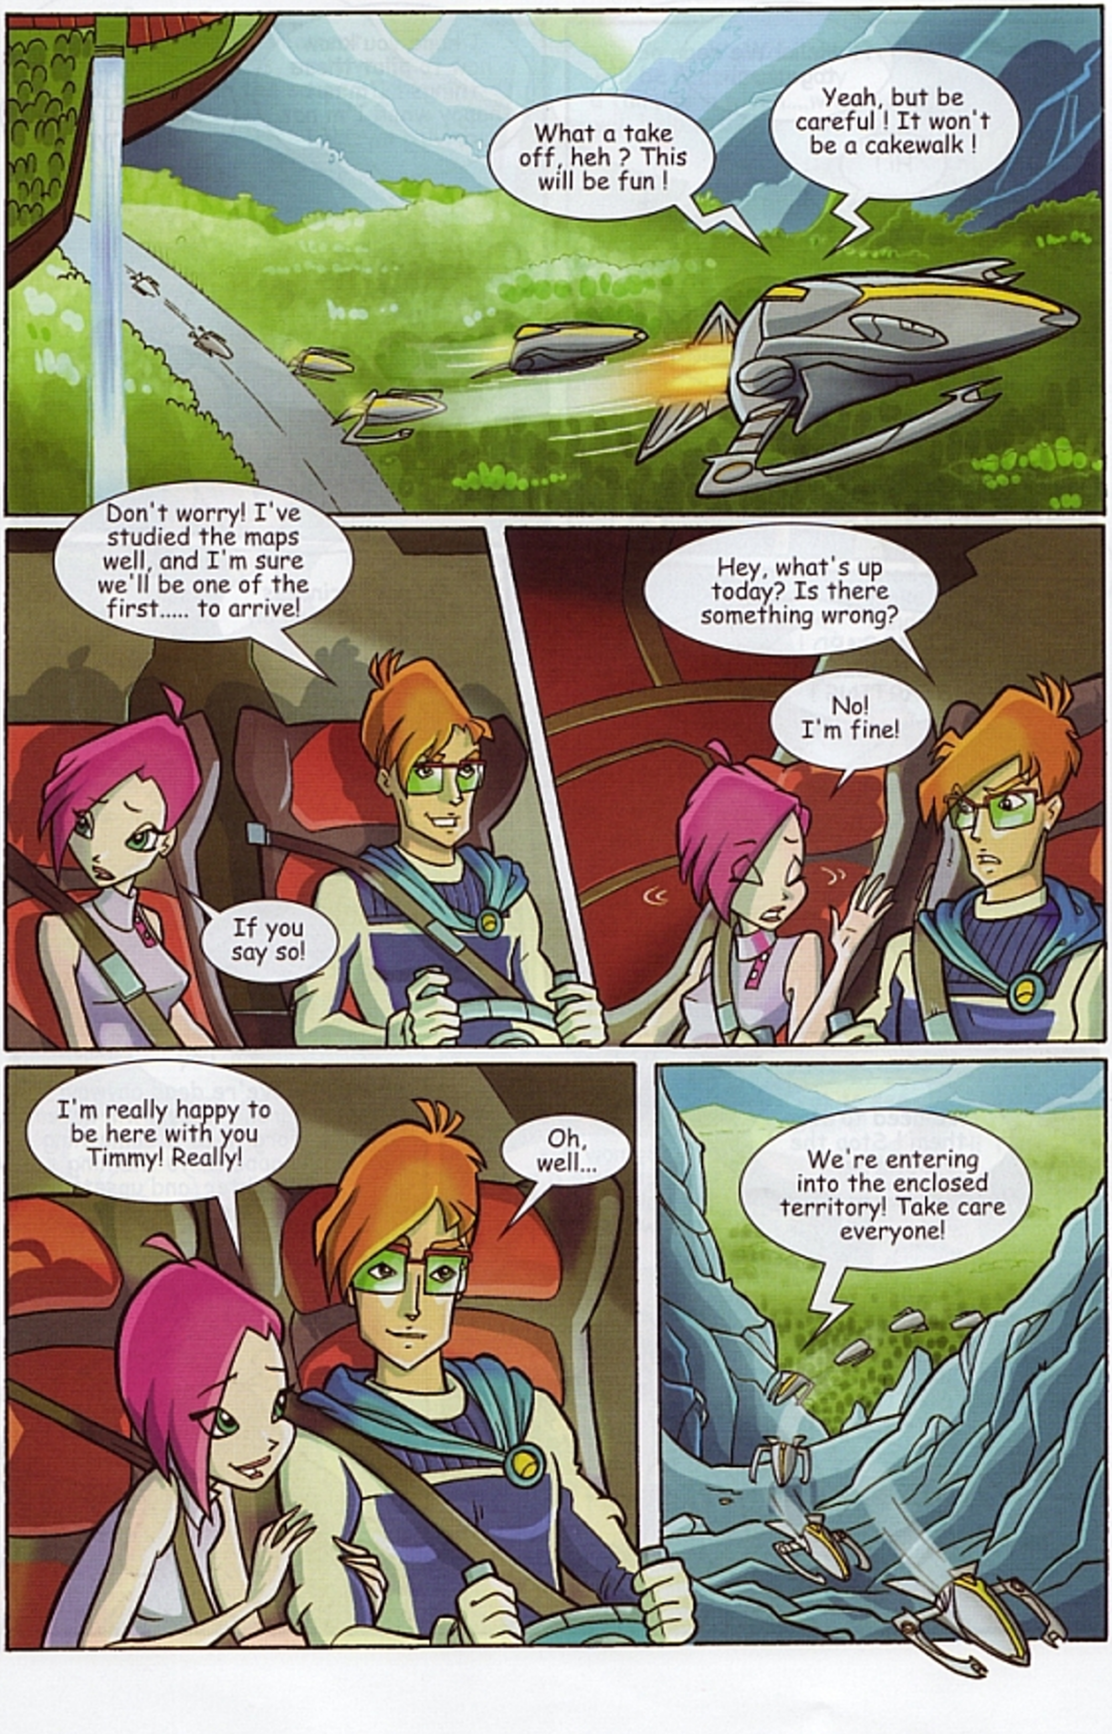
We'll have as much time as we want to enjoy ourselves, but let's try not to break them...too soon!
Ha ha! Speak for yourself!
Did you do what I told you?
I sneaked into the garage, and I sabotaged...the electronic countermeasure panel on that Timmy's shuttle....
When the DISTURBER that we put into the area starts up....that brat won't be able to do a thing!
Perfect!
This exercise will go towards your final grad! You will fly into an unknown area where you will have to follow the instrument flight plan....given to you.



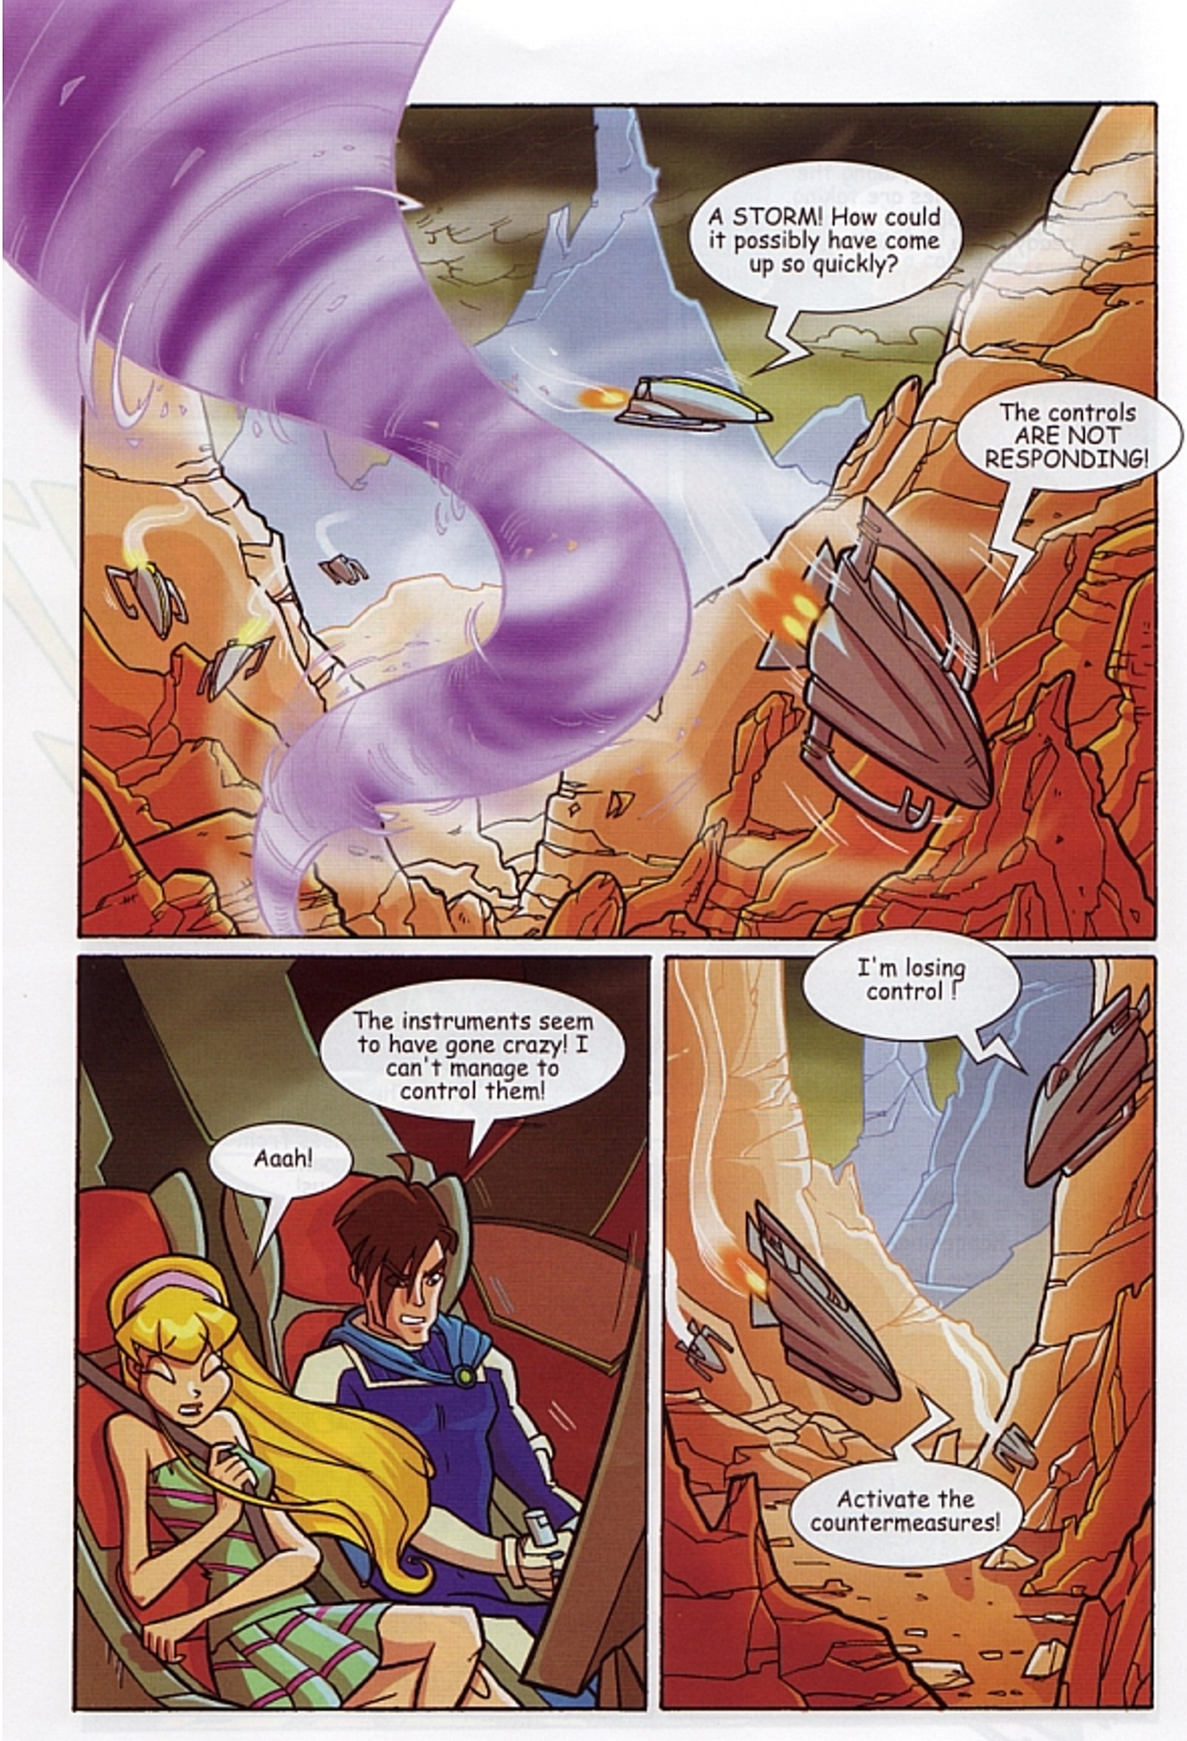
But we have a change of plan! In agreement with the other schools, we have decided to broaden the scope of the exercise.....
... So each specialist will be accompanied by a fairy or a witch....who will help with the test!
Wow! This is really a surprise!
Girls! Now I'm really happy to do this exercise!
Accompany the specialist you have been assigned to, and don't make a fuss.... understood?
I've been assigned to you, happy?
This is magic!
Hi Tecna! It's gr....great to see you here!
Hi Timmy!



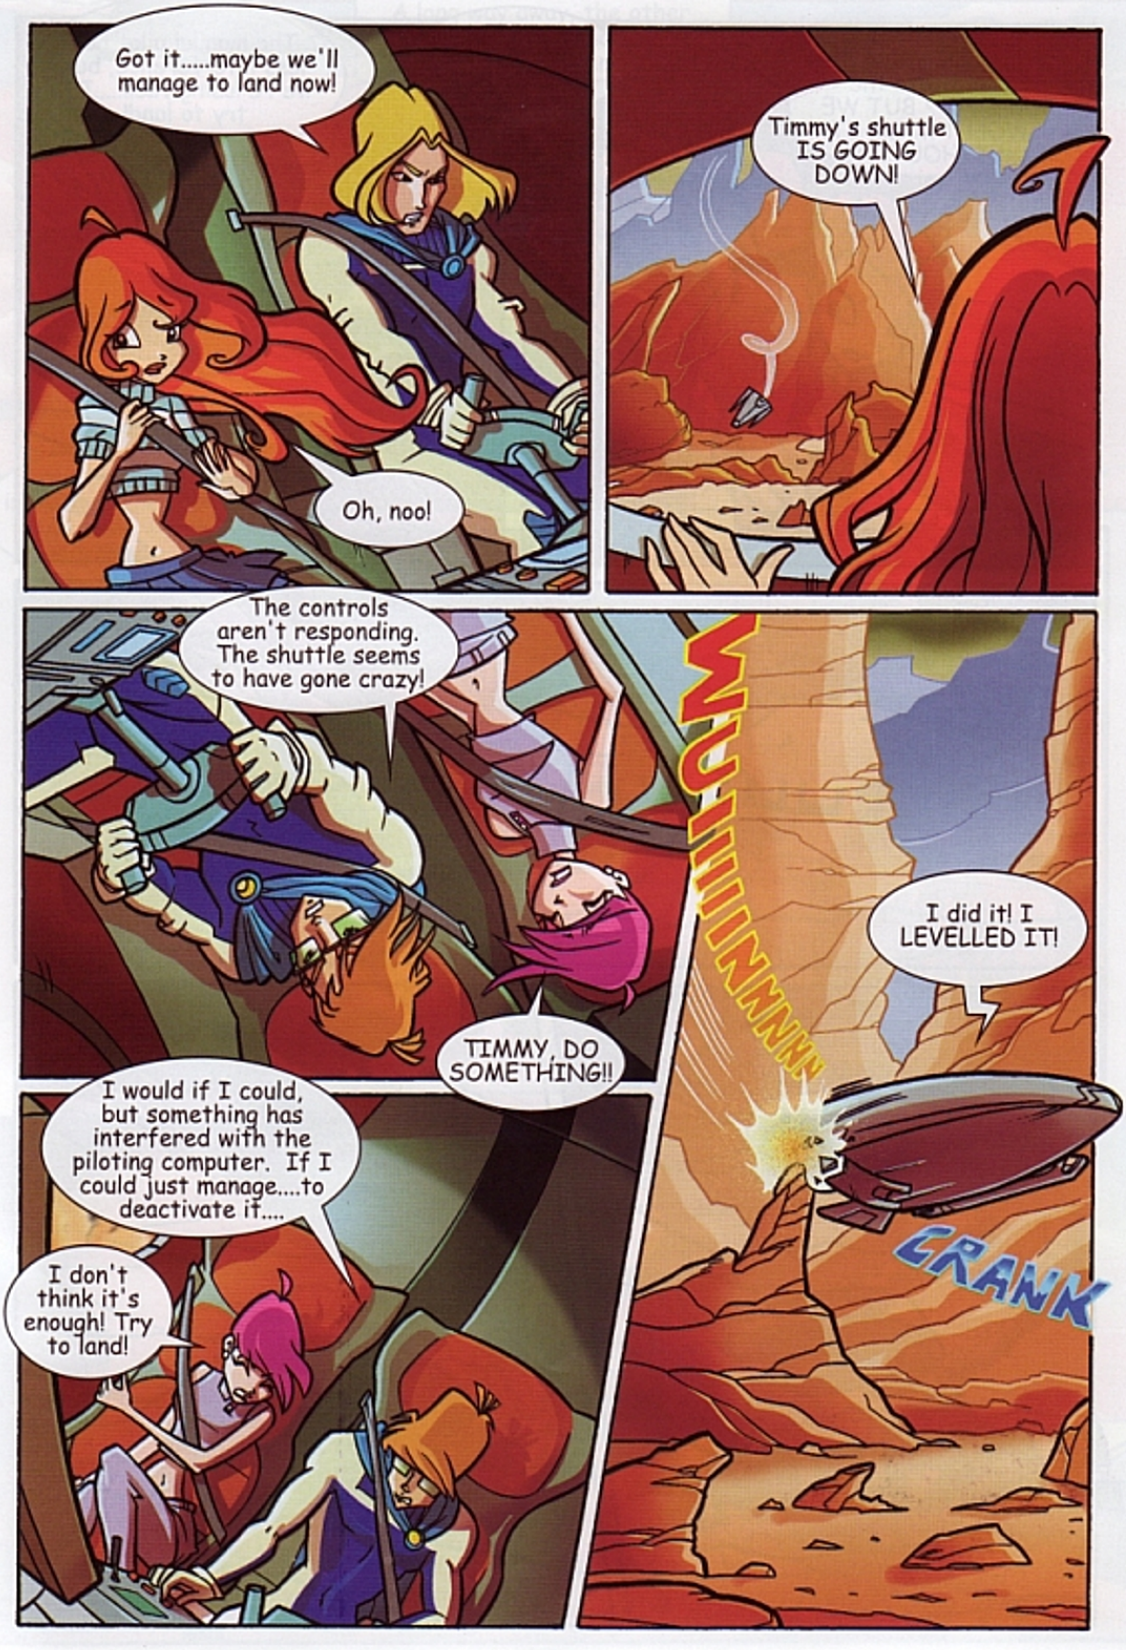
Hi Helia! We're together!
Hi !
I hope you know how to pilot these things ! I'm not happy when I'm not driving myself !
Emmm....don't worry ! I'm the safe type !
ALL ABOARD ! THE EXERCISE IS STARTING !
Curses ! Princess Tecna is getting on with him !
What?
We need to stop them ! Stop the disturber !
By now it's too late! We'd have to explain everything and we'd end up in prison !
We're dead anyway! Baron Pricezio will never forgive us if something happens...to the king's daughter, and upsetting his whole plan!



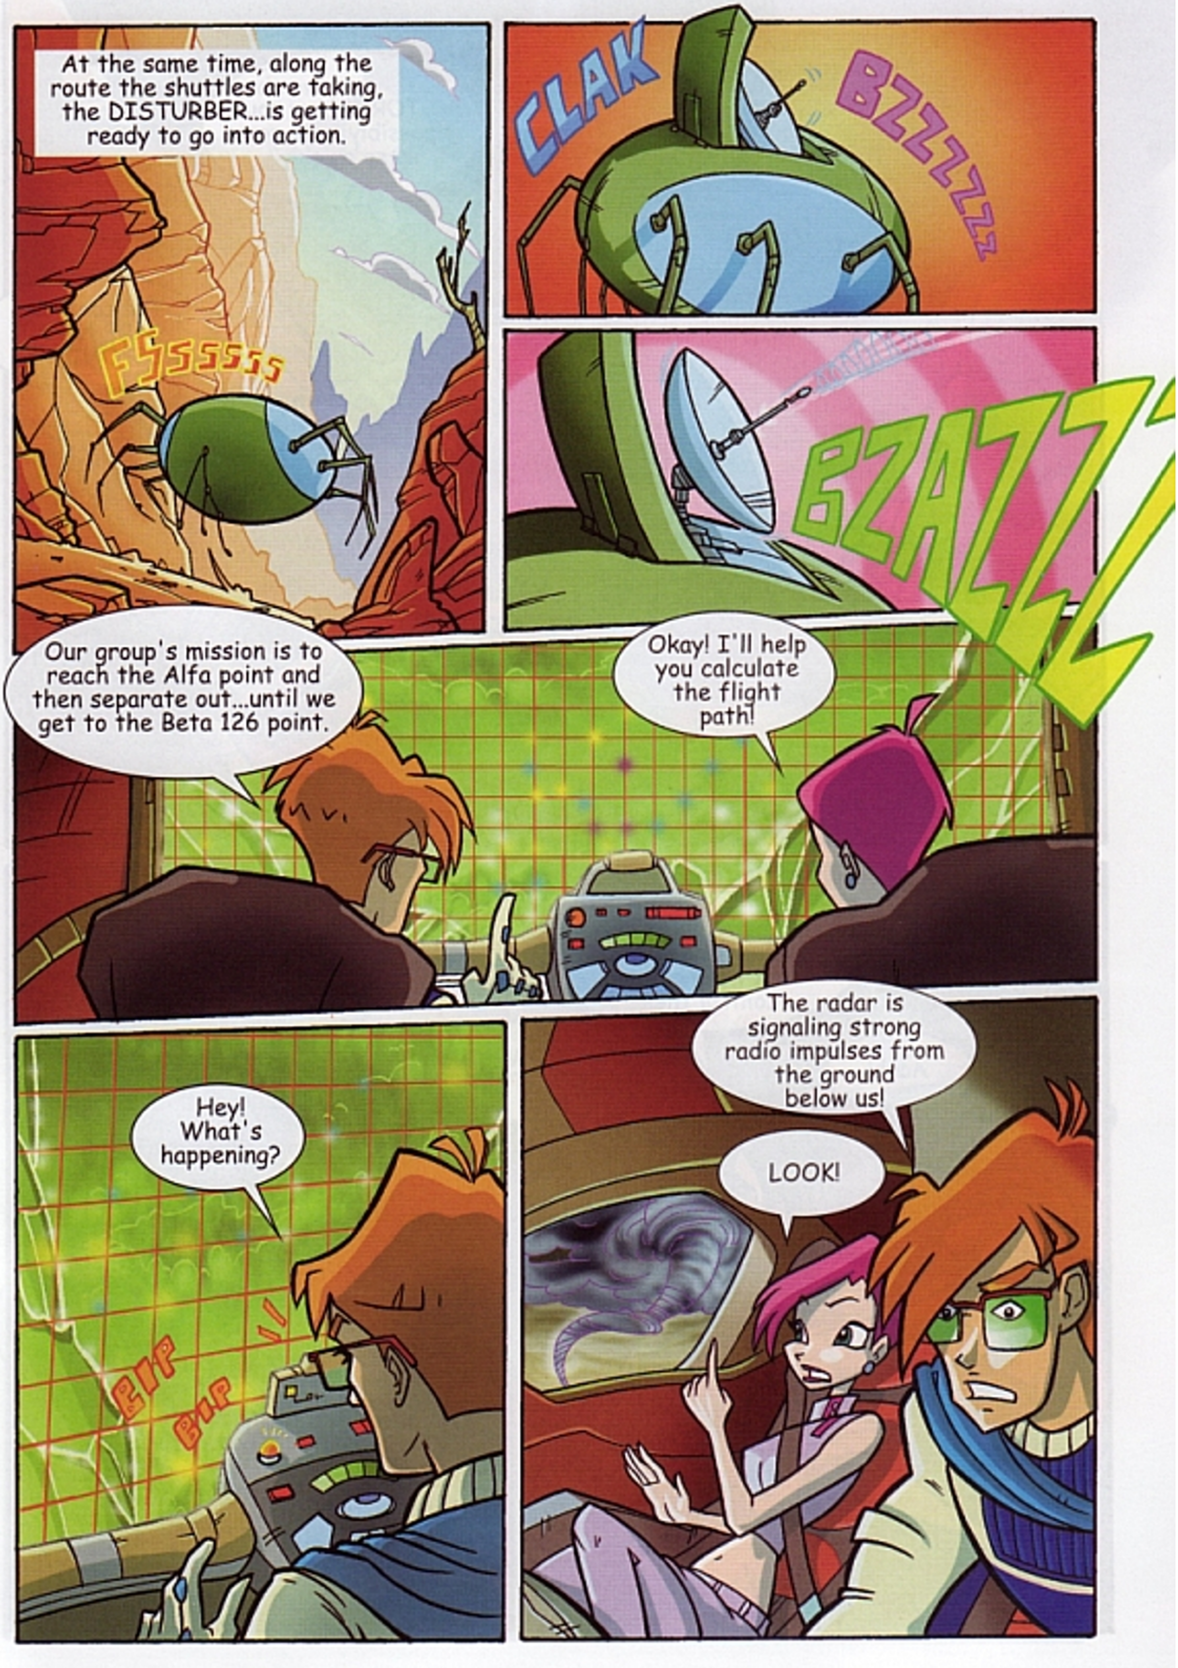
What a take off, heh ? This will be fun !
Yeah, but be careful ! It won't be a cakewalk !
Don't worry! I've studied the maps well, and I'm sure we'll be one of the first..... to arrive!
If you say so!
Hey, what's up today? Is there something wrong?
No! I'm fine!
I'm really happy to be here with you Timmy! Really!
Oh, well...
We're entering into the enclosed territory! Take care everyone!



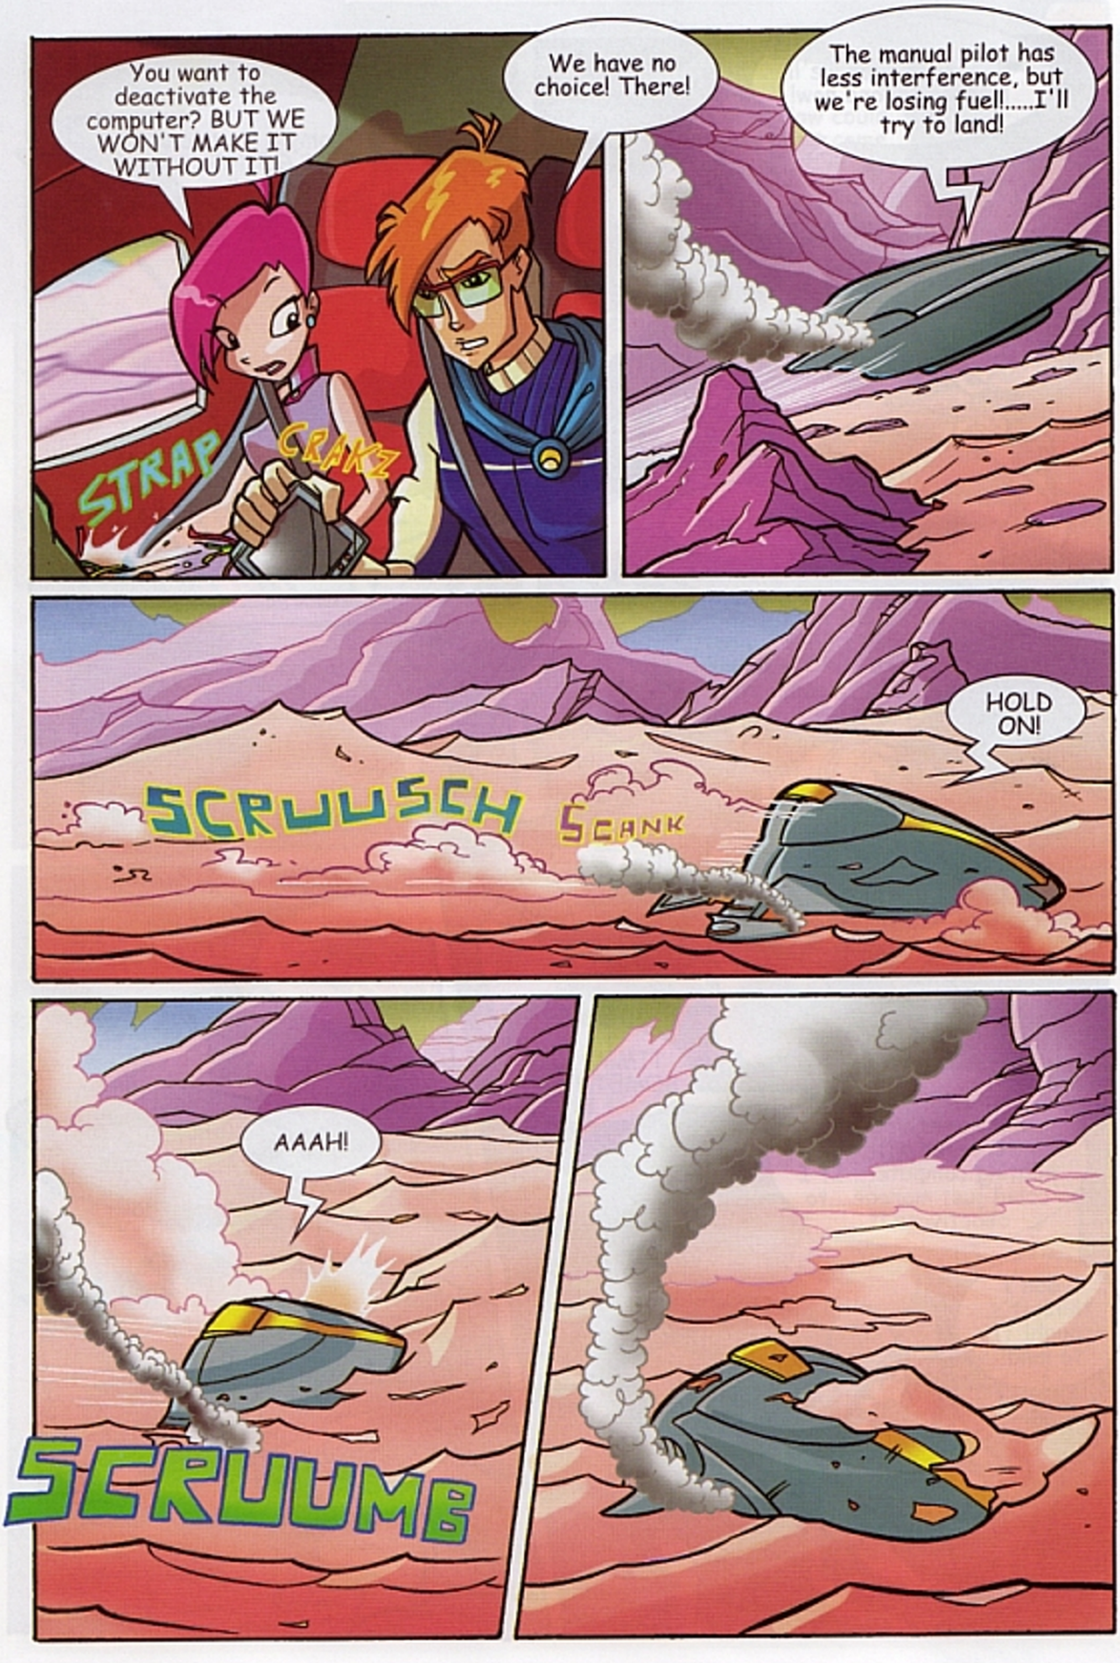
A STORM! How could it possibly have come up so quickly?
The controls ARE NOT RESPONDING!
The instruments seem to have gone crazy! I can't manage to control them!
Aaah!
I'm losing control !
Activate the countermeasures!



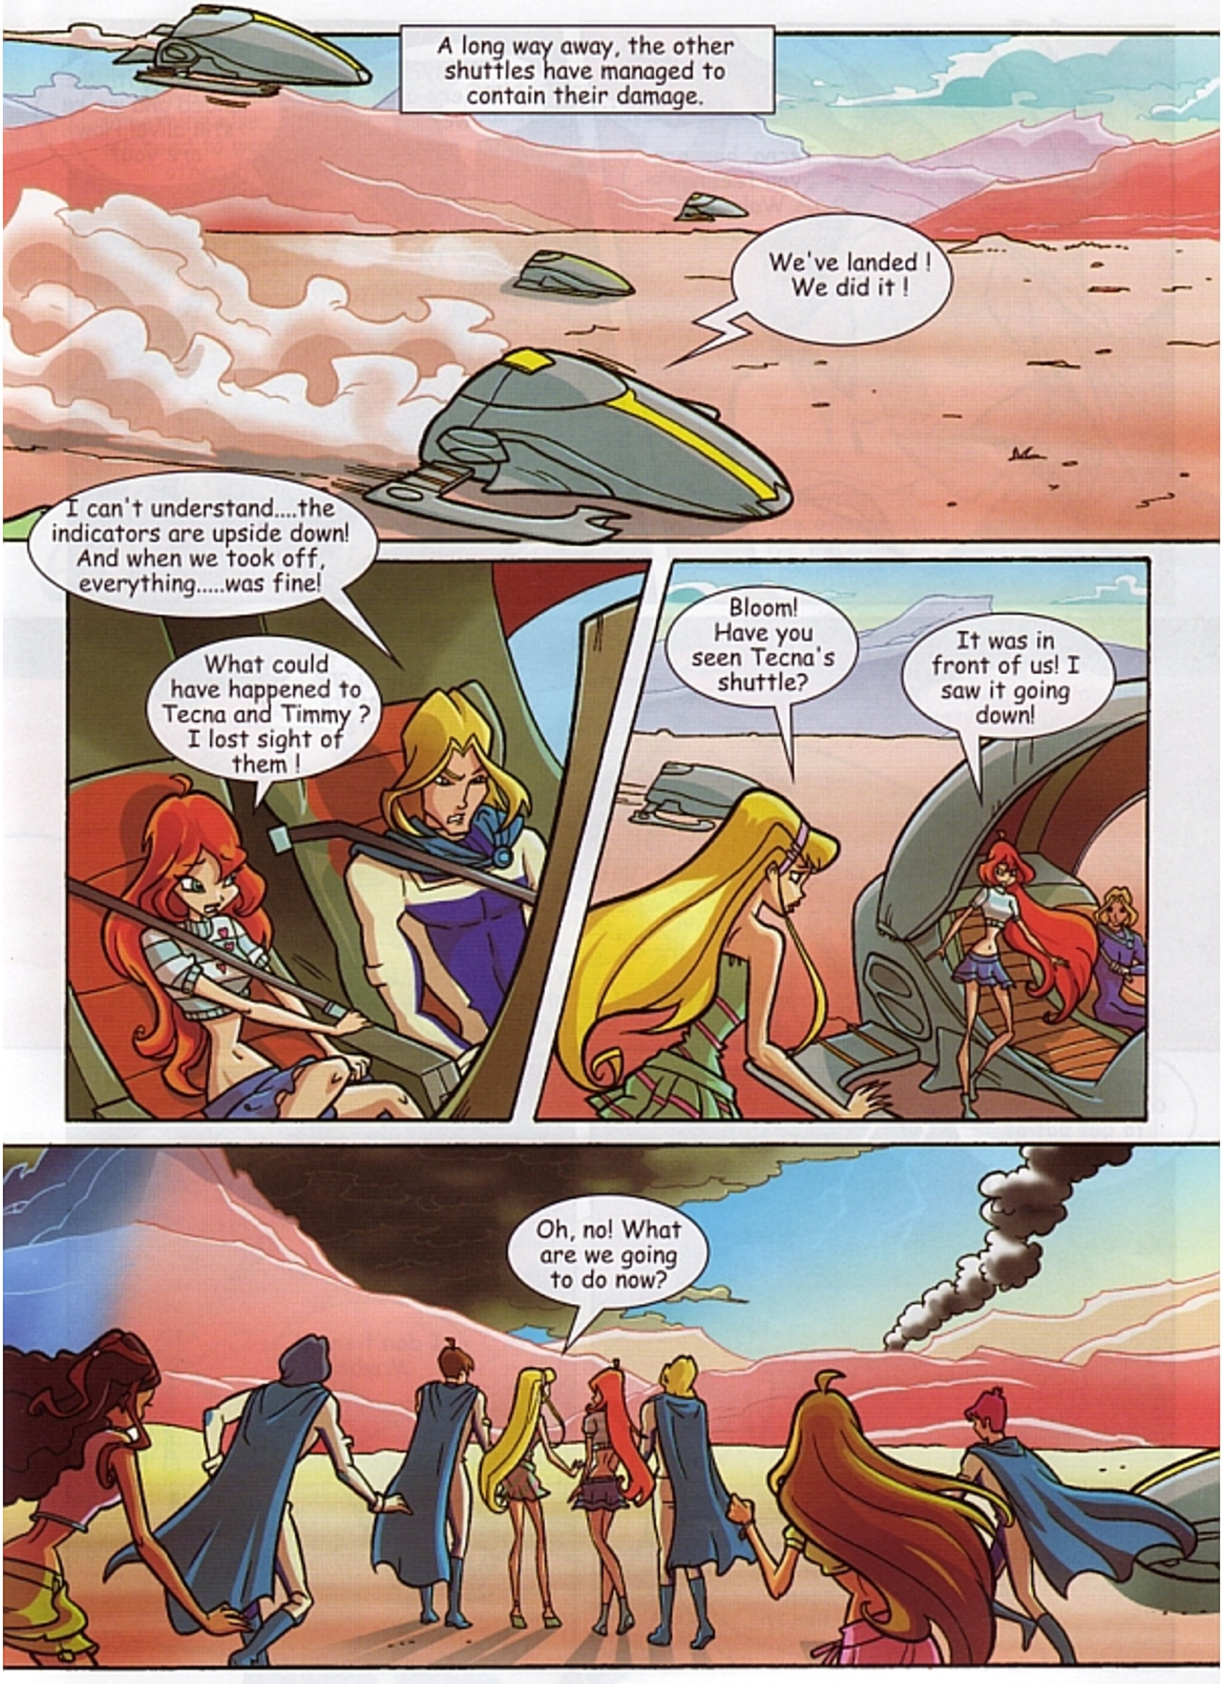
Got it.....maybe we'll manage to land now!
Oh, noo!
Timmy's shuttle IS GOING DOWN!
The controls aren't responding. The shuttle seems to have gone crazy!
TIMMY, DO SOMETHING!!
I would if I could, but something has interfered with the piloting computer. If I could just manage....to deactivate it....
I don't think it's enough! Try to land!
WUIIIIIINNNN!
I did it! I LEVELLED IT!
CRANK



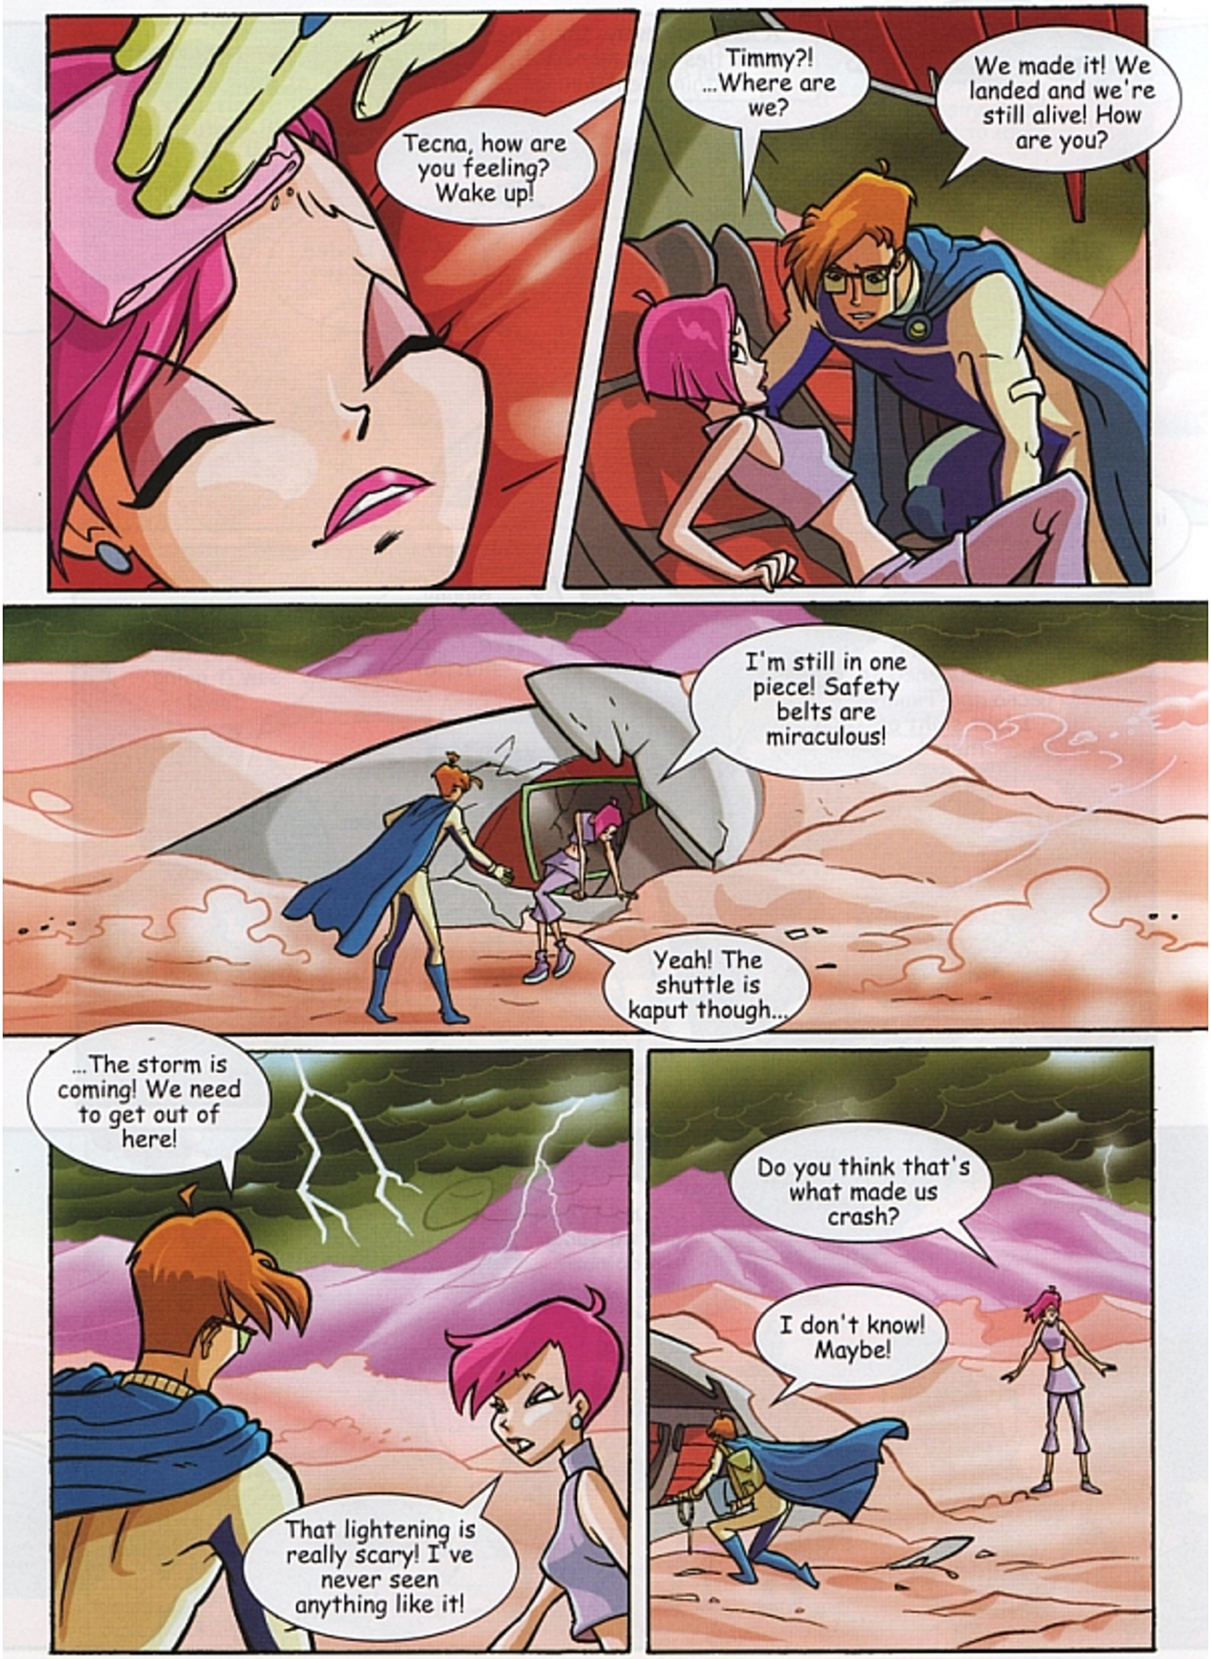
At the same time, along the route the shuttles are taking, the DISTURBER...is getting ready to go into action.
FSSSSSS
CLAK
BZZZZZZZ
BZAZZZ
Our group's mission is to reach the Alfa point and then separate out...until we get to the Beta 126 point.
Okay! I'll help you calculate the flight path!
Hey! What's happening?
BIP
BIP
The radar is signaling strong radio impulses from the ground below us!
LOOK!



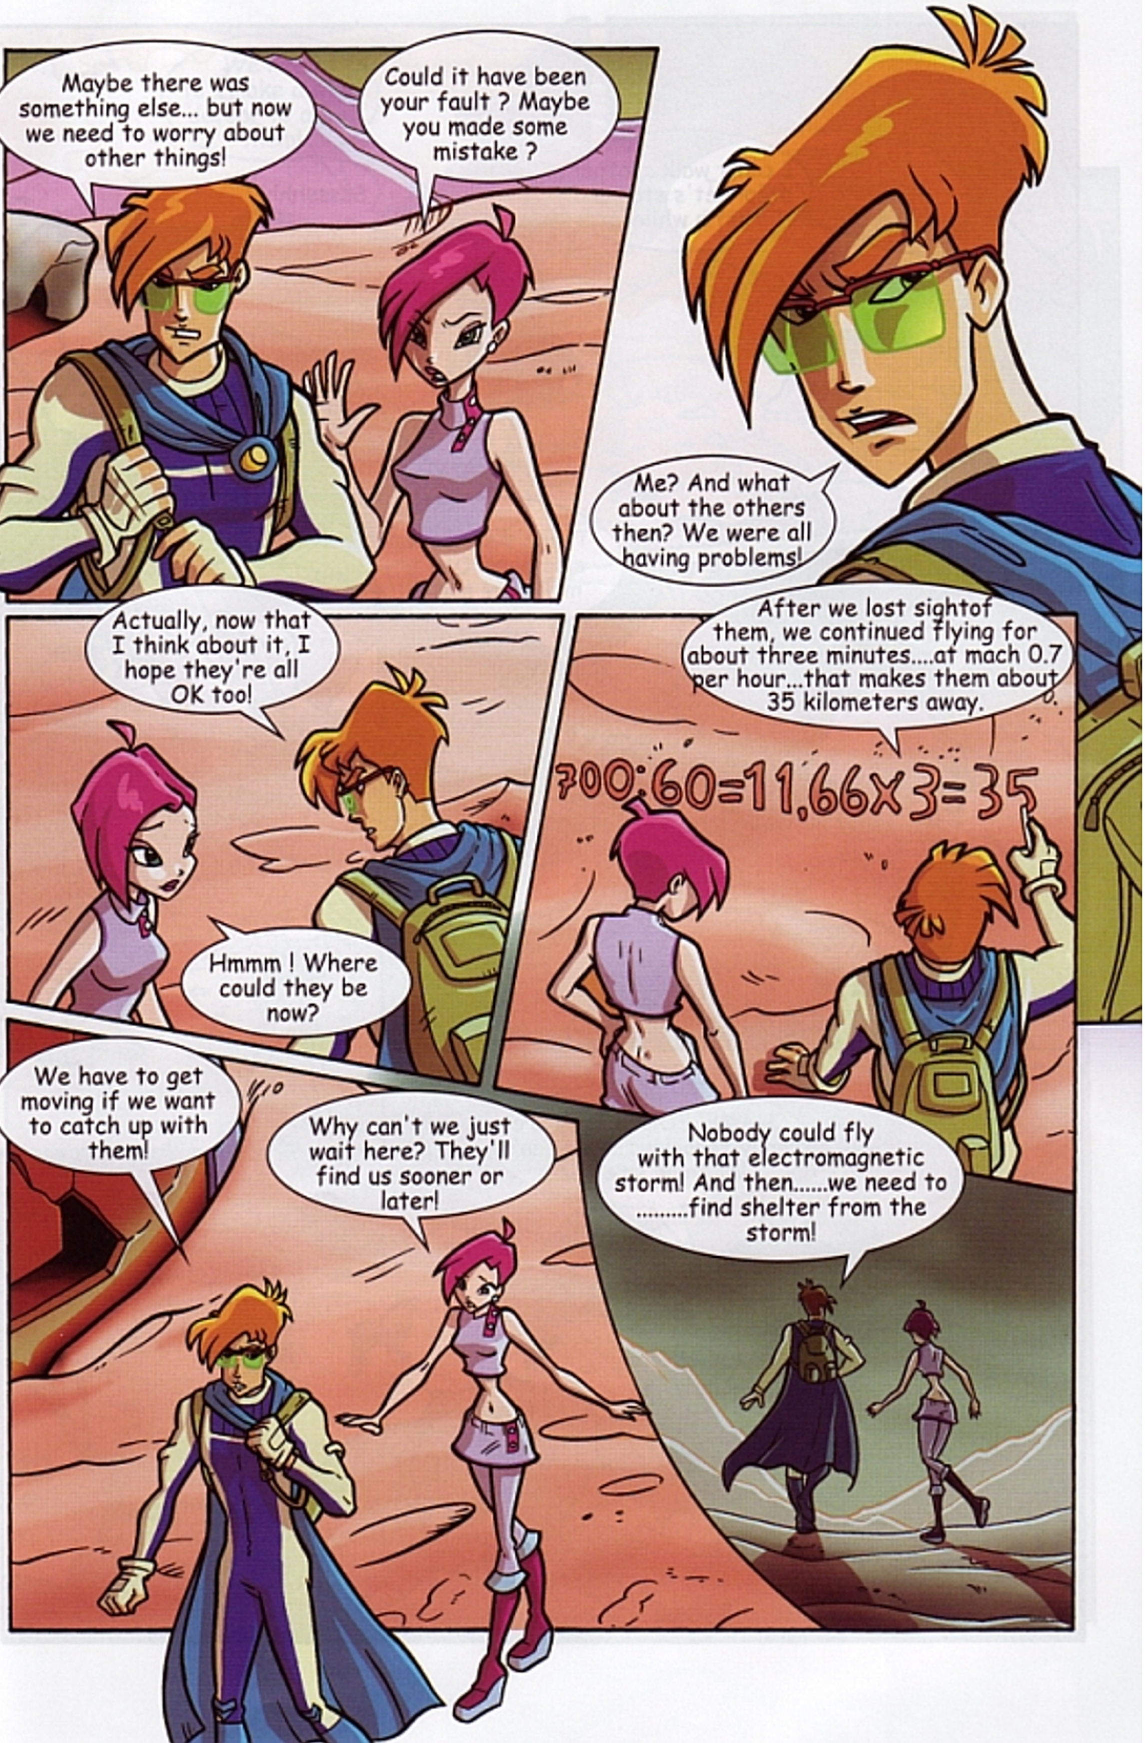
You want to deactivate the computer? BUT WE WON'T MAKE IT WITHOUT IT!
We have no choice! There!
STRAP
CRAKZ
The manual pilot has less interference, but we're losing fuel!.....I'll try to land!
HOLD ON!
SCRUUSCH
SCANK
AAAH!
SCRUUMB



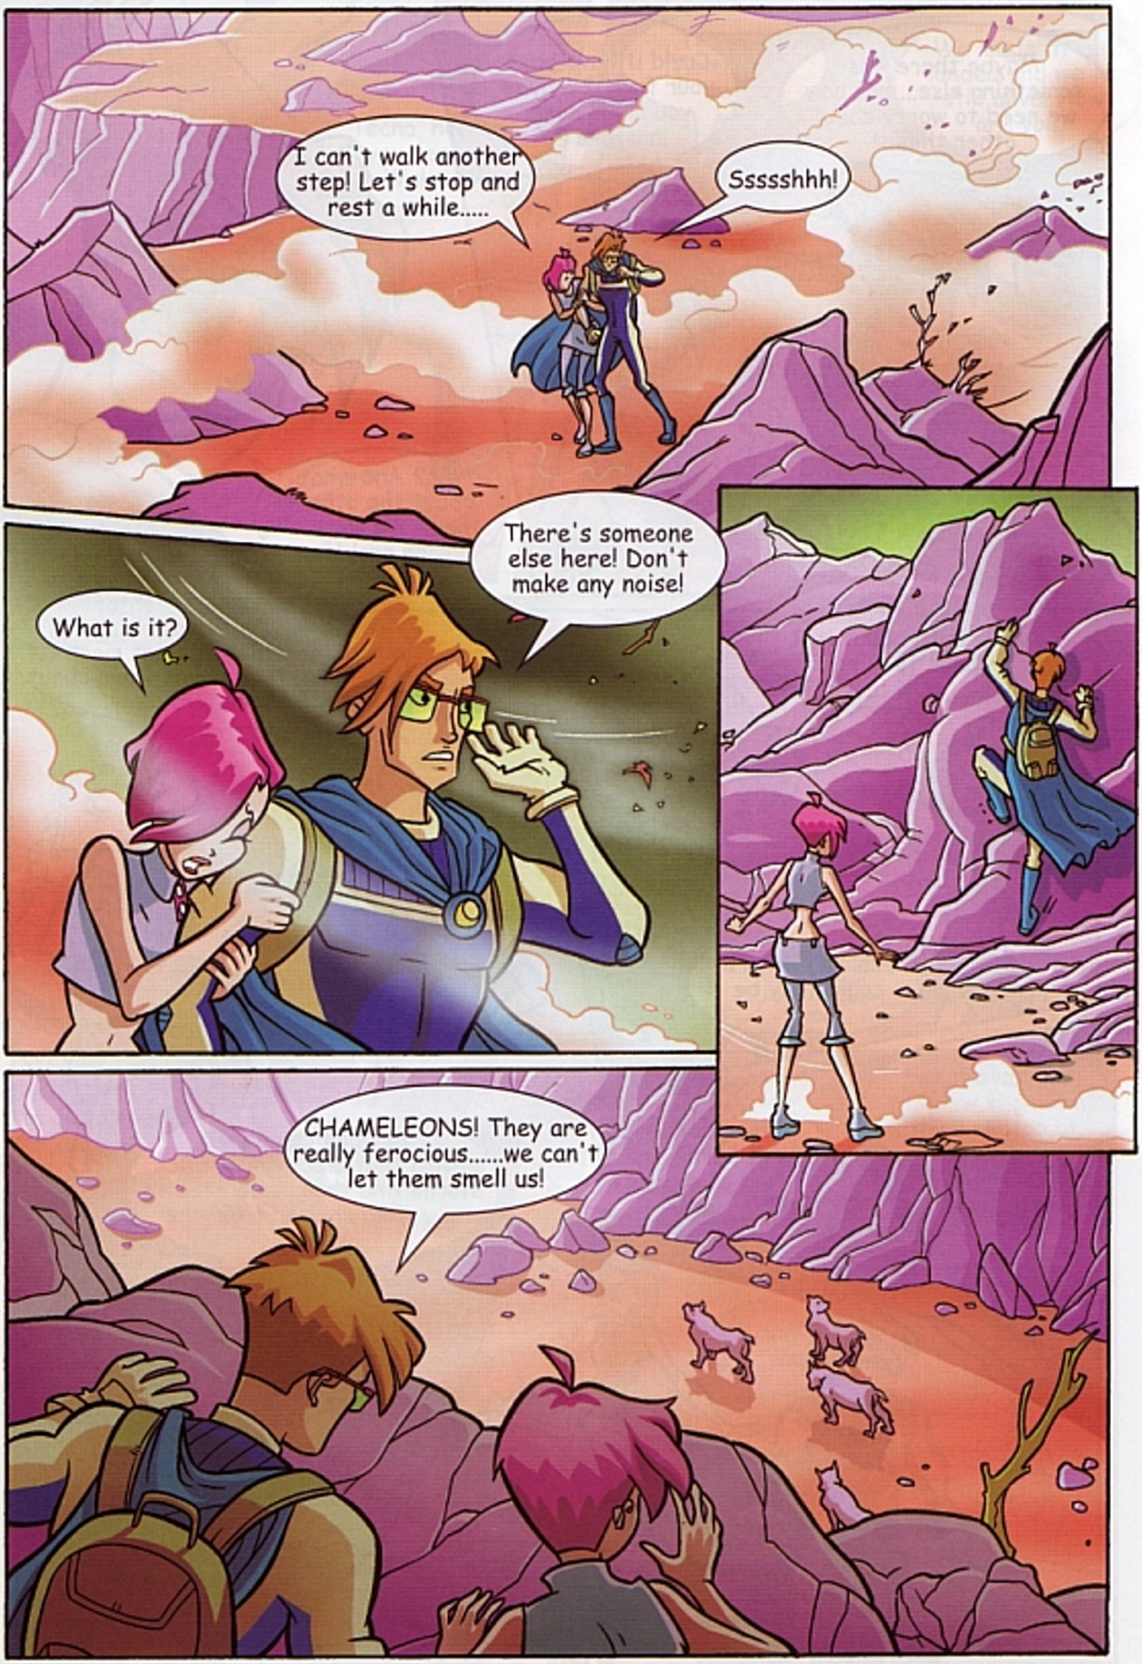
A long way away, the other shuttles have managed to contain their damage.
We've landed ! We did it !
I can't understand....the indicators are upside down! And when we took off, everything.....was fine!
What could have happened to Tecna and Timmy ? I lost sight of them !
Bloom! Have you seen Tecna's shuttle?
It was in front of us! I saw it going down!
Oh, no! What are we going to do now?



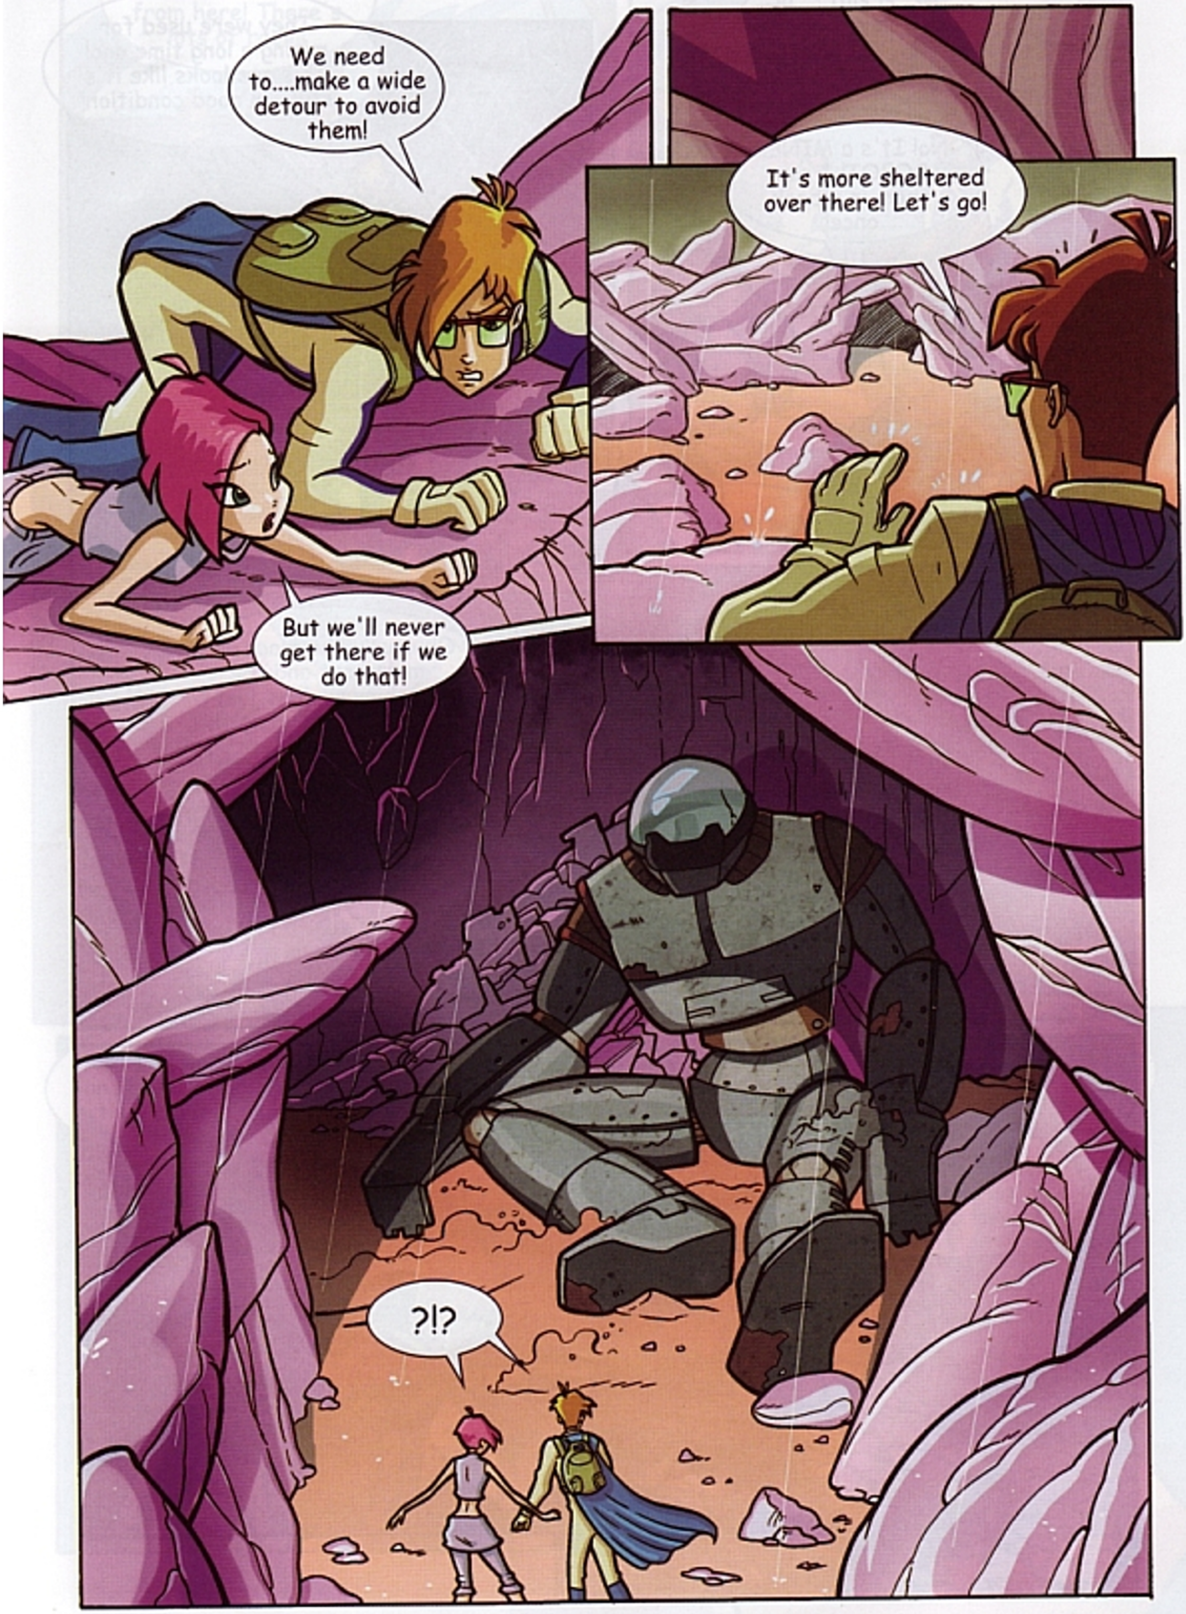
Tecna, how are you feeling? Wake up!
Timmy?! ...Where are we?
We made it! We landed and we're still alive! How are you?
I'm still in one piece! Safety belts are miraculous!
Yeah! The shuttle is kaput though...
...The storm is coming! We need to get out of here!
That lightening is really scary! I've never seen anything like it!
Do you think that's what made us crash?
I don't know! Maybe!



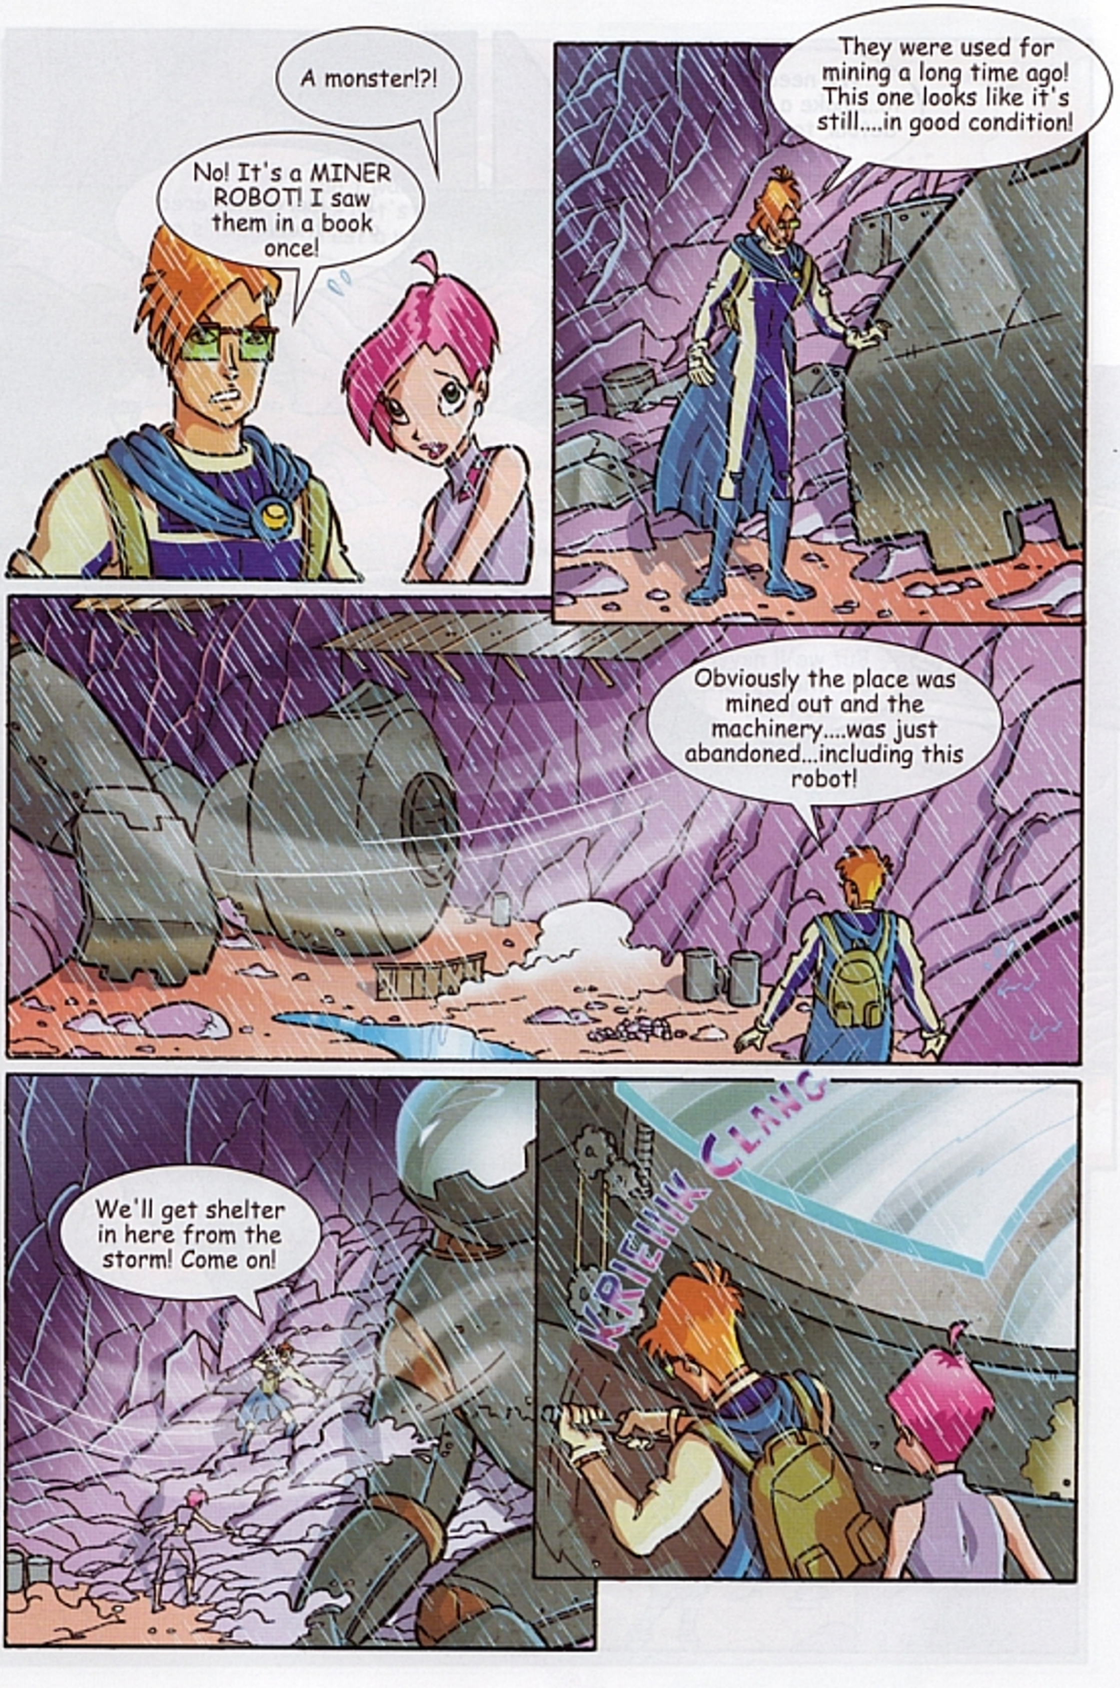
Maybe there was something else... but now we need to worry about other things!
Could it have been your fault ? Maybe you made some mistake ?
Me? And what about the others then? We were all having problems!
Actually, now that I think about it, I hope they're all OK too!
Hmmm ! Where could they be now?
After we lost sightof them, we continued flying for about three minutes....at mach 0.7 per hour...that makes them about 35 kilometers away.
700:60=11,66x3=35
We have to get moving if we want to catch up with them!
Why can't we just wait here? They'll find us sooner or later!
Nobody could fly with that electromagnetic storm! And then......we need to ....find shelter from the storm!



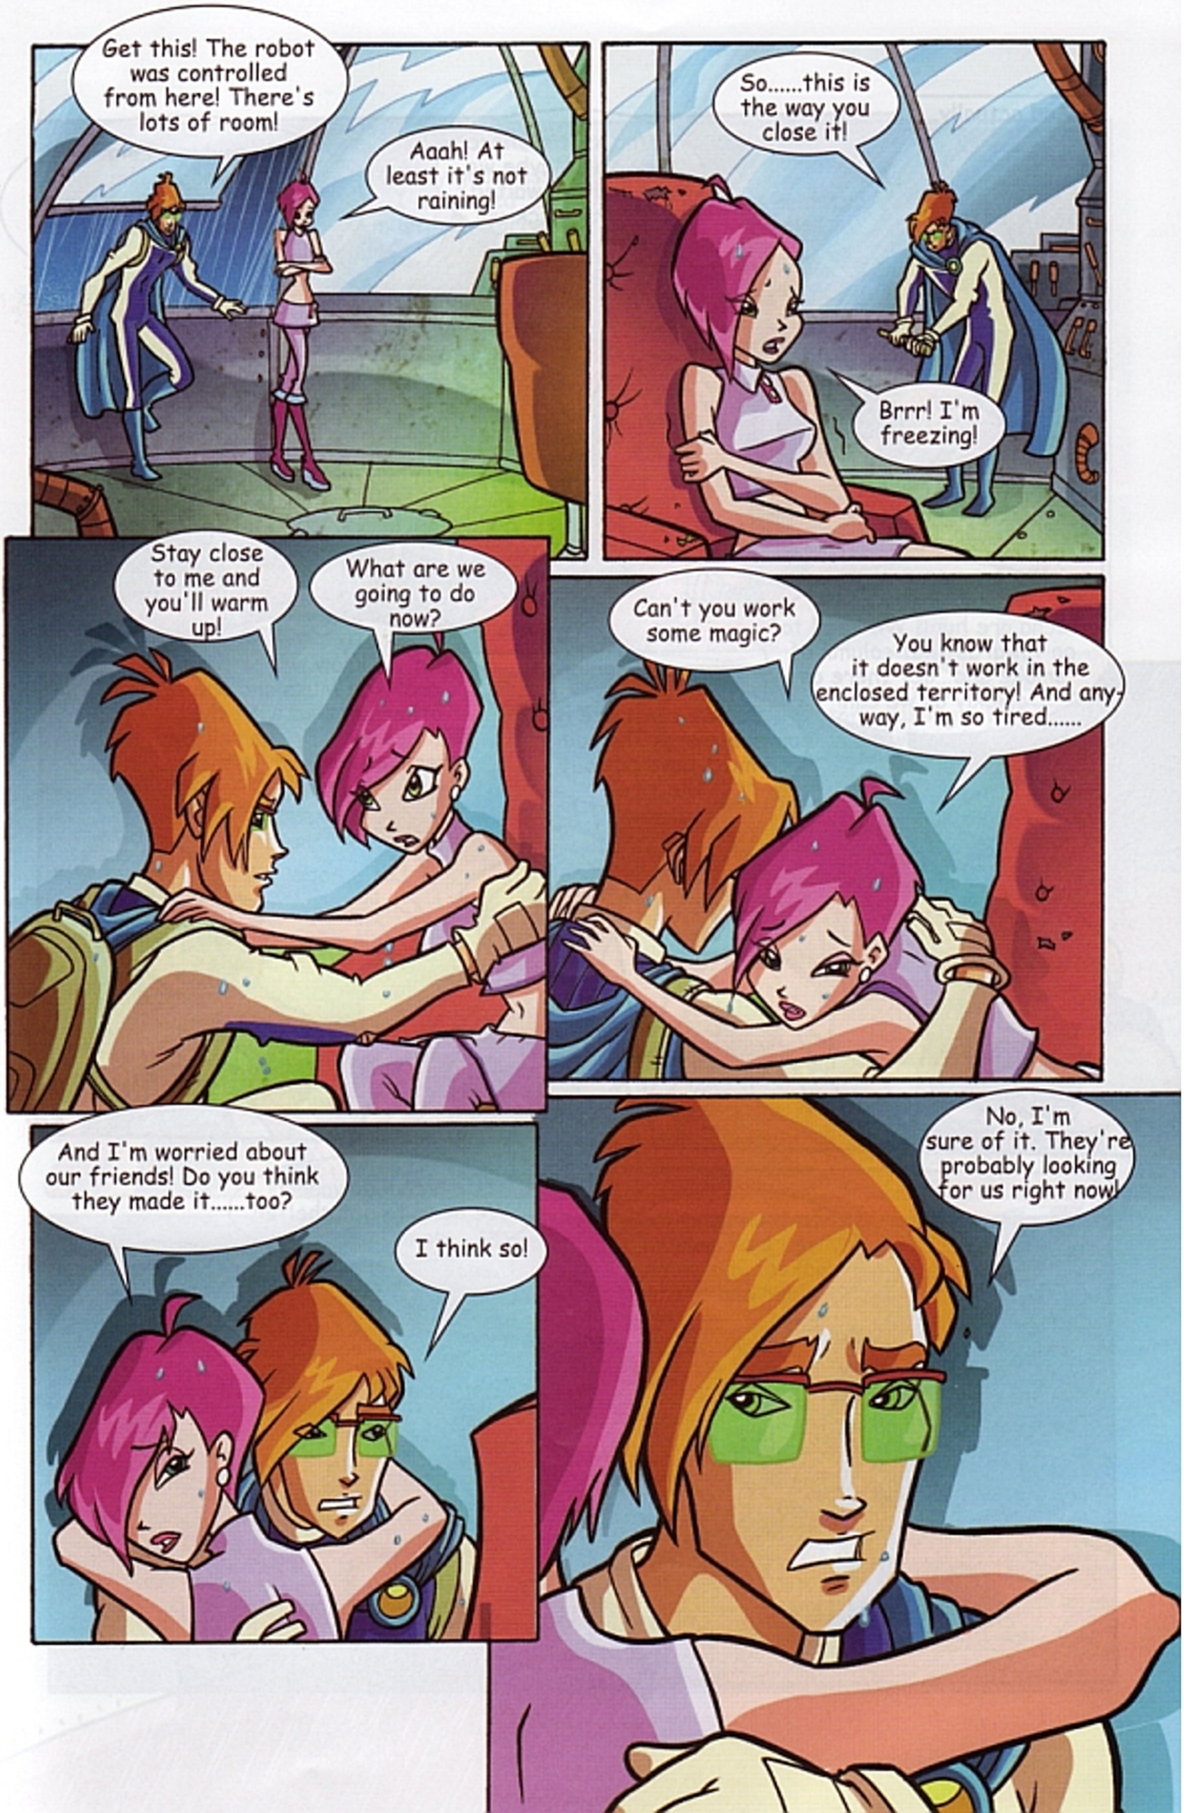
I can't walk another step! Let's stop and rest a while.....
Sssshhh!
What is it?
There's someone else here! Don't make any noise!
CHAMELEONS! They are really ferocious......we can't let them smell us!



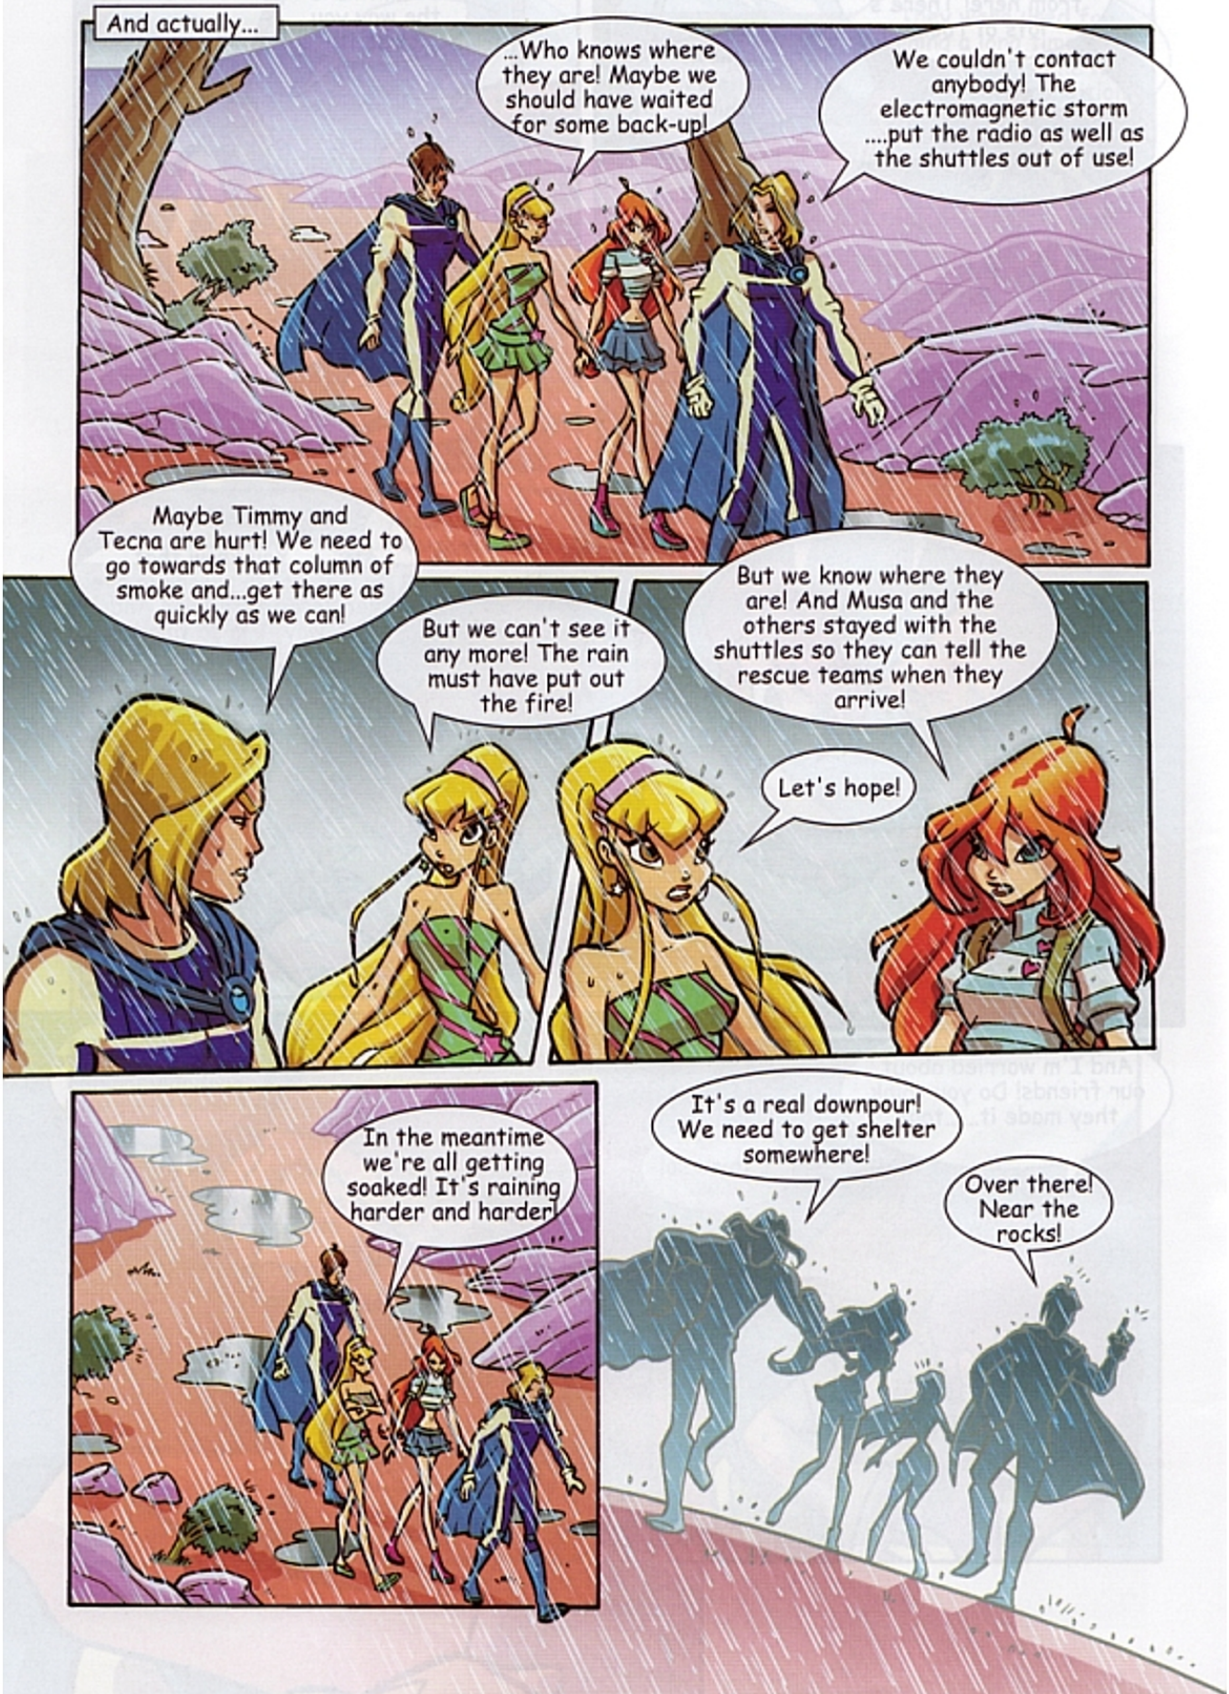
We need to....make a wide detour to avoid them!
But we'll never get there if we do that!
It's more sheltered over there! Let's go!
?!?



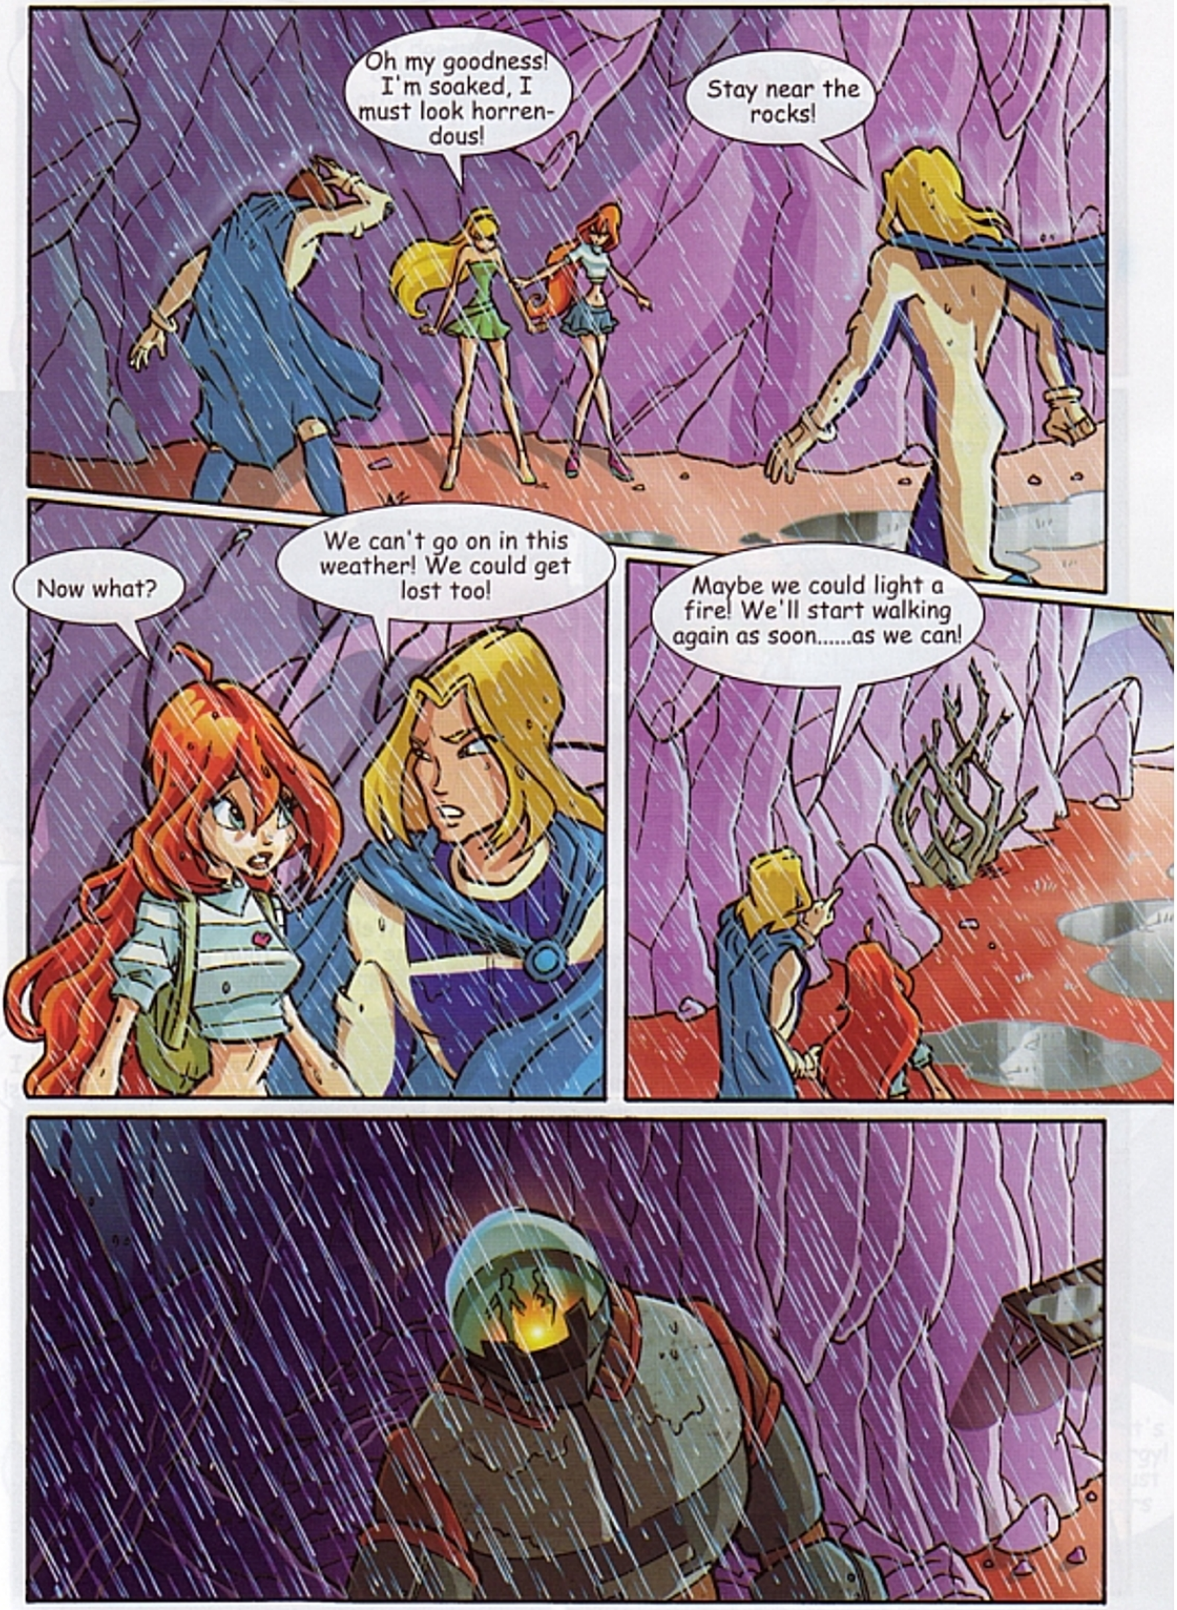
A monster!?!
No! It's a MINER ROBOT! I saw them in a book once!
They were used for mining a long time ago! This one looks like it's still....in good condition!
Obviously the place was mined out and the machinery....was just abandoned...including this robot!
We'll get shelter in here from the storm! Come on!
KRIEEEK CLANG



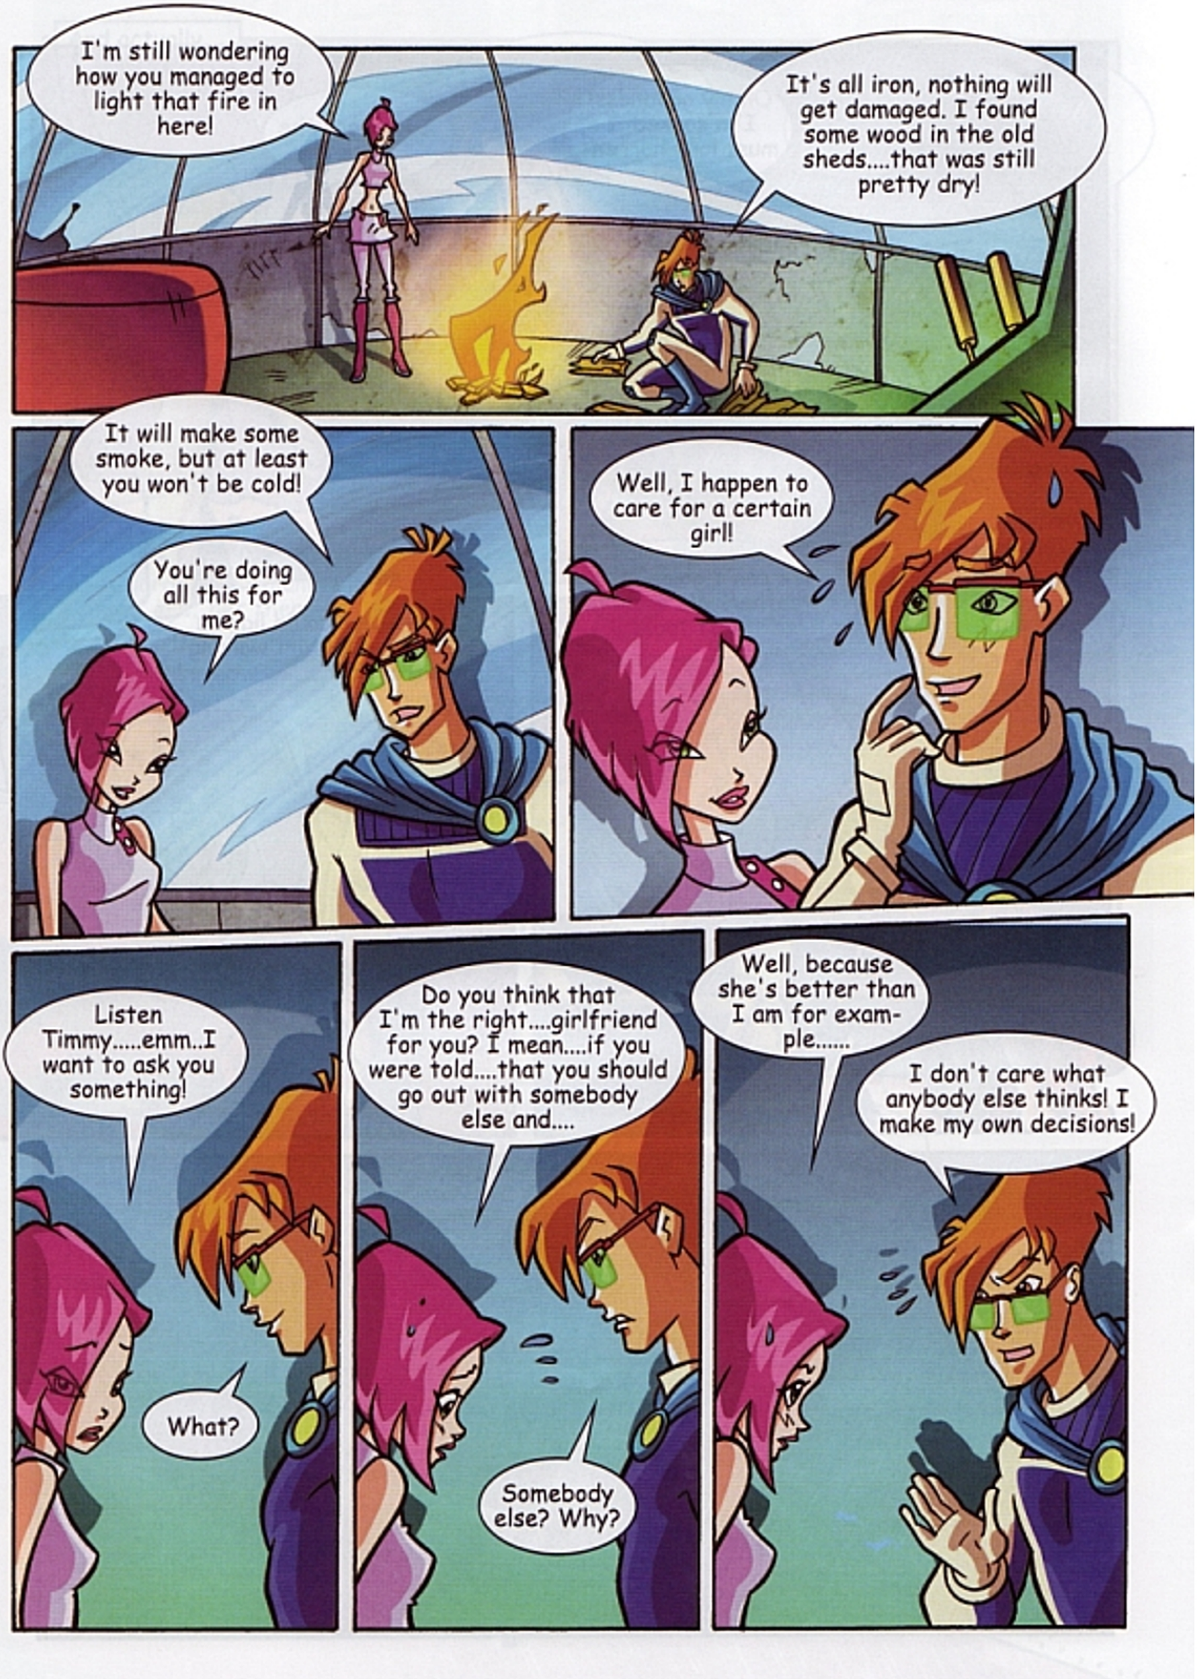
Get this! The robot was controlled from here! There's lots of room!
Aaah! At least it's not raining!
So......this is the way you close it!
Brrr! I'm freezing!
Stay close to me and you'll warm up!
What are we going to do now?
Can't you work some magic?
You know that it doesn't work in the enclosed territory! And anyway, I'm so tired......
And I'm worried about our friends! Do you think they made it......too?
I think so!
No, I'm sure of it. They're probably looking for us right now!



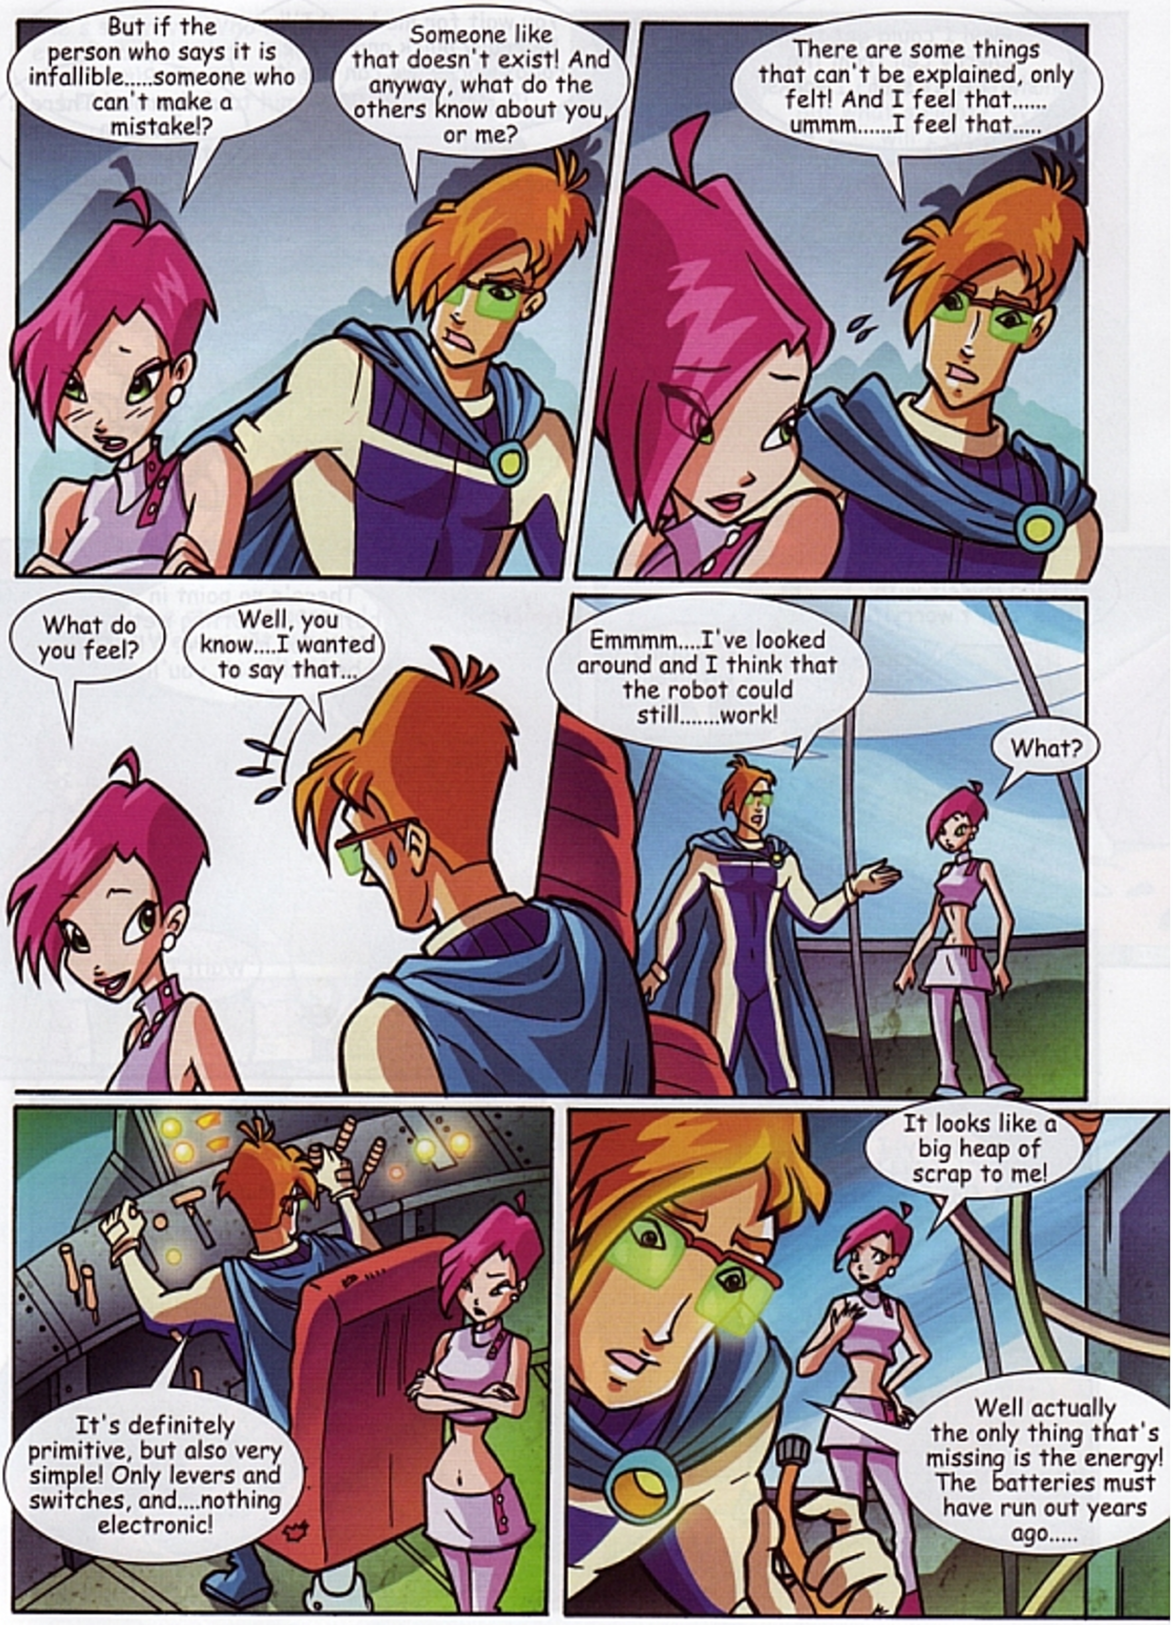
And actually...
...Who knows where they are! Maybe we should have waited for some back-up!
We couldn't contact anybody! The electromagnetic storm ....put the radio as well as the shuttles out of use!
Maybe Timmy and Tecna are hurt! We need to go towards that column of smoke and...get there as quickly as we can!
But we can't see it any more! The rain must have put out the fire!
But we know where they are! And Musa and the others stayed with the shuttles so they can tell the rescue teams when they arrive!
Let's hope!
In the meantime we're all getting soaked! It's raining harder and harder!
It's a real downpour! We need to get shelter somewhere!
Over there! Near the rocks!



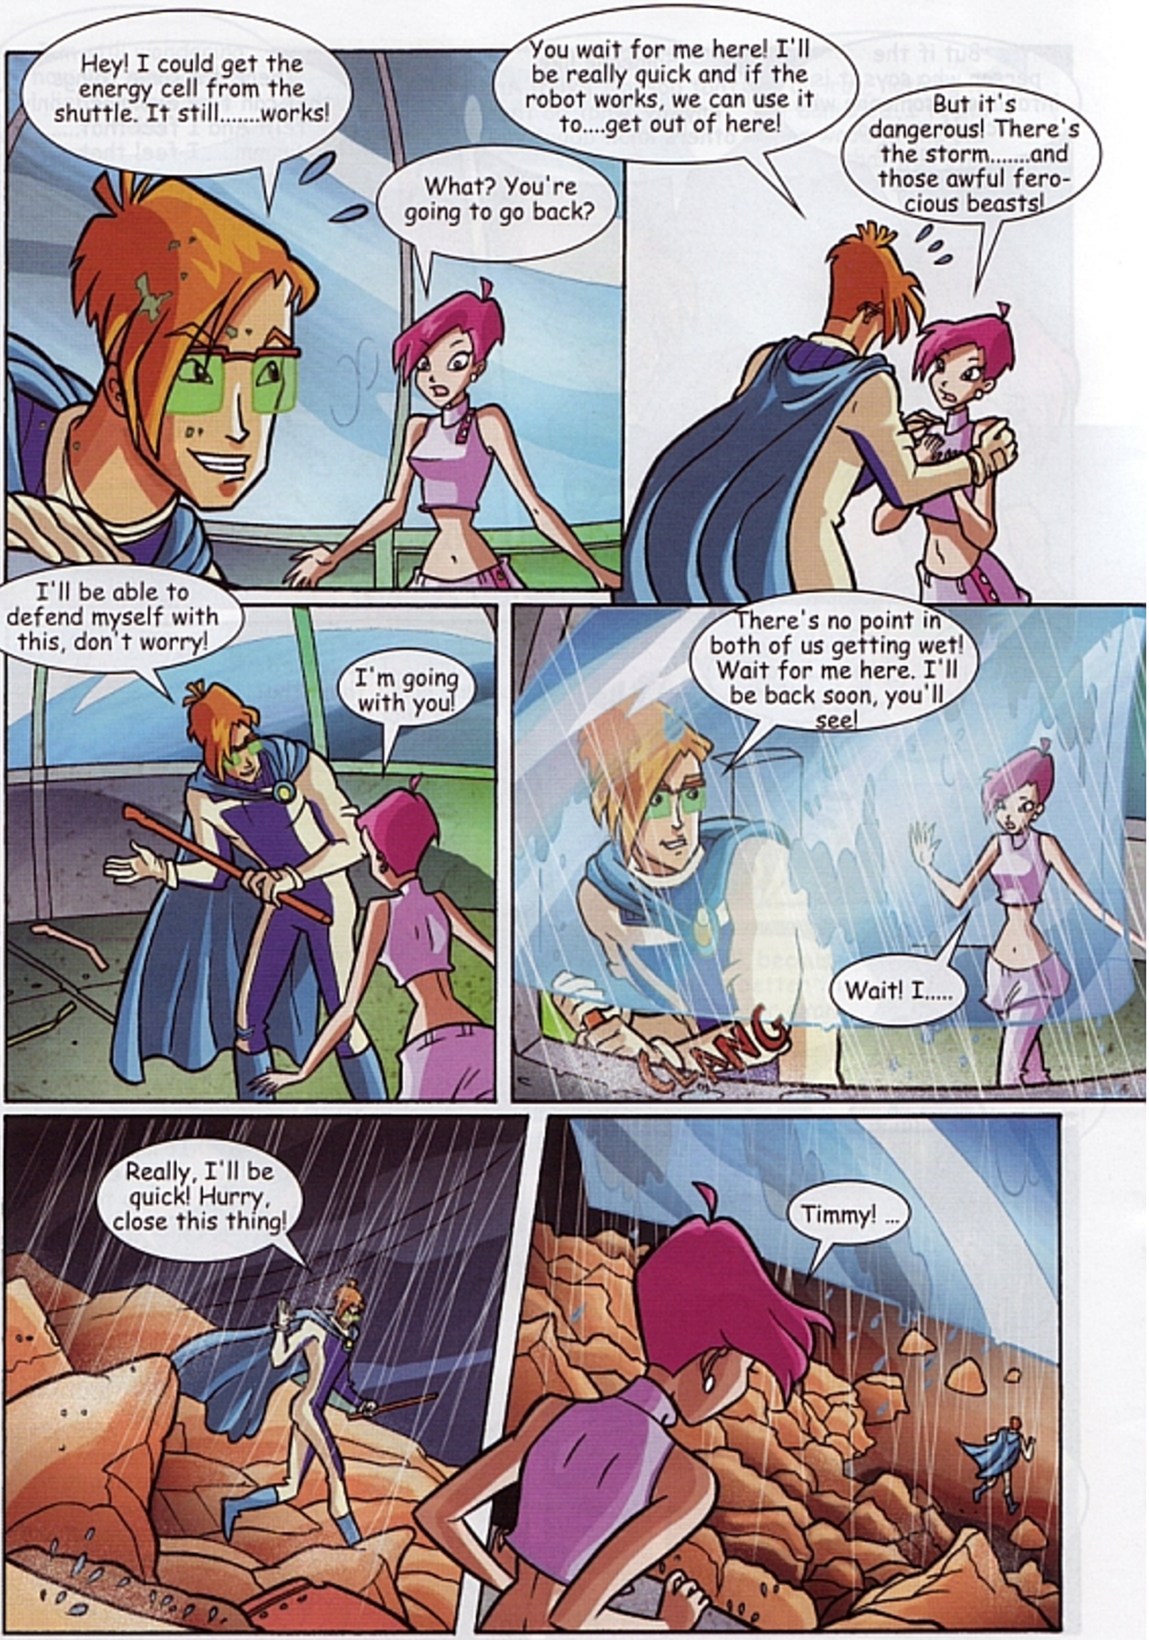
Oh my goodness! I'm soaked, I must look horrendous!
Stay near the rocks!
Now what?
We can't go on in this weather! We could get lost too!
Maybe we could light a fire! We'll start walking again as soon......as we can!



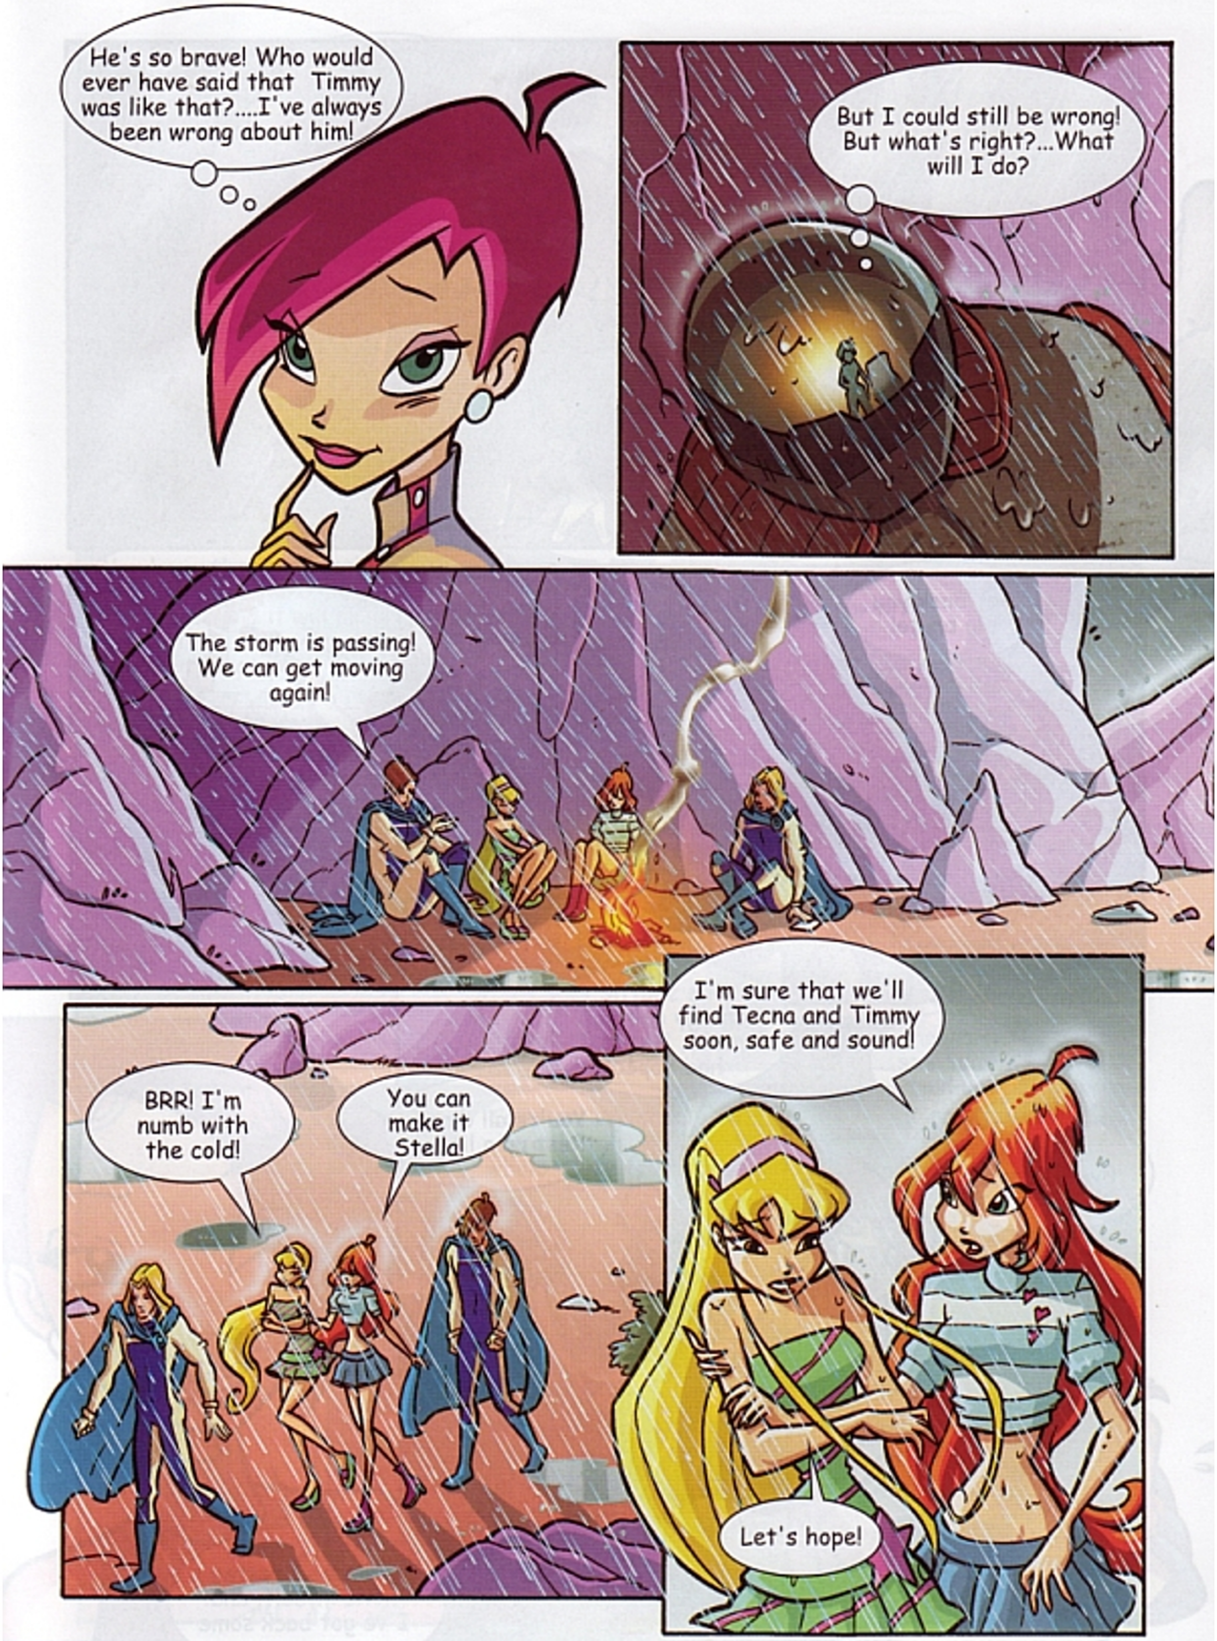
I'm still wondering how you managed to light that fire in here!
It's all iron, nothing will get damaged. I found some wood in the old sheds....that was still pretty dry!
It will make some smoke, but at least you won't be cold!
You're doing all this for me?
Well, I happen to care for a certain girl!
Listen Timmy.....emm..I want to ask you something!
What?
Do you think that I'm the right....girlfriend for you? I mean....if you were told....that you should go out with somebody else and....
Somebody else? Why?
Well, because she's better than I am for example......
I don't care what anybody else thinks! I make my own decisions!



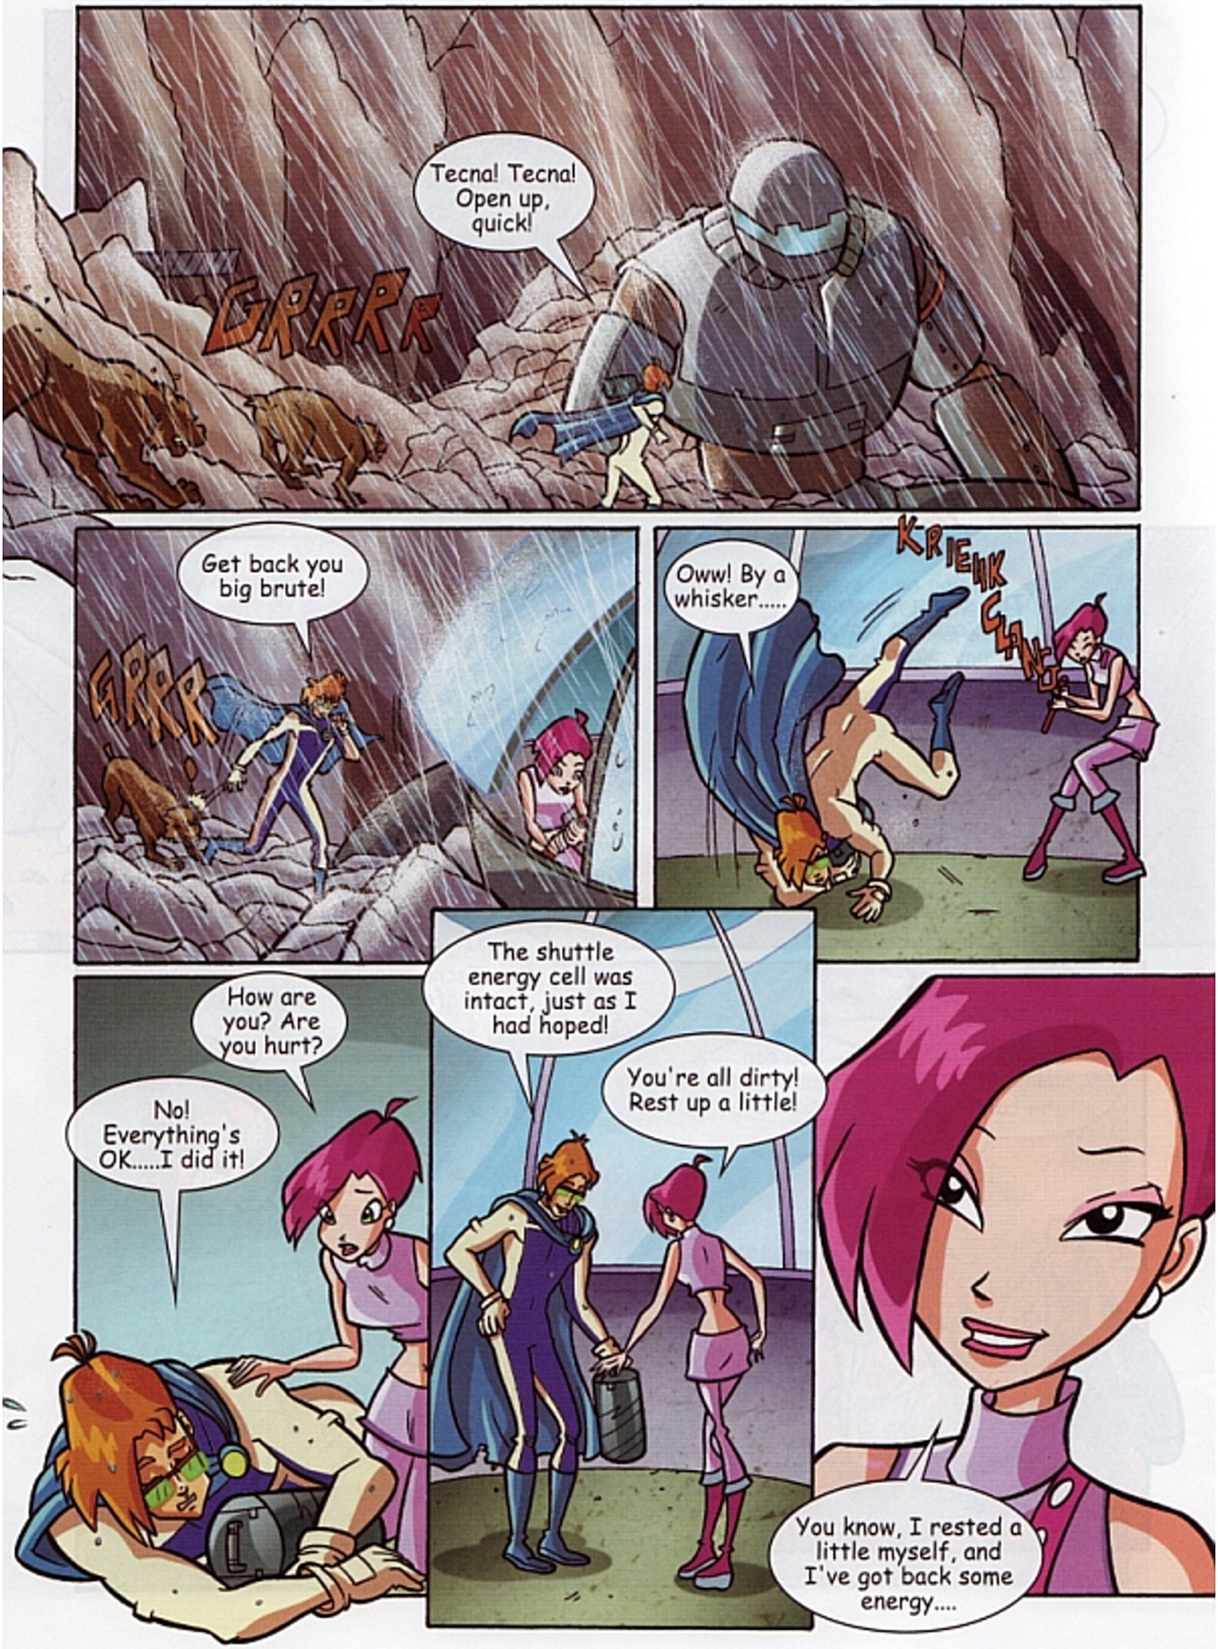
But if the person who says it is infallible.....someone who can't make a mistake!?
Someone like that doesn't exist! And anyway, what do the others know about you, or me?
There are some things that can't be explained, only felt! And I feel that...... ummm......I feel that.....
What do you feel?
Well, you know....I wanted to say that...
Emmmm....I've looked around and I think that the robot could still.......work!
What?
It's definitely primitive, but also very simple! Only levers and switches, and....nothing electronic!
It looks like a big heap of scrap to me!
Well actually the only thing that's missing is the energy! The batteries must have run out years ago.....



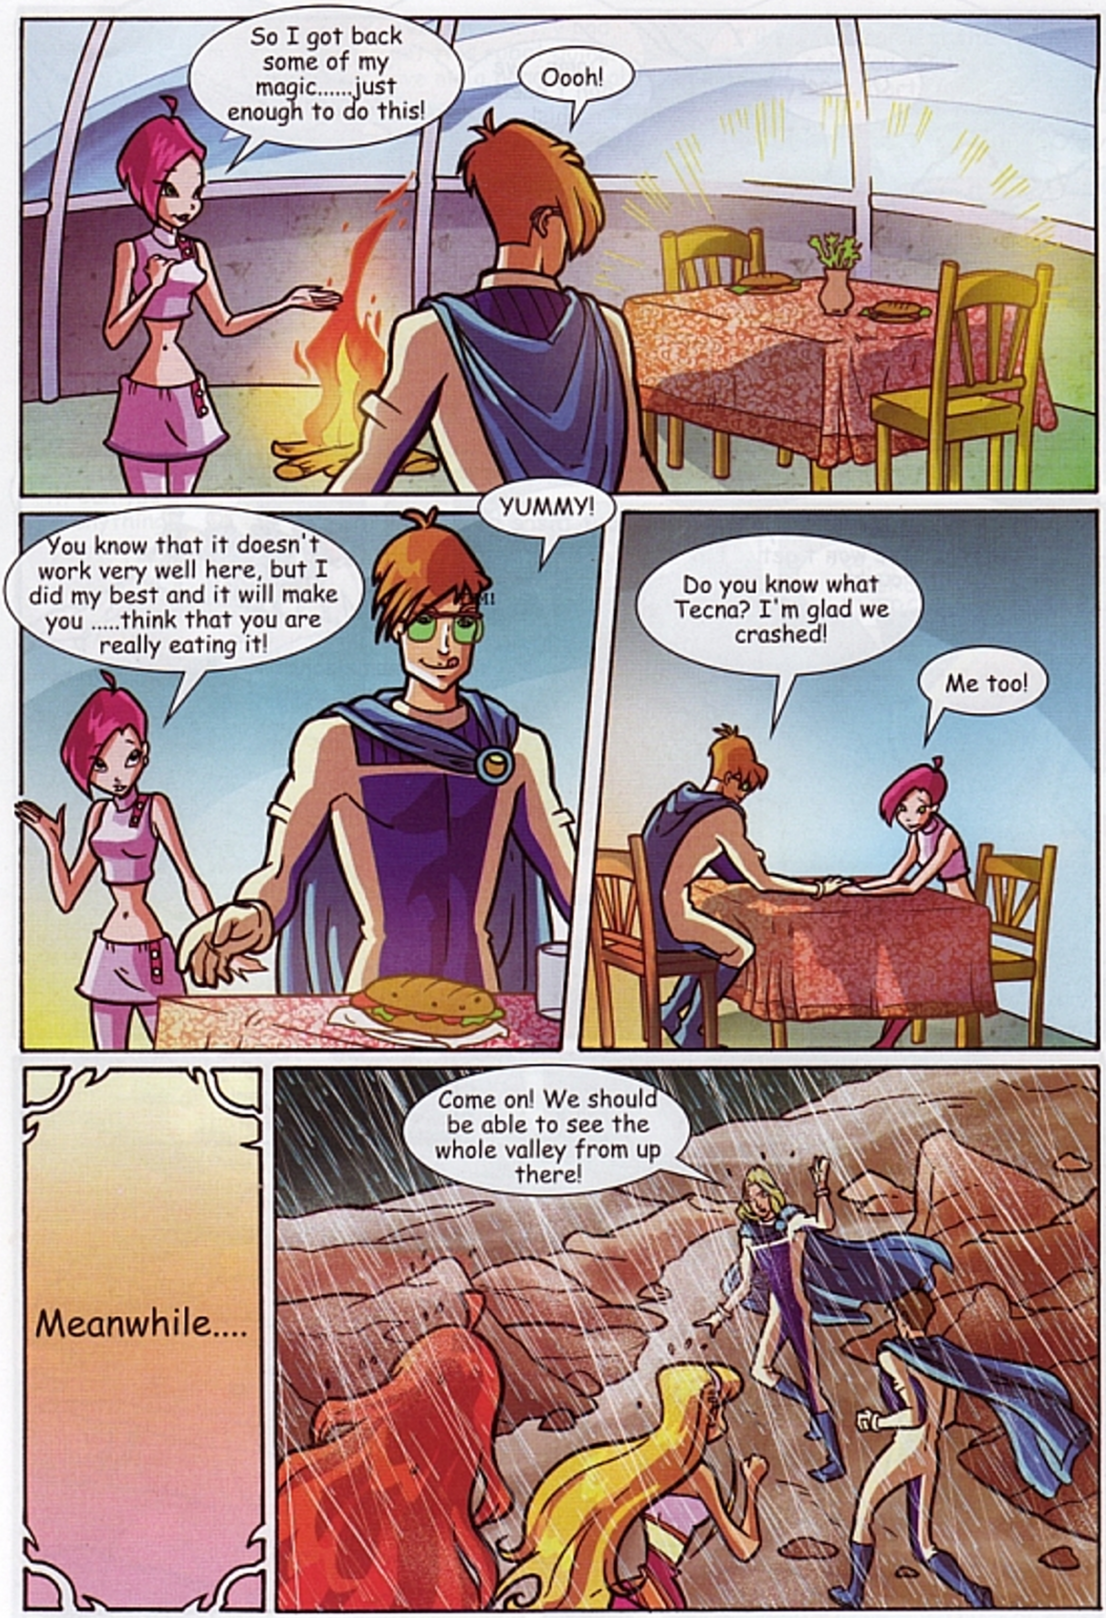
Hey! I could get the energy cell from the shuttle. It still.......works!
What? You're going to go back?
You wait for me here! I'll be really quick and if the robot works, we can use it to....get out of here!
But it's dangerous! There's the storm.......and those awful ferocious beasts!
I'll be able to defend myself with this, don't worry!
I'm going with you!
There's no point in both of us getting wet! Wait for me here. I'll be back soon, you'll see!
Wait! I.....
CLANG
Really, I'll be quick! Hurry, close this thing!
Timmy! ...



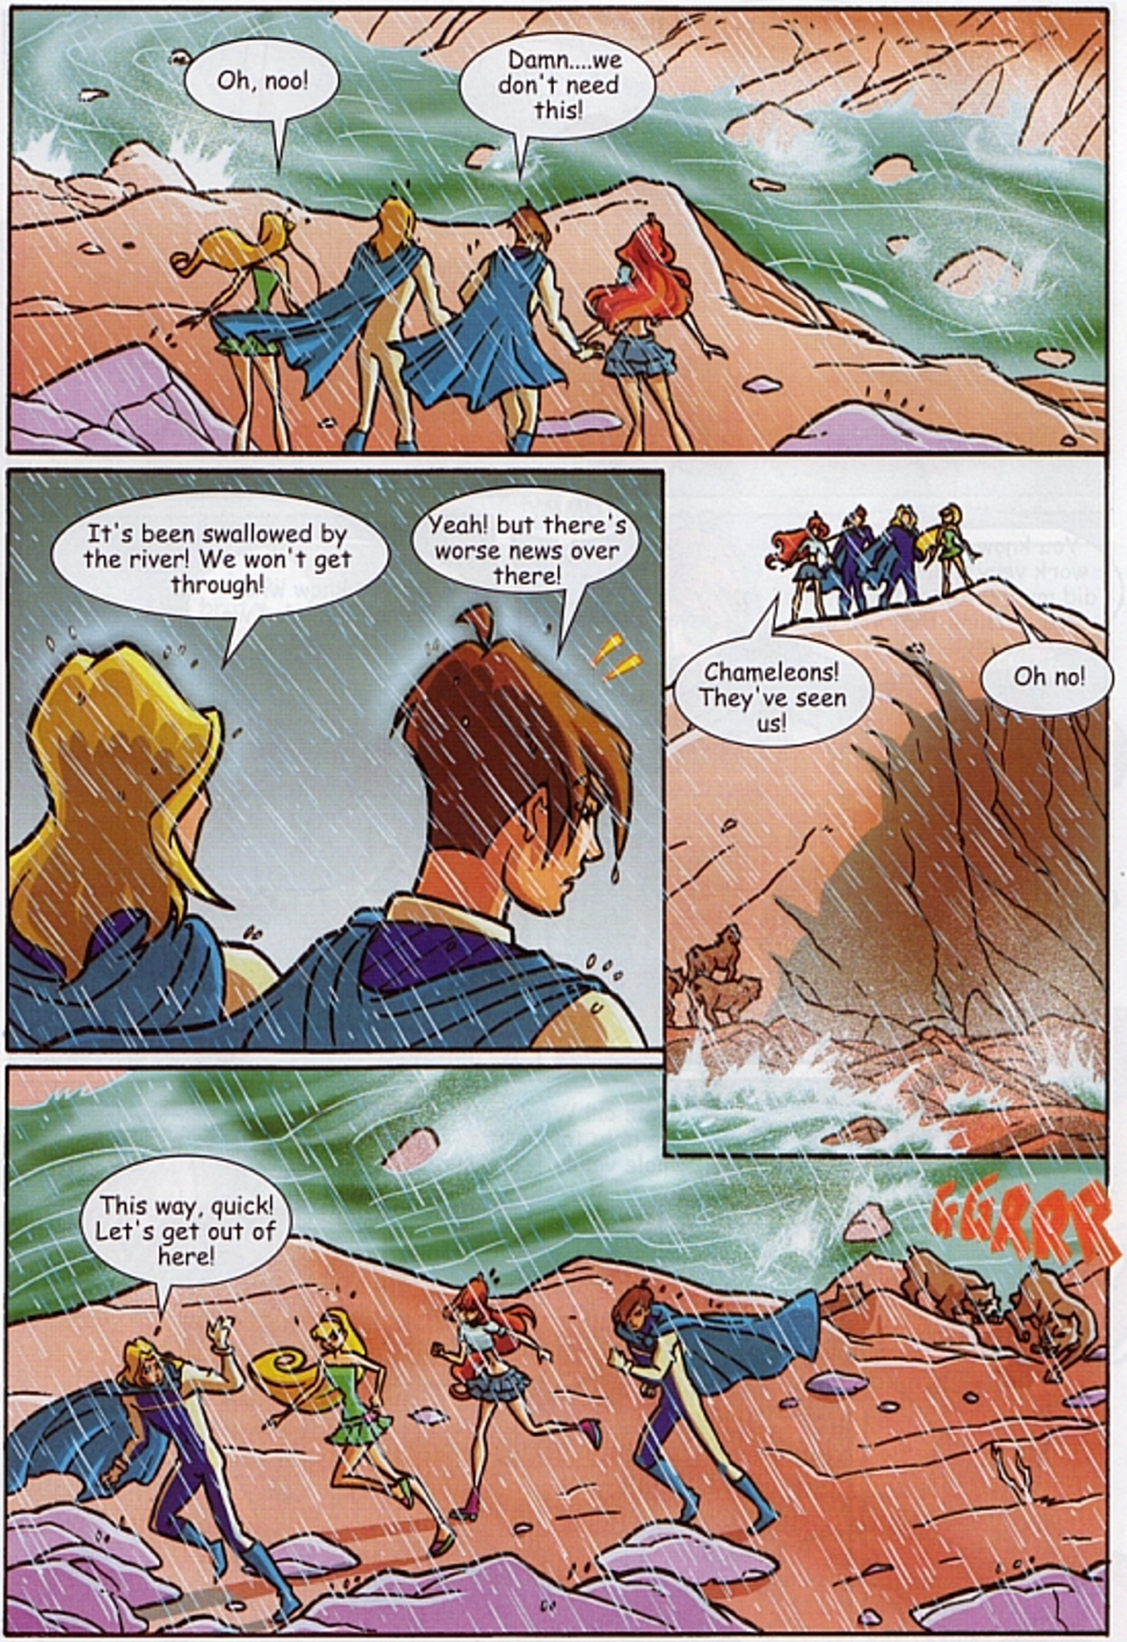
He's so brave! Who would ever have said that Timmy was like that?....I've always been wrong about him!
But I could still be wrong! But what's right?...What will I do?
The storm is passing! We can get moving again!
BRR! I'm numb with the cold!
You can make it Stella!
I'm sure that we'll find Tecna and Timmy soon, safe and sound!
Let's hope!



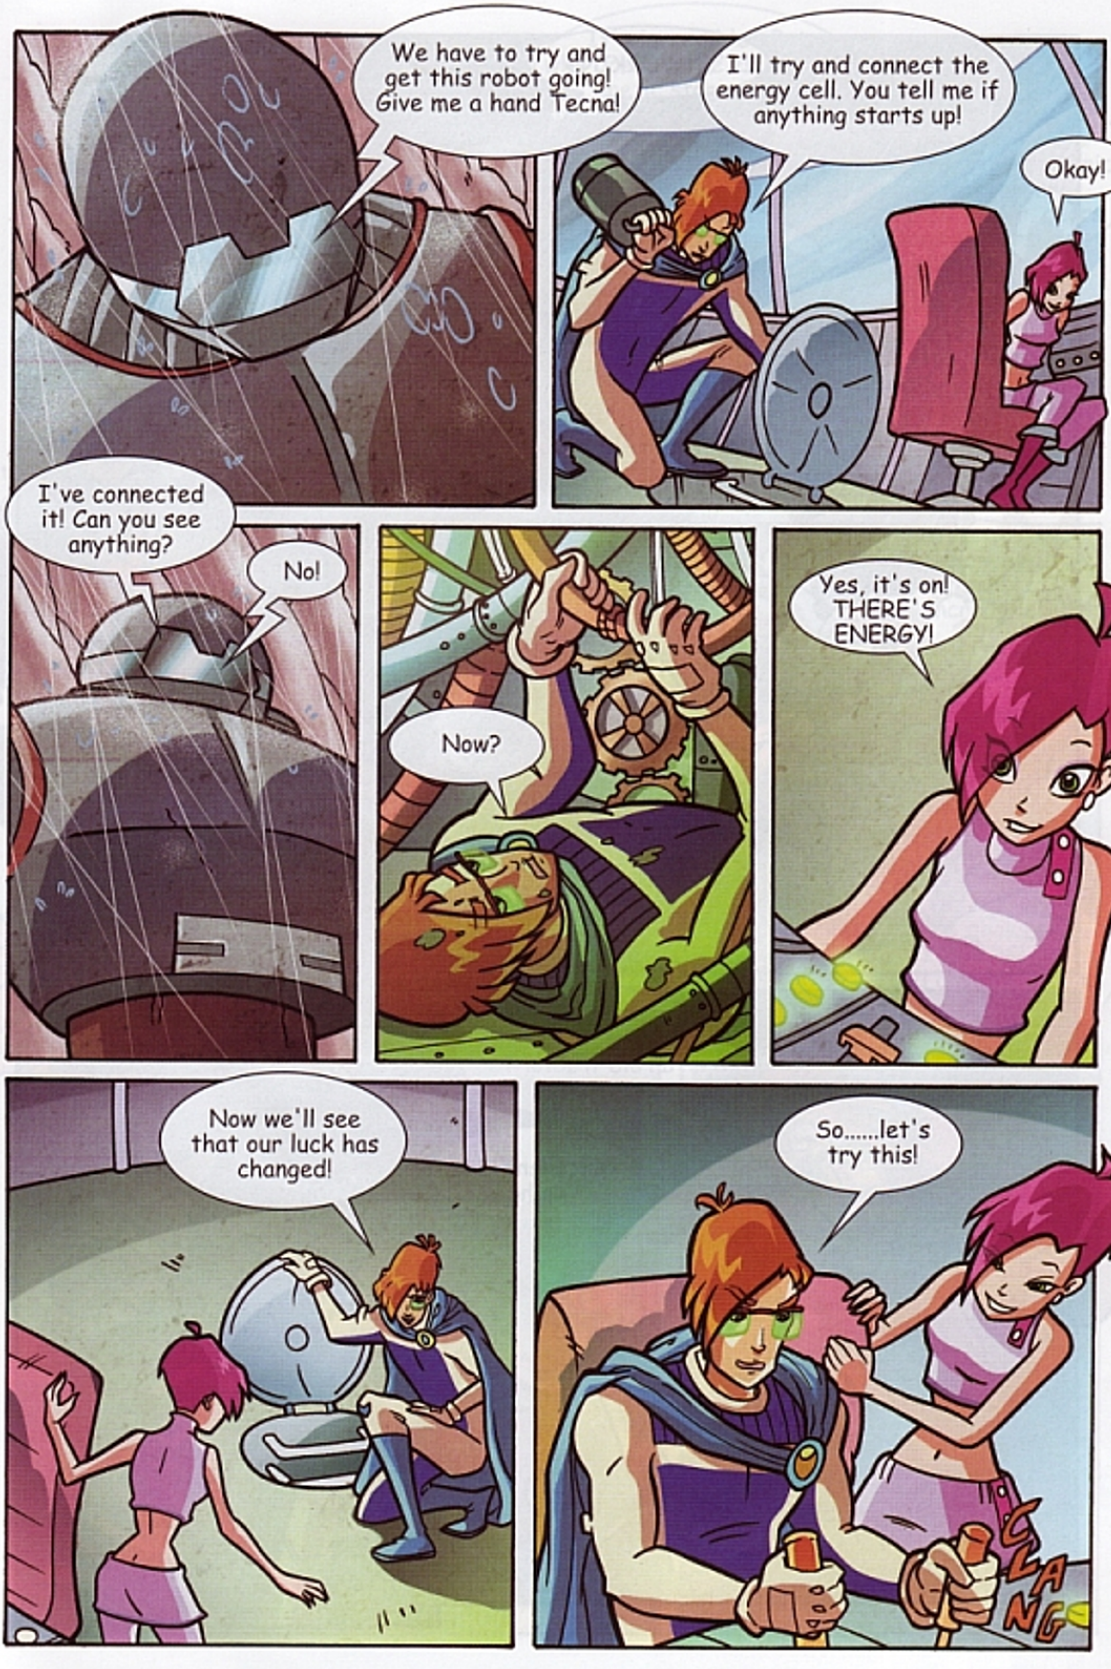
GRRRR
Tecna! Tecna! Open up, quick!
GRRR
Get back you big brute!
Oww! By a whisker.....
KRIEUK
CLANG
How are you? Are you hurt?
No! Everything's OK.....I did it!
The shuttle energy cell was intact, just as I had hoped!
You're all dirty! Rest up a little!
You know, I rested a little myself, and I've got back some energy....



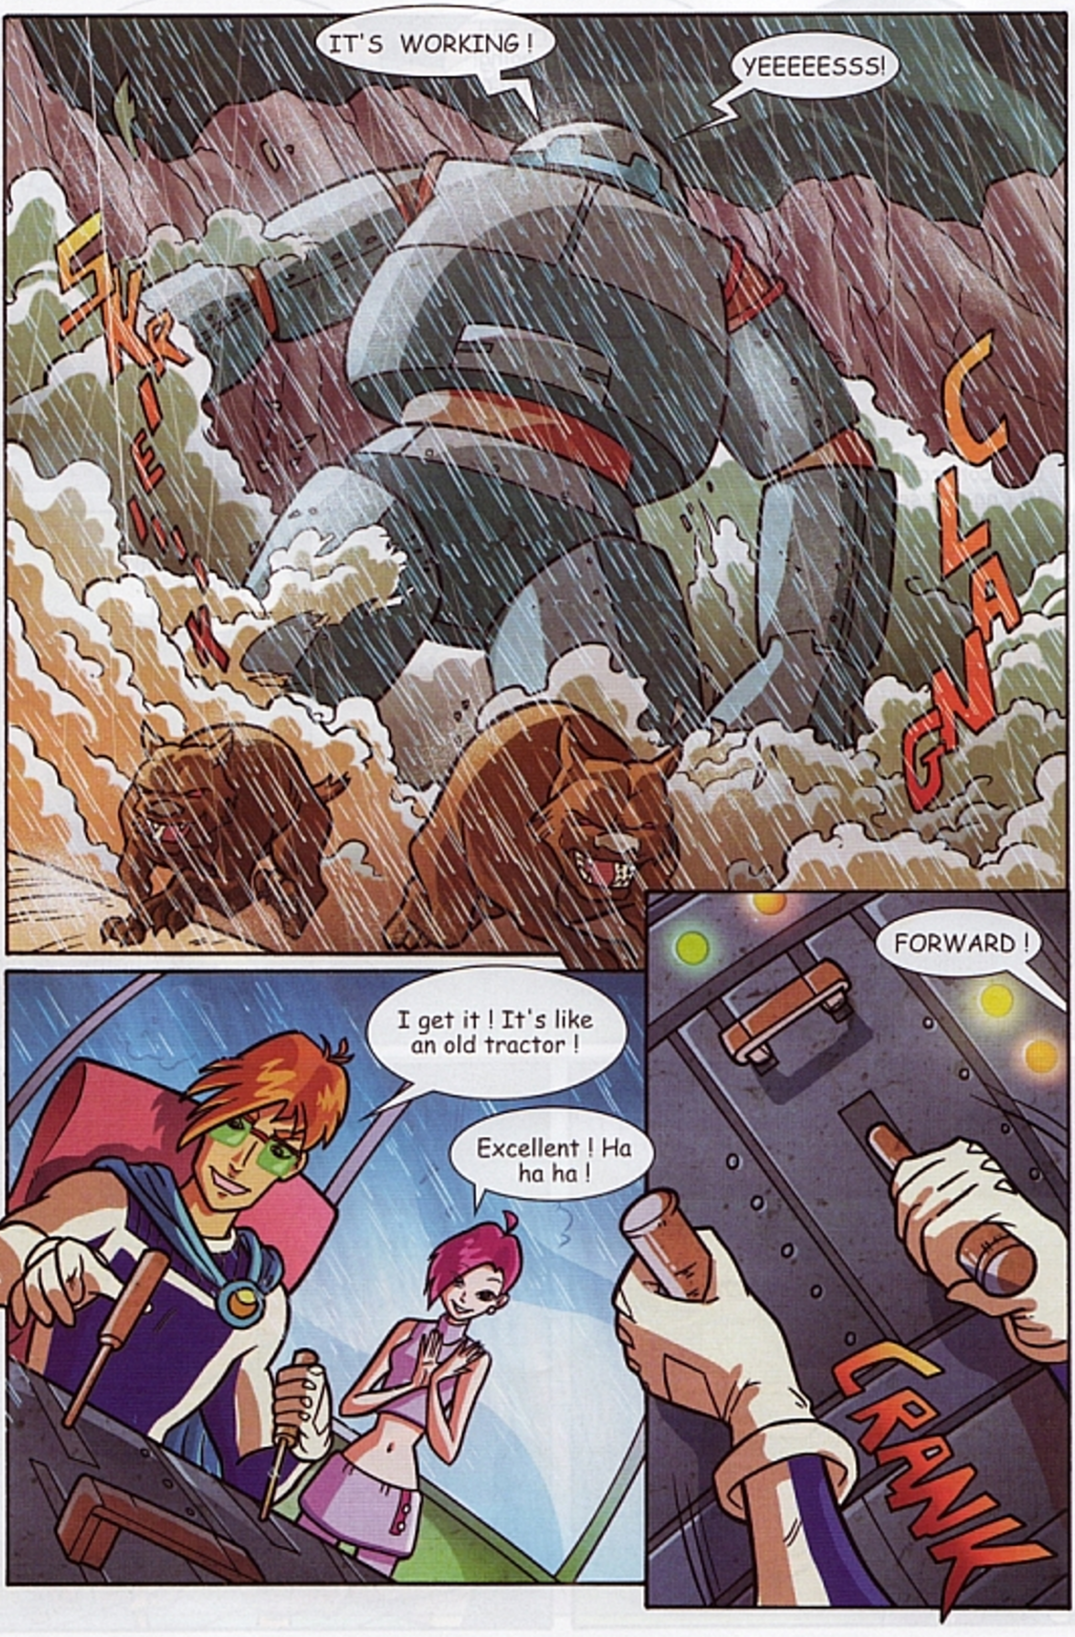
So I got back some of my magic......just enough to do this!
Oooh!
You know that it doesn't work very well here, but I did my best and it will make you .....think that you are really eating it!
YUMMY!
Do you know what Tecna? I'm glad we crashed!
Me too!
Meanwhile....
Come on! We should be able to see the whole valley from up there!



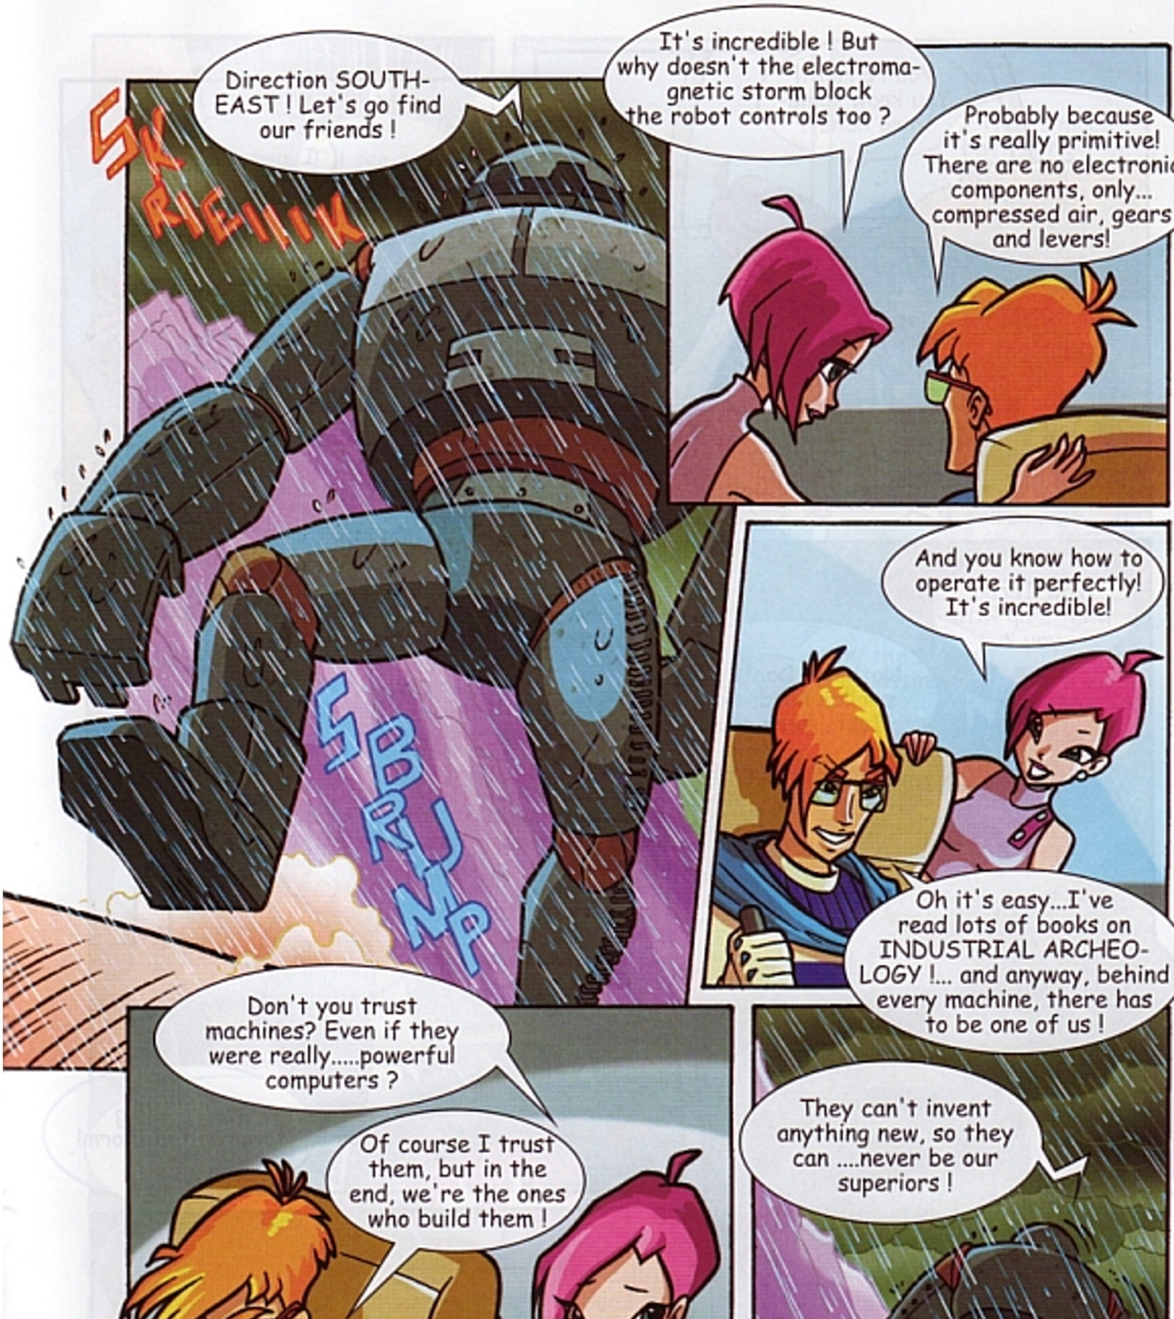
Oh, noo!
Damn....we don't need this!
It's been swallowed by the river! We won't get through!
Yeah! but there's worse news over there!
Chameleons! They've seen us!
Oh no!
This way, quick! Let's get out of here!
GGRRR



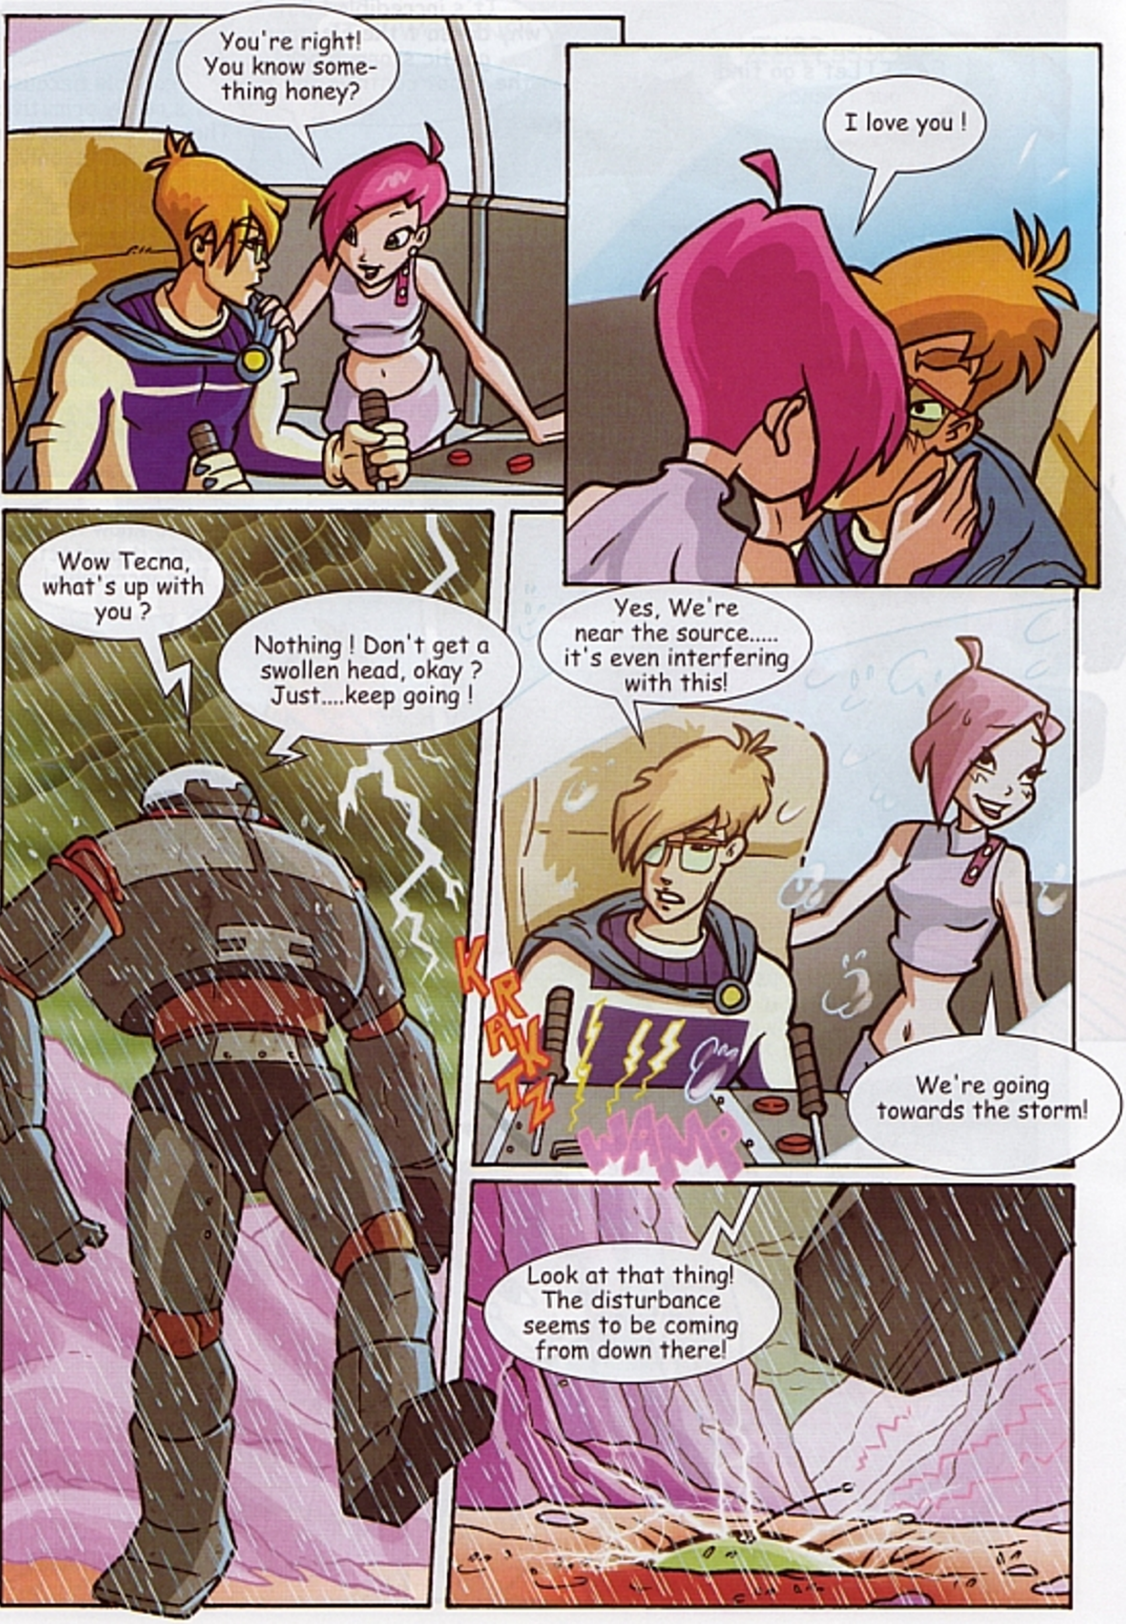
We have to try and get this robot going! Give me a hand Tecna!
I'll try and connect the energy cell. You tell me if anything starts up!
Okay!
I've connected it! Can you see anything?
No!
Now?
Yes, it's on! THERE'S ENERGY!
Now we'll see that our luck has changed!
So......let's try this!
CLANG



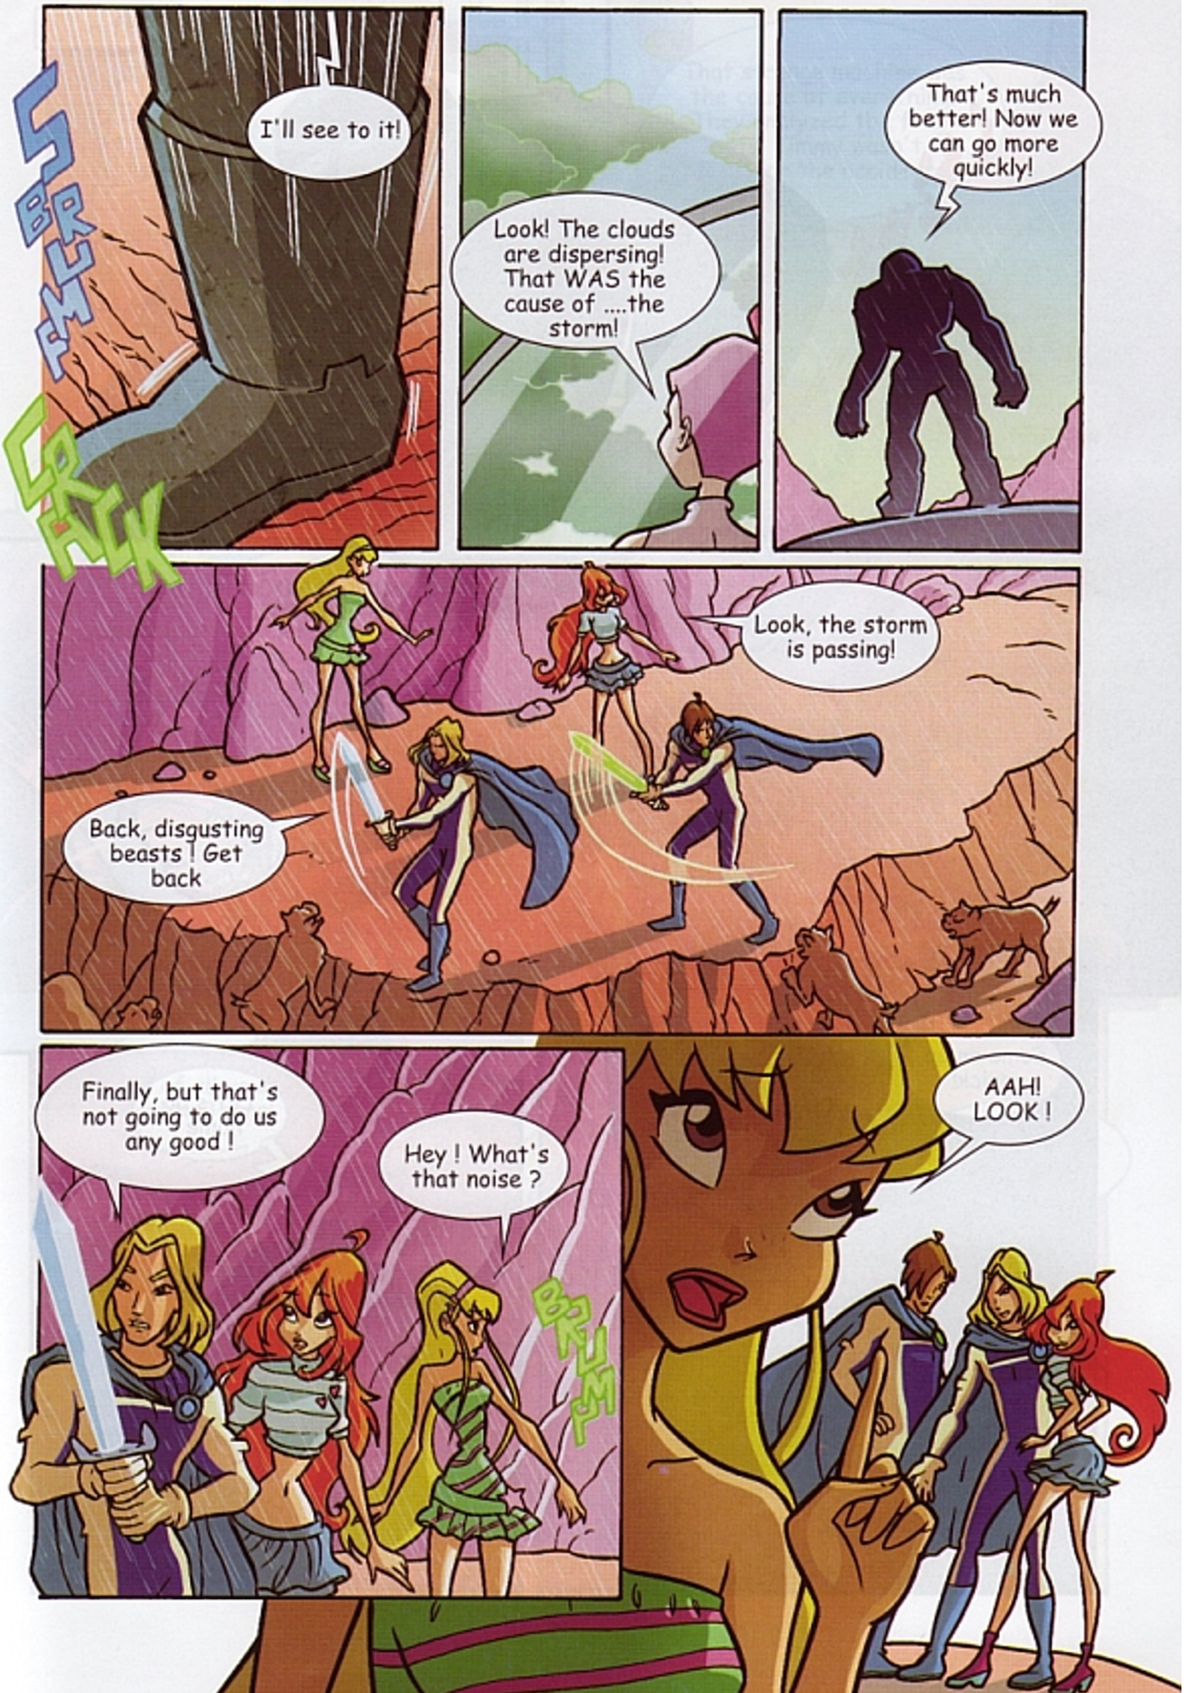
IT'S WORKING!
YEEEEESSS!
SKREEEK
CLANG
I get it ! It's like an old tractor !
Excellent ! Ha ha ha !
FORWARD !
CRANK



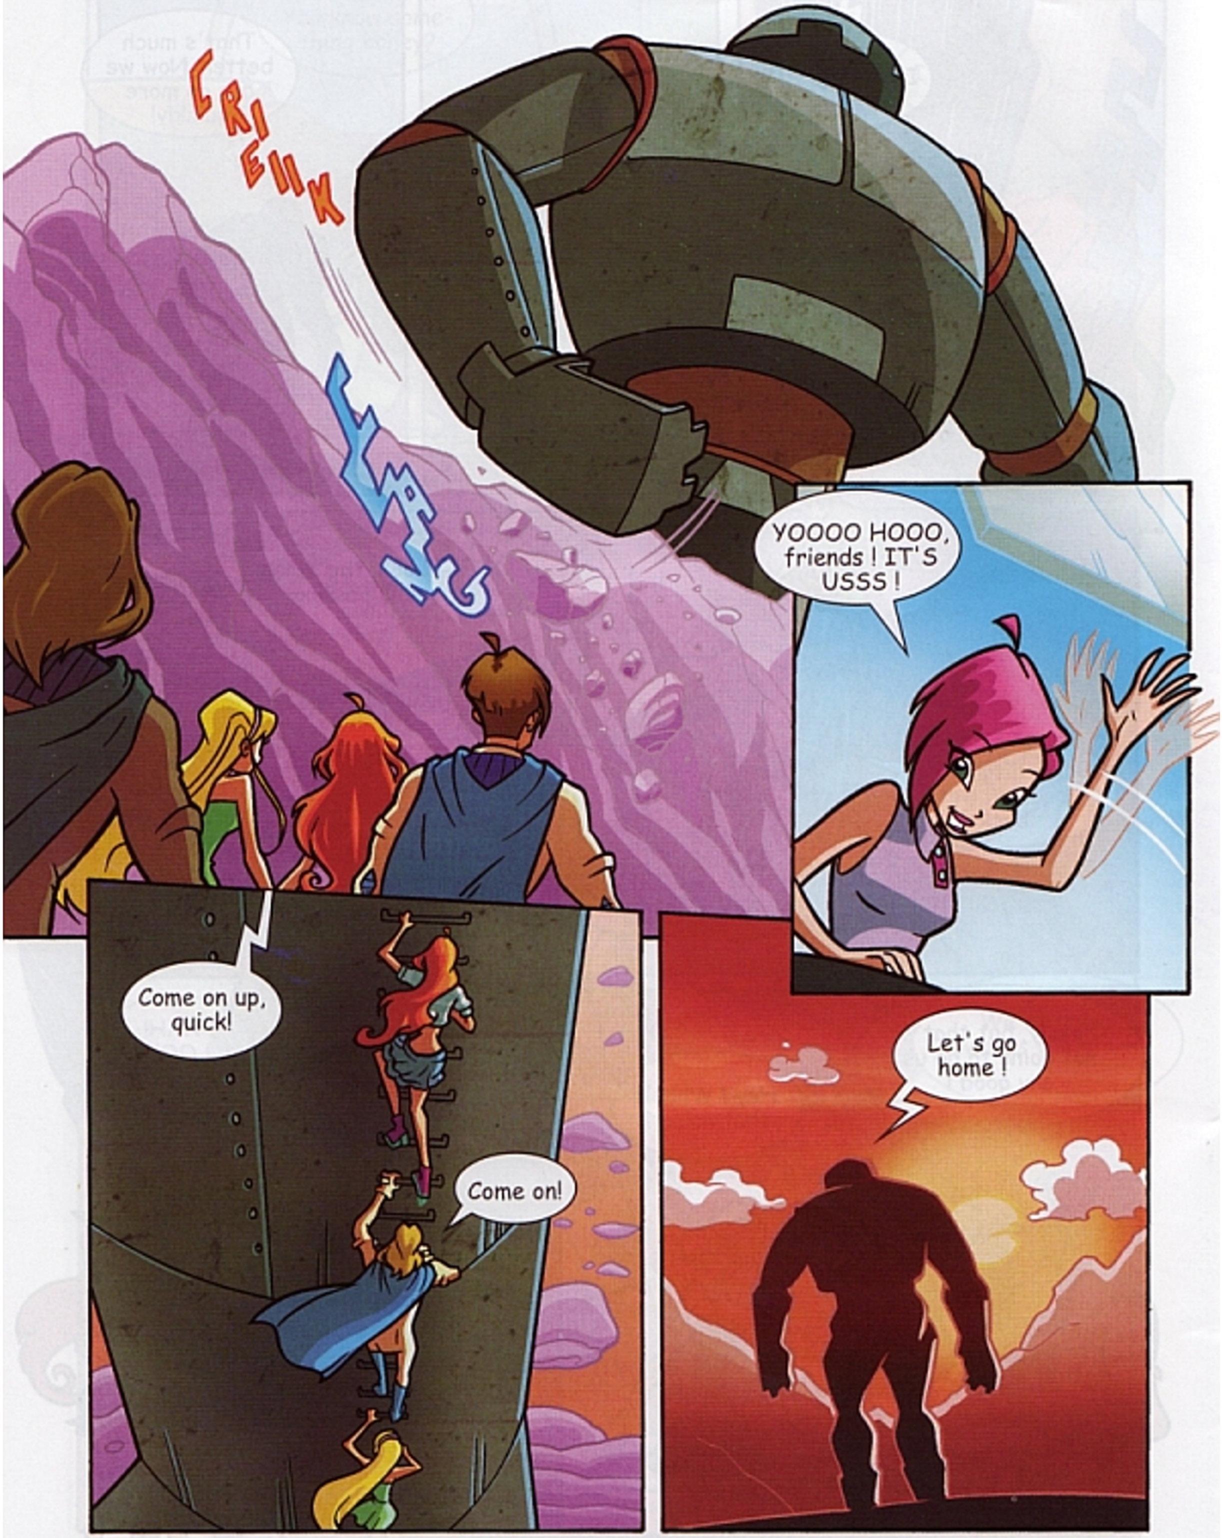
SKRIEIIIK
Direction SOUTH-EAST ! Let's go find our friends !
SBRUMP
It's incredible ! But why doesn't the electromagnetic storm block the robot controls too ?
Probably because it's really primitive! There are no electronic components, only... compressed air, gears and levers!
And you know how to operate it perfectly! It's incredible!
Oh it's easy...I've read lots of books on INDUSTRIAL ARCHEOLOGY !... and anyway, behind every machine, there has to be one of us !
Don't you trust machines? Even if they were really.....powerful computers ?
Of course I trust them, but in the end, we're the ones who build them !
They can't invent anything new, so they can ....never be our superiors !



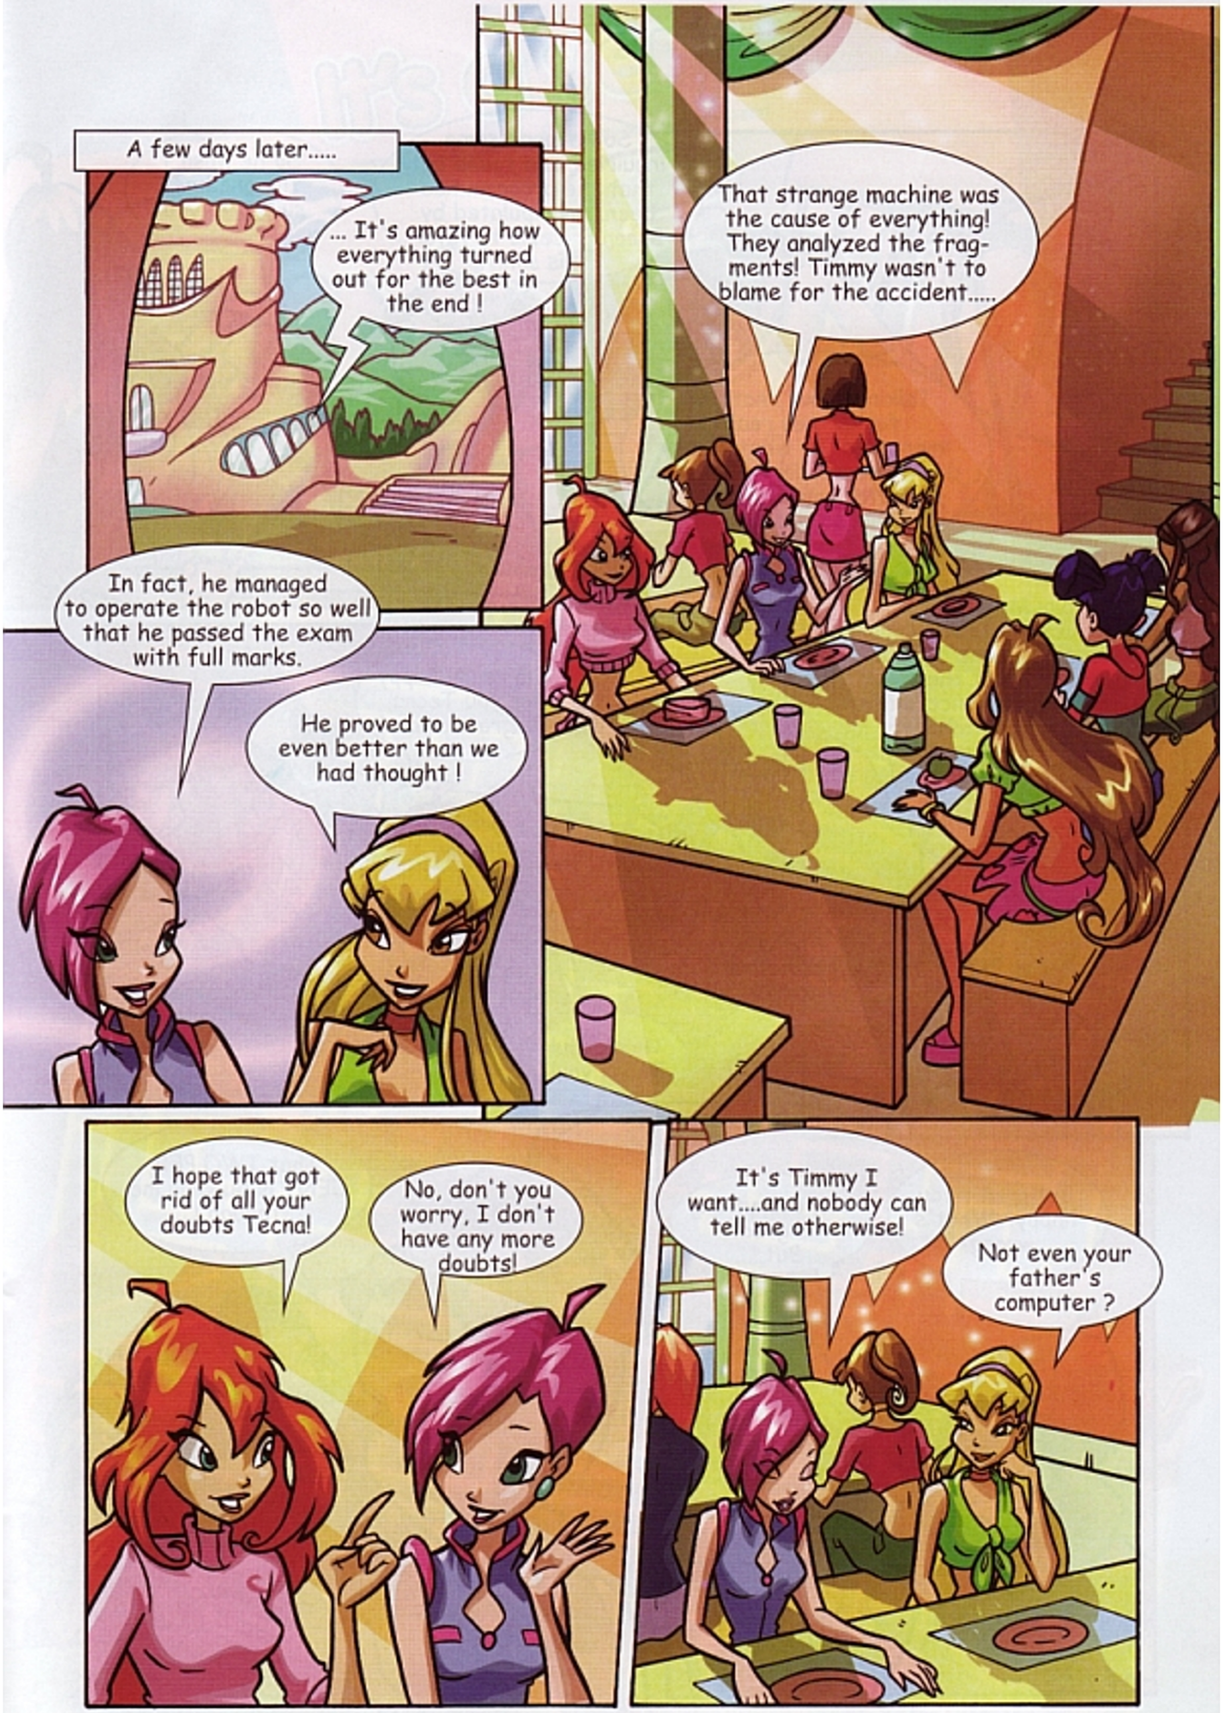
You're right! You know some-thing honey?
I love you !
Wow Tecna, what's up with you ?
Nothing ! Don't get a swollen head, okay ? Just....keep going !
Yes, We're near the source..... it's even interfering with this!
KRAKTZ
WAMP
We're going towards the storm!
Look at that thing! The disturbance seems to be coming from down there!



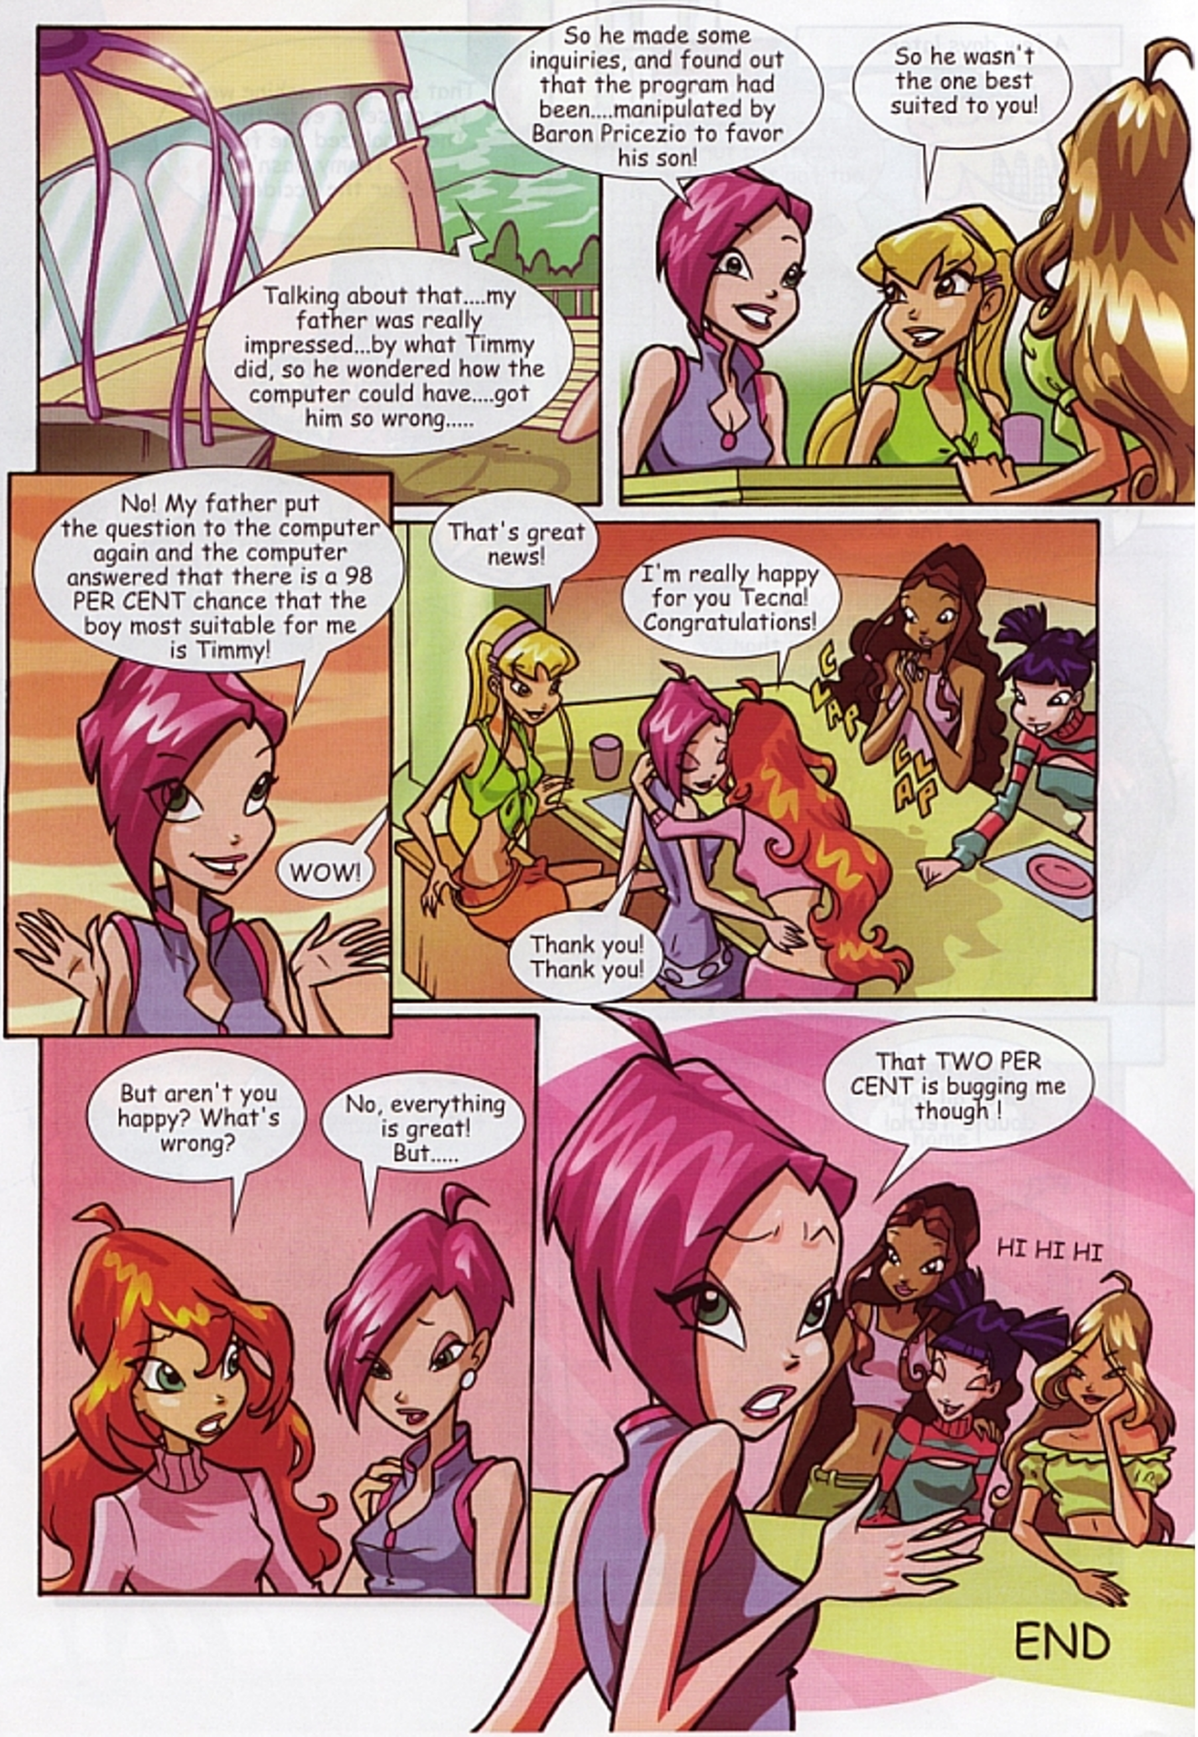
SBRUMF
CRACK
I'll see to it!
Look! The clouds are dispersing! That WAS the cause of ....the storm!
That's much better! Now we can go more quickly!
Look, the storm is passing!
Back, disgusting beasts ! Get back
Finally, but that's not going to do us any good !
Hey ! What's that noise ?
BRUMF
AAH! LOOK !



CRIEUK
CLANG
YOOOO HOOO, friends ! IT'S USSS !
Come on up, quick!
Come on!
Let's go home !



A few days later.....
... It's amazing how everything turned out for the best in the end !
That strange machine was the cause of everything! They analyzed the fragments! Timmy wasn't to blame for the accident.....
In fact, he managed to operate the robot so well that he passed the exam with full marks.
He proved to be even better than we had thought !
I hope that got rid of all your doubts Tecna!
No, don't you worry, I don't have any more doubts!
It's Timmy I want....and nobody can tell me otherwise!
Not even your father's computer ?



Talking about that....my father was really impressed...by what Timmy did, so he wondered how the computer could have....got him so wrong.....
So he made some inquiries, and found out that the program had been....manipulated by Baron Pricezio to favor his son!
So he wasn't the one best suited to you!
No! My father put the question to the computer again and the computer answered that there is a 98 PER CENT chance that the boy most suitable for me is Timmy!
WOW!
That's great news!
I'm really happy for you Tecna! Congratulations!
CLAP
CLAP
Thank you! Thank you!
But aren't you happy? What's wrong?
No, everything is great! But.....
That TWO PER CENT is bugging me though !
HI HI HI
END
